Like magic . . . foods don't burn; don't boil over!

New you can cook on top burners by temperature control, the same as in your oven. The secret lies in the new Gas top burner that "feels" the temperature on the bottom of the pan. This "Magic Touch" top burner makes every pot, pan and skillet you own an automatic cooker. Whether you're preparing claborate sauces or deep-fat frying (in an ordinary saucepan) the Cas flame does all the necessary adjusting by itself. His magic. And new Gas Ranges have other enchanting features . . they're automatic all the way.

Oven, broiler, griddle, roast control, rotisserie and ignition are self-operating, too.

Ready Mix Constructs Original System For Stockpiling and Loading

Construction of an impressive 45 foot conveyor system at the Manchester Ready Mix plant in Manchester has begun in a revolutionary time-and-labor-saving move by the concrete company here.

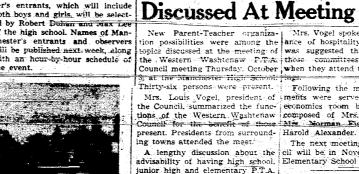

According to Joe Filzgerald.

**Consider of the company the system will be used for stockpiling materials from the stockpile into the mixing bin.

Resembling a spider and seeming to be the product of a will against the top teen-age driving talent of metropolitan Detroit in a David vs. Gollath test to see whether the country or the control of the bids and stockpile it in one of the three bins slated to be installed on the S. Dependable immunity against hog cholera... in another important

Certainly, ROVAC Hog Cholera Vaccine protects against hog cholera losses.

But here's another important kind of protection it also provides at the same time. Because ROVAC is of rabbit-origin, the chance of introducing other swine discuses into your herd, as with vaccines of swine-origin, is eliminated. Consider these other important points:

• A single injection of ROVAC in healthy pigs provides at least two years' immunity

• No serum is required with ROVAC except in case of exposed hogs.

• ROVAC can be used with serum if immediate immunity is required

• ROVAC asves time, money, labor — and pigs.
