# To the Men and Women of the Ford Motor Company

(Text of a letter from Henry Ford II to 140,000 hourly employees of the Ford Motor Company throughout the United States)

Here at Ford Motor Company, we think of the new labor contract we proposed to the UAW-CIO last Thursday as a Ford Partnership in Prosperity Program.

Because it is so important to you and your family, I want to share with you the beliefs which led us to this far-reaching proposal.

We believe the outlook for the future is very bright. We are not pessimistic about the American economy or the automobile business. Quite to the contrary, we are optimistic about the chances for our company to continue to grow. We are optimistic about the chances for more and better jobs. And we are optimistic about making more and better products.

These prospects for more of the good things and our ability to share them with you are the most important things we have been thinking about as we negotiate with the union.

We sincerely believe that two aims should be uppermost. First, the new contract should make it easier for our company and our employees to take advantage of the opportunities that are before us. Second, the new contract should provide a good way for our company to share the fruits of our progress with our employees as we move ahead.

The employee security program which we propose has been designed to work toward these goals. Let me state the main principles of the program as simply as I can.

One of the most important features is the Ford Savings and Stock Participation Plan. It gives the company a way to help you and your family build security for the future on your own initiative. It will encourage family savings and at the same time give you an opportunity to become a stockholder in Ford Motor Company and share in its profits and growth.

Another important part of the program is called the Ford Employees Income Stabilization Plan. It provides a way for the company to advance some of your wages to you, if you want them during periods of lay-off. The funds would be repaid to the company after you return to work, without interest and under very liberal conditions.

A third feature of the program would take the form of liberal severance pay, the exact amount depending on your wage rate and seniority.

The new program would continue your "annual improvement factor" wage increase. It would also increase your benefits under the company's pension, insurance and health programs, and add new benefits for your family.

These are the main features of the program, but there are many more. Together, they make up a package that can give you higher pay and more security.

Naturally, our company had to calculate many risks in proposing such an extensive program. If the union accepts it, we will have to make many financial commitments immediately for many years ahead. That is why we favor a five-year contract.

Nobody can really guarantee the future. The best we can do is size up the chances, calculate the risks involved, estimate our ability to deal with them, and then make our plans with confidence.

That is exactly what the company has done in proposing this prosperity partnership program for the next five years.

I hope that you and your family will give it a great deal of thought.

Sincerely,

Henry Ford II
