## Should We Add A Bit Of Salt To The Water?

By C. Chapin

Goodness what a response! All sorts of people seemed to enjoy our somewhat glutinous account of elbow dripping corn feasts. We have been listening all week to good things about food and one utterly charming gentleman turned up on the doorstep with a gift of fresh corn. We've had a conference and with the staff offering suggestions like "This week talk about beef steak" or "How about money as a subject?" I simply had to quench such frivolous ideas and work with the principle that when a good thing is going—go with it.

There seems to be a variety of schools about the proper enjoyment of corn. Small tender green corn as opposed to large yellow fat kernels. Should the fingers be used or those little skewers to keep the fingertips cool. Should we add a bit of salt to the water or a spoon of sugar? One can buy small brushes to paint the butter evenly, but I have a brother-in-law who maintains stoutly that the only civilized way is to put a pat of butter on a slice of bread and roll the corn in it. Lots of people who don't have either the heart or the bits for it simply stand the cob on end and slice the kernels off with a sharp knife, then butter the plateful and eat while everyone else must stop to butter and sprinkle.

We have taken the ears still in the husks and soaked them in water and roasted on the grill, have done the same roasting with the corn wrapped in foil.

The leftover corn can be sliced off and warmed in milk, for myself though, dried corn is the best way.

The simplest way is to do small portions at a time, usually the few ears that are left after dinner, cut the kernels from the cob and spread on a cookie sheet, slip into the oven door open to let the moisture escape, about one-half hour should be enough for the nuggets to turn golden brown and hard as rock. Cool and store in a glass jar on cupboard shelf. Later in the winter, simply soak a few hours in milk and heat gently, serve with a smile, for the corn has a nutty flavor.

Indian maize, staple of the pioneers and early settlers, one of the basic grains of

the world, corn is well worth the trouble of canning. If you can acquire enough lids for the canning jars. However don't despair, for I'm told that President Ford remarked that he was personally going to see about the lid shortage, just before he left for an overseas trip.

## Attention: Middle School Athletes

It is very highly recommended by the doctors and administration that each athlete try to get a more complete physical through their family doctor. Physical cards will be available at the Middle School on the day of the physicals.

Physicals for those who cannot get to their own doctors will be given on Wednesday, August 13, at 2:00 p.m. at the Middle School.

There will be a representative from the Maumee Co. at the school on August 13, for those interested in ordering football shoes.

A team meeting will be held on Friday, August 22 at 9:00 a.m. for the collecting of necessary money and the handing out of equipment. The first practice session will be held on the following Monday, August 25, at 9:00 a.m.

## Hole-In-One

LOWER LEAGUE NEWS

Current talk is of Village Tap's 6 game winning streak that has moved them from 6th place to a tie for 3rd. Pioneer's remain in first place, despite their loss to Tap, because Tap beat Foxy's on Thursday and the Union Savings Bank crushed Dairy Queen 28-2. The Bank collected over 30 hits on their road to victory. Everything went right for the Bank as Dairy Queen fell, Steve Carson, Bruce Fielder, and Dave Petch had in-the-park round-trippers for the Bank.

TOOL & DIE AGAIN DOWNS STAMPING

Like last meeting, Stamping failed to hit the long one. Tool & Die went ahead to stay as Jim Fielder had a sole blast breaking a 2-2 deadlock, but it was Bill Panches' 3 run home run that put it out of reach.

## BOOSTER'S TOURNAMENT

What a weekend for baseball, and baseball it was as there were 19 games in three days. Sunday will long be remembered by the Pioneer squad as they collected 82 hits for 64 runs in five games to win the trophy. Village Tap made a valiant effort by winning 2 consecutively for the right to meet Pioneers in the championship, but fell to take home the runner up trophy. PH have a detailed story next week with pictures.  
Congratulations Pioneers!

**GRIFFIN**

By cutting through red tape, members of Congress can often lend a hand to those with problems involving the federal government. Through the columns of this newspaper, Senator Griffin answers questions of general interest. He will respond personally to all communications addressed to: Senator Robert P. Griffin, Senate Office Building, Washington, D.C. 20510.

Who is the Chaplain of the United States Senate? Recently, when I was visiting the Capitol, I heard him give a prayer, and I thought it was very good. Is it possible to get a copy of some of his prayers? I'm sure many people would find them uplifting.

—T. V. Lapeer

The 49th Chaplain of the United States Senate is Dr. Edward L. R. Elson. Dr. Elson performs a very important function in the Senate by offering a prayer at the start of each daily session. In addition, he is available to assist Senators and Senate employees who seek his counsel. The prayers he delivers in the Senate are available in published form. You may obtain a copy of those delivered during the recently completed 93rd Congress by writing to: Dr. Edward L. R. Elson, Chaplain of the Senate of the United States, Room 220, Russell Senate Office Building, Washington, D.C. 20510.

Even though I'm only eight years old, my parents said you wouldn't mind if I write to you. I'd like to know what has happened to Smokey the Bear. I saw him on T.V. the other day and he looked very sad. Is he O.K.?

—S. E. Prescott

Smokey is getting older—that's all. Perhaps he'll be happier after he retires and gets back home to that ranch in New Mexico where he grew up. When he was just a cub, Smokey got caught in a forest fire. Luckily, he was rescued, and ever since then he has been working to prevent forest fires. Along the way, he's helped to save a lot of animals, trees and people.

A new bear—Smokey, Jr.—will be taking over the job, and he'll need your help too. Remember, like Smokey always said: "Only you can prevent forest fires."

**It's Summer...  
And Time For Fresh Plums**

An oriental setting is a culinary natural for fresh plums—they grew wild in China over 2000 years ago, were domesticated in Japan and then brought to California as early as the 1870's. Today, California plum orchards produce more than 90 percent of the nation's plum supply, and this year California plum growers expect to ship to market the third largest crop in industry history.

The multi-colored plum parade starts about mid-May and continues through the summer, well into September. More than 20 major plum varieties are shipped to market including the popular crimson Santa Rosa, El Dorado, Laroda, Nubiana, Queen Ann and Casselman plums.

Of course, the favorite way to enjoy this tart and tangy summer fruit is fresh and out-of-hand. Or try this sprightly dessert sauce over ice cream, cake or fresh summer fruit cups. For a quick finger salad, remove a wedge from an assortment of plum varieties and stuff with a cream cheese, chopped nut and candied ginger mixture. Any way you serve them, it's summer and time to enjoy FRESH California plums!

For more than 100 different ways to serve fresh California summer fruits, write for your free copy of a 48-page, color-illustrated recipe booklet. Please send a stamped, self-addressed business-size envelope to "FRUITS OF SUMMER," P.O. Box 4640, Sacramento, CA 95825.

Motorists on Interstate 94 Freeway between Ann Arbor and Ypsilanti can expect slow-downs this summer due to periodic closing of one lane in each direction, the Department of State Highways and Transportation warned today.

Modernization and widening projects, no underway to improve safety and traffic capacity between Jackson Road west of Ann Arbor and the US 12 Business Route (Huron-Whittaker) interchange south of Ypsilanti, require periodic lane-closings between 8:30 a.m. and 3:30 p.m., Monday through Friday.

Motorists who routinely use the 10 mile section between the two cities are advised to avoid peak traffic hours or, whenever possible, to use alternate routes.

A series of projects involving interchange reconstruction, freeway widening and construction of concrete median barriers are scheduled to continue throughout the summer and fall and resume again next spring until work is completed.

## Fishing License Fee Increased

The Senate approved a bill increasing the fishing license fee from \$3.50 to \$5 per year. Bill sponsors said the fee increase is needed to maintain and operate the fishing program in the state. They said Michigan presently has the lowest cost for a fishing license in the nation and even with the increase, Michigan would rank 20th in the nation in cost of licenses. The bill was approved on a 30-5 vote.

## PROPERTY TAX SALE SYSTEM REVAMPED

The House passed and sent to the Senate legislation revamping the state's property tax sale system in a way designed to increase protections of the property owners. The vote was 98-3 and I voted for the bill. This year's tax sale has already been delayed to October from the usual May date in anticipation of this bill, and HB 4303 delays the sale further until March.

The tax sale is the procedure by which local units as a last resort auction property to collect delinquent taxes, interest and other charges.

The bill is designed to improve the notification process of the sale to the property owners and to eliminate the profit motive of tax sale buyers to curb present abuses.

The new procedure permits the owner to redeem the property within 30 days of the sale by matching the highest bid. If the owner fails to do that, he or she loses legal interest in the land, but does get 90 percent of the amount the bid exceeds taxes, interest and other required government costs.

The measure increases the interest rate on unpaid taxes to 3/4 of one percent from 1/2 of one percent to discourage deliberate failure to pay.

## NO LAWYER'S FEE SCHEDULE IN MICHIGAN TO ABOLISH, REPORTS STATE BAR PRESIDENT

The State Bar of Michigan abandoned in 1972 the use of any advisory schedule of fees for services of its member-attorneys, and no fee schedule has been in use since that year, reports Stephen C. Brandorfer, president of the State Bar of Michigan.

A U.S. Supreme Court decision which in effect prohibits the use of a fee schedule will have no effect in Michigan, since lawyers had done away with even an "ad-

visory" schedule some three years ago, Brandorfer said.

"The original purpose of the advisory schedule was to help the recent law graduate to organize the business side of his office in a sensible manner, and to provide guidance to the public in evaluating the fees they were being charged. At no time was the advisory schedule in Michigan in any sense binding and no lawyer was ever investigated, much less disciplined, for not following it. The schedule, however, was misinterpreted by many as an attempt to fix prices so we abolished it in 1972," he concluded.

# Agriculture in Action

Michigan Farm Bureau

When are groceries groceries? And when aren't they? This is a practical question for the breadwinner when he pays his bills at the end of the month. It is also a practical question out on the farm because it has to do with what the consumer thinks of his grocery bill and the price of three meals a day.

It used to be that the grocery store sold groceries; the hardware store sold hardware and the gas station sold things for the car. With that kind of a marketing arrangement it was easy to classify items in the account book, and the grocery bill was the exact figure on how much it took to keep the hunger pangs down to a tolerable level.

But changes in merchandising have fouled up the home accounts, ruined our definitions, and distorted the cost of eating. Everything we buy at the "grocery" store comes under the classification for purposes of home accounting—including nails, oil, tobacco, bolts, glue, paint, garden hoses, nylon hoses and radiator hoses. Two things could be happening actually—folks may be buying these things and eating them and thus correctly calling them groceries but using them for other purposes. (Perhaps the mystery will clear up when someone comes out with a report on the nutritional value of nails, paint, oil, bolts, etc.)

But one never knows what folks are eating. For example, 90 percent of all cat and dog food sold comes from the same place that other (?) food is sold. Consumers buy half of their hair spray,

aspirin and toothpaste at the super market. More money is spent for dog food than for commercial baby food. And more "grocery" money is used to buy beer, cigarettes and pet foods than beef.

Creating a definition for groceries is a practical challenge for food producers and a problem in public relations. The consumer figures the high cost of living begins with food—he doesn't know that the cost of food has been going down in relation to his total income.

Maybe the answer is to change the name of grocery stores to "Home Supply Stores," then we wouldn't give the impression to folks who are unacquainted with our marketing system that we are eating dog food, garden hoses, hammer handles and the like.

## P.A. 116 FARMLAND AND OPEN SPACE PRESERVATION MEETING

The Farmland and Open Space Preservation Public Act 116 has caused considerable interest here in Washtenaw County. Several meetings have been held, however, with the sign up deadline drawing near for the 1975 tax period it was felt that additional meetings should be provided.

Monday night, August 4 at 8:00 p.m. at the Saline Township Hall on Braun Road, will be the first meeting. This will be followed by meetings in the Chelsea-Dexter area (Wednesday, August 6 at 8:00 p.m. at the Ann Arbor Township Hall on Pontiac Trail). These meetings are open to all interested persons.

Mr. Roger Dobarty, Communications Program Assistant and Mr. Jack Smiley, Public Affairs Program Assistant from Wayne County will assist with the program. They have thoroughly researched the subject, consulted with Dr. Alvin House at Michigan State University and Dennis Hall with the Department of Natural Resources. They have put together a slide-tape presentation along with plenty of time for discussion.

Additional information on the meeting can be obtained by calling the Cooperative Extension Service at 994-2457, ask for Bill Ames.

## WHAT'S COOKING IN MICHIGAN

It's blueberry picking time, and there's a good supply of the Michigan-grown fruit in prospect for this season. Select plump, firm berries, dark blue in color with a silvery bloom. Marketing officials of the Michigan Department of Agriculture say this bloom is a natural, protective wax coating and your best indication of quality.

Blueberries are the original convenience food. You don't have to peel, pit or hull them. Simply wash and enjoy. Whether you pick your own at local blueberry farms or buy them fresh at area markets, you'll want to get enough for your freezer, maybe some homemade jam and plenty for eating fresh and cooking.

Blueberries are perishable and bruise easily so buy only in amounts you plan to use within a few days when doing your weekly shopping. The season lasts from late July to early September but generally reaches its peak by mid-August. This is the best time to buy in quantity for home canning and freezing. Quality is usually excellent and prices lowest.

To freeze berries the quick way, wash, pack into freezer containers leaving about 1/2 inch head space, seal and freeze. Or you may want to use the syrup or sugar pack methods for preserving fresh fruits. For best results in both home canning and freezing follow reliable guides or contact your local home extension agent.

Michigan is first among the states in blueberry production. The fruit was brought to our state in the late 1920's by a local fruit horticulturist. Since then, the industry has grown steadily, developing new and better varieties and improved cultural practices, and taking advantage of technological advances in production and harvesting techniques.

In the mid-60's Michigan's blueberry production received a boost with the invention of the mechanical harvester. Also growers began increased usage of rental bee colonies for pollination resulting in a seven greater abundance of the tender juicy fruit.

## "4-H-'76... Spirit of Tomorrow"

America's bicentennial period, which begins this year and extends into the 1980's, is an appropriate point in time to pause and reflect on our history, assess where we stand today, and look ahead to new horizons.

More than 7 million young people across the country are doing just that during National 4-H Week, Oct. 5-11, and throughout the coming year. In special observances keyed to the theme, "4-H-'76... Spirit of Tomorrow," they'll be taking a close look at 4-H past, present and future.

4-H'ers have a proud heritage. The movement that became 4-H began around the turn of the century and grew out of a need to make education more practical and interesting to farm youth. The first 4-H projects—corn clubs for boys and canning clubs for girls—offered enriching, real-life learning experiences not provided by rural schools of the era.

Projects have changed through the years as the faces of 4-H'ers have changed. But the basic "learn by doing" concept still holds and has wide appeal. Today's 4-H members take part in activities that range from animal care to environmental improvement to photography and bicycle care and safety. Although 4-H continues to serve the needs of rural youth, it has also proved viable in the cities: 17 per cent of 4-H members live in large urban and suburban areas. And 4-H'ers come from all racial, ethnic and socio-economic backgrounds.

By encouraging high standards and the setting of meaningful goals, 4-H lays a broad and firm base for a lifetime of personal growth. As today's youth grow to adulthood, they will face a world unlike the one most of us grew up in. There will be more people and fewer resources. And there will be vital issues in government that call for wise decision-making.

In challenging young people to Make the Best Better, the head-heart-hands-health program prepares them to assume the responsibilities of adulthood in a changing society. We salute 4-H members, their parents, volunteer leaders, and the Cooperative Extension Service professionals who conduct the 4-H program. Their efforts, combined with the endorsement and support of private business, make 4-H a dynamic organization that promises to be as responsive to the needs of youth tomorrow as it is today.

## How About Baled Hay? Winners of Boosters Tournament

By C. Chapin

The rain is right on time! The steady drizzle this summer has made us wonder if we were going to get enough rain but it seems to be getting what we need this week. How quickly the days go by -- already there is talk of getting the children ready for school.

Last week we attended a picnic at Carr Park and fell to thinking on the state of the world, the village, and suchlike profound ponderings. Riots in the city, labor leader vanishes, the economy bumps along, and behold here on the green and rolling parkway, four separate parties are taking place, the children on the swings, sack races, badminton games, softball on the diamond, potato salad and paper plates. Suddenly a lovely picture formed of thousands of small towns, with small parks and all of the people across the country eating picnic lunches and laughing together. I think perhaps I'm going to stop reading the front page of the paper and remember at least once a day how lucky we are to live here.

Some little pressure has been exercised to coax me to reveal the source of the special recipes and ideas for food that I've mentioned from time to time. Having obtained permission to expose the truth which shall be no surprise to anyone in the Village, Russ and Lucille Widmayer, the finest neighbors it has ever been my privilege to live near, and to eat with. Nearly everyone is fond of sauerkraut.

## Manchester Fair August 19-23

Manchester Fair dates are coming up August 19-23. The Legion Auxiliary members are requested to have their "Flea Market" items donated for our booth at the fair, delivered to Edna Knauas, 315 Riverside Drive by the week of August 11 - or if you wish call 428-7471 for a pick-up - anytime. We need your white elephants or most anything saleable.

but here is a way of using cabbage which makes a good and unique relish. You need a crock--probably two or three gallon size. Baled Hay we call it.

1 quart green tomatoes sliced and put in salt water over night, just a sprinkle of salt.

5 onions sliced

3 quarts cabbage sliced

2 red peppers sliced

2 green peppers sliced

Not quite one quart of vinegar

2 cups sugar

1 tablespoon salt

1 teaspoon mustard seed

1 teaspoon celery seed

3/4 teaspoon turmeric

Mix together -- do not cook -- put in crock or pack in jars and seal. After a couple of weeks, it's a slightly sour salad which is great with pork.

The weekend before last was a hot, humid, dry three days that paired off ten Manchester slowpitch squads. The 10 teams involved in this double elimination tournament sponsored by the boosters were Merchants, Legion, Black Sheep, and Double A representing the upper league with Pioneers, Foxy's, Village Tap, Spuds, Union Savings Bank and Dairy Queen from the lower league. Double elimination means you have to lose 2 games before you are out.

The first game scheduled was Friday at 6 p.m. between Pioneers and Foxy's (the first and second place teams in the lower league). Pioneers wasted no time putting points on the board as they collected 7 runs before Foxy's got to bat. The Pioneers garnered 7 singles in this first inning and a home run by Don Walters. It's said that when your offense is working so is your defense. Well, I guess it's true for the pioneer Corns held Foxy's to only one run until they rallied for 3 in the seventh, but it was too late. Finally Corns scored 5 runs in the second inning to

contest as the Merchants sailed to a win over the Union Savings Bank 8 - 2.

Again the Pioneers, as this time they met the Spuds. The Corns defense shut off the Spuds offense as they blanked them for six innings with the Spuds getting 2 in the 7th but the Pioneers had 7. At 9:45 p.m. was a very interesting contest pitting Double A against the red hot Village Tap. Double A jumped to an early lead as they crossed home plate 5 times in the top of the first inning. The Tap got their bats booming in the fifth to take the lead 10-8 thru a home run by Phil Nickerson. Double A recaptured the lead 11-10 as the seventh inning started. Phil lead off for the Tap and tied the score with a towering blast over the left field fence. Following this tap scored 4 more to total 15 as Double A went down 1-2-3 to finish with 11.

Saturday opened up with an upset as Dairy Queen gathered runs in their fifth and sixth inning to help shut the door on the Black Sheep Tavern 11 to 4. The Legion played good defense and scored 5 runs in the second inning to
