### 25th Anniversary

Mr. and Mrs. Charles Knopp entertained her aunt and husband Mr. and Mrs. George Loomis and Mr. and Mrs. George Lyke all of Plymouth over the week end and on Sunday all enjoyed an anniversary dinner in honor of Mr. and Mrs. Loomis' 25th wedding anniversary.

THE MOUNT OF TEMPTATION: Wednesday is the first day of Lent, the start of the 45-day penitential season that commemorates Christ's fast in the wilderness. This drawing of Christ praying in a cave is based on a sketch made on the Mountain of Temptation in the Holy Land, where according to sacred tradition Christ was tempted three times by Satan. A narrow trail rimming the steep cliffs leads up to the cave. There is an awesome view of the Jordan Valley from the mouth of the cave, which drops away from a high, jagged precipice. The whole setting, stark and forbidding, brings home the tremendous privations that Christ endured in the wilderness. And yet he found the strength to tell his tempter: "Get thee hence, Satan."

**Washtenaw Now Has 33 Centennial Farms**

**CENTENNIAL FARM:** One of the 33 Washtenaw county farms which have been designated as centennial farms by the Michigan Historical Commission is the Gerhardt Schabbe farm at 754 Pleasant Lake Rd. in Lodi township. The 120-acre spread was purchased originally in 1847 by John Schabbe, great-grandfather of the present owner, Gerhardt, 35, and his wife Esther have five children, David, 8, Linda, 6, Anita, 4, Gloria, 3, and Pamela, 1, so there is good reason to believe the Schabbe ownership will continue.

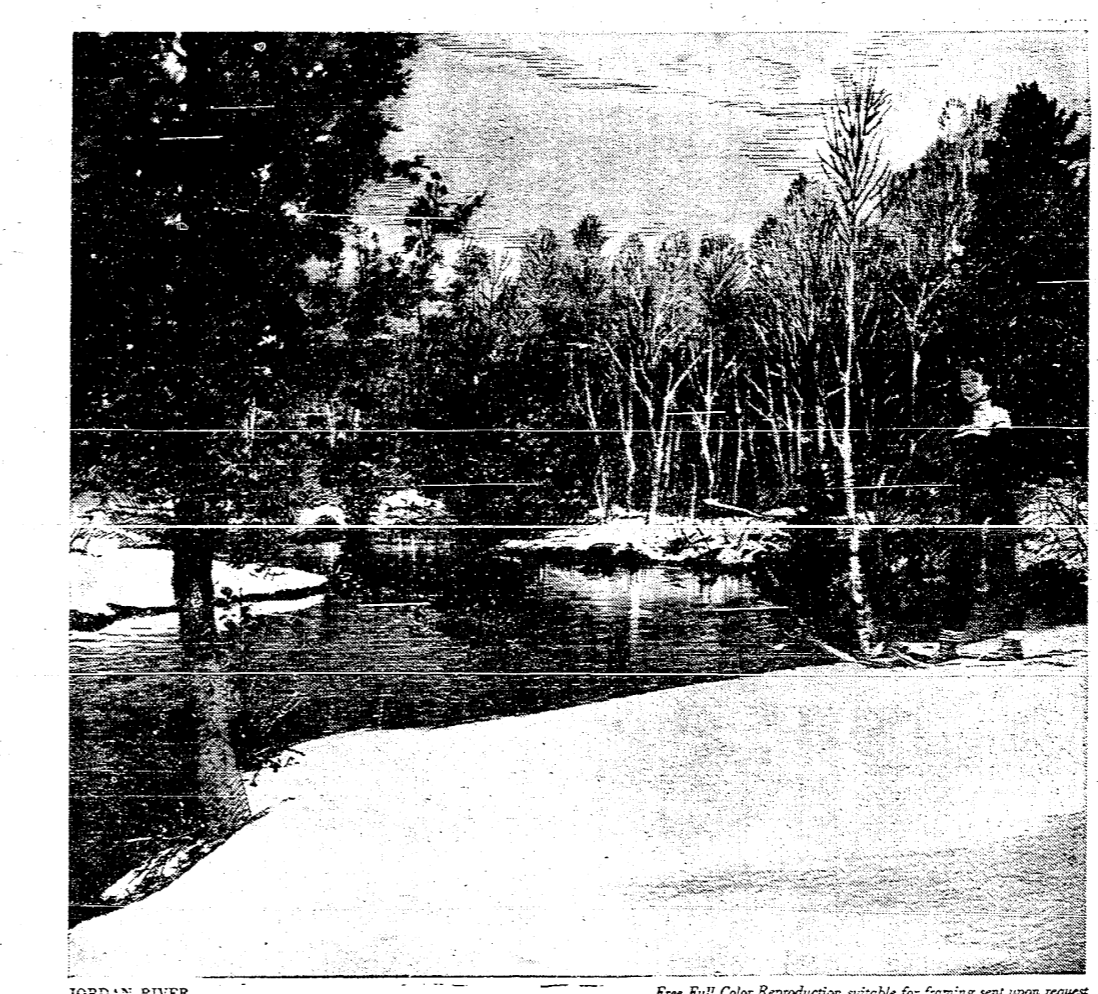

Thirty-three Washtenaw county farms, each owned by the same family for more than a century, are among 1,239 in the state which have been designated as centennial farms by the Michigan Historical Commission.

The latest addition to the list is the farm owned by Ruth Valentine Burnett of 4875 Walsh Rd., Webster township. Her farm, which has been in the family since 1838, was among a group of 14 certified by the historical commission in January.

Since the centennial farm program was started in 1948, a few of the 33 Washtenaw farms have been sold or leased. But most have remained in the centennial family.

Several other farms in the county may be eligible for certification but the owners have not made application for recognition.

Application is made to the historical commission office in Lansing and if the farmer is found to be eligible, he is awarded a metal marker for display on the property and a certificate signed by the governor.

Thomas A. Edison Feb. 11, 1847

Your Electrical Genius!

In 1874 at the age of 29, Tom Edison set a goal for himself. He would, he decided, create a major invention every six months and finish three inventions of lasting importance every month. He more than achieved this goal. During the next 15 years he averaged a patent every 7 to 9 days. During the 42 years between 1869 and 1910 he averaged a patent every two weeks.

Edison brought electricity out of the laboratory and into practical use for the benefit of mankind. He worked unrelentingly to develop the first practical electric light bulb and the equipment needed to bring it into the homes of America. Edison founded an industry that has become one of the nation's largest and most vital... an industry that has put the magic of electricity to work in a thousand ways that contribute to the strength and prosperity of the nation.

This week—National Electric Week—marks the 112th anniversary of the birth of Thomas A. Edison. During this week, let us all the various groups that make up the electrical industry, unite to pay tribute to Edison and other pioneers of electrical progress. We join today in rededicating our industry to continuing progress and service to the nation.

We Salute THOMAS A. EDISON

GOES AND GOES AND GOES ON A GALLON!

CHEVY'S NEW HI-THRIFT 6

More miles are back in a gallon of regular-grade gas—up to 10% more—and Chevy's new Hi-Thrift 6 engine puts them there. It also gives you more "giz" in the speeds you drive the most.

Here's an engine that always seems able to coax extra miles out of a tank of regular-grade gas. In fact, if you're one of those drivers who keep tab on things like gas mileage, you'll soon see for yourself that this new Hi-Thrift 6 gets up to 10% more miles a gallon.

Another thing you'll like about this 138-h.p. 6 is the extra pep it gives you for passing and climbing hills. This is due to higher torque at normal speeds.

It may be hard to believe anything that looks and moves like this '59 Chevy can be such a staidler for economy. But—whether you pick the Hi-Thrift 6 or a v-6-packed V8—this is just one more reason Chevy's the car that's wanted for its worth. Stop by your dealer's and see.

The smart switch is to the '59 Chevy!

now—see the wider selection of models at your local authorized Chevrolet dealer's!

# Dutchmen Win Second Straight

## Boysville 65 - 54 Victim Here Last Friday Night

Coming to life after a slow start, the Manchester Dutchmen defeated Boysville 65 to 54 before the home folks in the Manchester Gym last Friday evening.

This Friday night the Dutchmen will entertain Easter in another league contest at the local gymnasium.

Manchester season record is 11 wins in 10 starts overall and 7-3 in the Dutchmen League. The boys will take high point honors for Manchester with 23 points. England added 15 points, while Kirk and Meyer had 10 each.

The reserve team preliminary contest went to Boysville by a 40-30 margin.

## Immunization Clinics Complete For County

A completed schedule for spring immunization clinics was released today by Dr. Darrell A. Campbell, President of the Washtenaw County Medical Society.

## Which Industry Now Batters the Living of 3 Out of 4 Michigan Families?

... Here Are Some Surprising Facts About The Trading Stamp Industry

So far, whenever our nation's economy has needed expansion, a new industry has sprung up to help the country go ahead.

The automobile industry, employing millions, was followed closely by the development of radio and radio broadcasting to make more millions of jobs. Then came the airplane industry, air conditioning, plastics, television, frozen foods, to change our lives more.

The trading stamp industry, while not new, belongs to this expanding group and has been one of the fastest growing of all. Today it batters the living of more than 3 out of 4 Michigan families who use trading stamps.

Obviously, an industry affecting such a large proportion of Michigan's population must bring far-reaching benefits for Michigan's economy. And it does.

In 1957 the trading stamp industry bought \$9,816,000 worth of products from Michigan's manufacturers. In one way or another, it provided employment for 1,016 Michigan people in many different industries.

The people in the trading stamp industry, its merchandise and redemption stores, its warehouses and transportation and all the activity that goes on within it are integrated economically everywhere within our state.

This it seems plain that the trading stamp industry along with the 1,690,000 Michigan women it serves has become like other expansion industries, a living, vital segment of Michigan's economy.

**Census Bureau To Collect Information On Work Experience**

Information on the work experience of the Nation's population during 1958 will be collected by means of special questions to be asked in the February Current Population Survey, according to Supervisor John E. Tharaldson of the Census Bureau's regional office at Detroit which will participate in the survey.

The special questions will provide information on the number of persons who worked during the year because of unemployment and disability, and related items. Information on farm wage workers will be collected also in the February Current Population Survey. This will show the number of persons who did farm work for cash wages in 1958.

The special questions on work experience will be in addition to the regular inquiries on employment and unemployment which are asked each month in 350 "sample" areas throughout the country. Information will be collected locally during the week of February 10 by Mrs. Mary K. Hanson.

The sales tax plan, on the other hand already has a functioning department. "Bureaucracy is in control of the government today, not the Republicans or Democrats," Rep. Warner said. When the ice starts to melt it will have to go somewhere, but there are few places for it to go," the drain commissioner said. All of the potholes where it might run off are also filled with ice."

The commissioner said that there are from 2 to 6 inches of ice on the ground and that each inch of ice is equivalent to 7 or 8 inches of snow.

## County Residents Are Warned Of Floods

Washington residents get second warning to be prepared for flood conditions on roads. Last week, Howard Minter, Washtenaw county road superintendent - manager stressed the importance of rural residents being prepared and today, Dean Commissioner John P. Flook said that soon flood conditions may be "worse than any in the memory of those who have been keeping track."

Flook pointed out that residents in the county who have had trouble with flooded basements should start now to take all the precautions and make all the preparations possible in anticipation of the conditions.

He advised that people having basement drains leading to sanitary or storm sewers should plug them up. Carpeting should be removed from basement floors and to be prepared to turn off their furnaces.

Flood said that although there isn't much snow on the ground, the amount of ice presents a worse menace. He said that if there is a sudden warm rain or rapid thaw, conditions will be worse than they were in 1947, when the county went through its worst floods in more than 50 years.
