An Editorial

Despite unseasonably chilly weather, Manchester's Community Fair of 1956 may top all previous attendance records, according to preliminary reports received by Fair officials shortly after the event closed Saturday.

Persons attending the event were from a wide area, although the vast majority were residents of Manchester and its immediate communities. The visitors included, among many others, persons living at nearby lakes who brought their children along for an enjoyable day. Some stated that their communitiess could learn much at an affair such as the event arranged by residents of Manchester.

Without cooperation of everyone in the community, a huge venture such as the Manchester Community Fair would be impossible. The help of everyone is necessary, whether the resident is working directly to plan the Fair, making a cake to be displayed, volunteering a choice head of cabbage for one of the exhibits, rushing home to cook a kettle of chill for the school class to serve in their tent, or getting the children ready to enjoy a day at the event.

One of our big industries is films. Film makers have sweated out a very bad time since television out in on their fun. Yot for a superlative picture there is—will always be—lots of box office money. When a zillion dollar epic becomes an episodic flop—whose fault is that? Boys, listen to Bogart. Don't deceive the paying public. It just can't be done. What's with the "star" system, anyway? A good story will make new stars—if actors know their jobs and are allowed to do them. But Hollywood can rewrite stories better than writers originally wrote them—they think writing is easy, too. So what? A swiss cheese story starring somebody it sequin tights just misses the Academy Award by a false eyelash? Don't look now, but there are real actors, real stars, real stories to be had. So make real movies, a'ready.

At least, listen to Bogart. An honest man, that one. I love him.
