The electronic age continues to amaze me. Just read in a farm journal that cows can now be wired for sound . . . so that you can tell if they've been overeating!

Seems that before you turn a cow out to pasture, you can feed her a small transmitter powered by a flashlight battery.

Then all you do is sit comfortably at home and wait for a signal to show up on a recorder. Soon as you get a "bleep," you go out and fetch
