in building often equals or exceeds the investment in land.

According to the specialists average investments in buildings as a percentage of total real tstate commonly decrease as size of farm increases.

This is because of the economics of constructing larger buildings and the relatively fixed requirements for some types of buildings regardless of the farm's size.

GARD OF THANKS

We want to thank our friends, neighbors, and relatives for their many acts of kindness, and flow ers at the time of our father's death.

CERD OF THANKS

If the same family using the had increased the number of insame amount of milk had two cows many acts of kindness, and flow cost would be greater unless there was use for the surplus milk. On the credit side would be a year-death.

Down that the soil pans program had increased the number of insame, and increased the number of insame the soil pans program had increased the number of insame the soil pans program had increased the number of insame the soil pans program had increased the number of insame the soil pans program had increased the number of insame the soil pans program had increased the number of insame the soil pans program had increased the number of insame the soil pans program had increased the number of insame the part of the soil pans program had increased the number of insame the part of the soil pans program had increased the number of insame the part of the cost would be greater unless there are the acreage of the number of insame the part of the cost would be greater unless there are the acreage of the number of insame the part of the par

the credit side would be a yeartound milk supply.

In this example, to gain from home-producing milk, the family must consume more than 45 quarts with one cow as whole milk month two cows. It does not pay at this level to keep a cow for butter or cream.

It the family uses 100 quarts from a year earlier. This from one cow or 150 quarts from a cow are, compared with the family uses 100 quarts from a cow or 150 quarts from a cow or 150 quarts from a cow or 150 quarts from a core.

Pay

**Buttle evidence that the soft bank had contributed appreciably to the national increase in average market prices of land in the last year.

It the family uses 100 quarts two cows. It does not pay at this level to keep a cow for butter or cream.

It the family uses 100 quarts from a year earlier. This from one cow or 150 quarts from a core. Compared with the 200-quart level of cosmunition with one cow—or 250 quarts with two cows—is the use of milk for butter profitable.

Pay

However. R adde1, there was little evidence that the soft bank had contributed appreciably to the national increase in average market prices of land in the last year.

However. R adde1, there was little evidence that the soft bank had contributed appreciably to the national increase in average market prices of land in the last year.

It the family uses 100 quarts from a year earlier. This represented a national average of two cows, it will profit by producing milk the family must consume more with two cows at this level to keep a cow for butter or cream.

The experts say that not until the 200-quart level of cosmunition with one cow—or 250 quarts with two cows—is the use of milk and contributed appreciably to the national increase in average market prices of land in the last year.

However. R adde1, mere than 250 had contributed appreciably to the national increase in average market prices of land in the last year.

However. R adde1, mere than 250 dear state with a doctor in the doctor indication. The total market value of farm real estate was estimated
