This holiday season, as for many Christmases past, more than 25 million poinsettia plants will decorate American homes. Be sure yours has the right amount of light and water. An easy rule of thumb is to place the plant in a room with enough natural light to permit a person with reasonable evasight to read fine print Avoid direct sunlight. As for water, poinsettias appreciate quite a bit. When the soil feels dry to the touch, give the plant a drink, but remove excess water after-wards.

Summary of Significant Tax Law Changes For '77

Some people like changes; others prefer. things the way they are. But whatever side of the fence you're on, one thing is certain: When you fill out your 1977 tax return, you won't be able to avoid the many changes in the tax law that have come about through recent legislation.

You have probably heard the standard deduction has been replaced by a zero pracket amount which is a flat \$2,200 for singles and \$3,200 for marrieds filing jointly. And there has been quite a bit of publicity about the new tax tables with the zero bracket amount, personal exemptions, and general tax credit built right in.

These changes affect most taxpayers, but don't require you to plan ahead. Because some of the new provisions do. however, demand pre-planning, it makes sense to start gathering your records together and examining the tax consequences of some of your actions.

For instance, if you own a capital asset, such as stock, bonds or real property aware that in order to qualify for long term capital gain or loss treatment, you must have owned that asset for more than nine months? The holding period in prior years was more than six months.

Do you also know the amount of a capital loss you can use to offset your taxable income has increased from \$1,000

Both of these changes can make a significant difference in your tax bill for 1977. Suppose, for example, that you never heard of the new nine month holding period, and you dispose of a capital asset after

in 1977, you will find several changes in the tax law. The distance requirement of 50 miles has been changed to 35 miles.

In, addition, the maximum deduction for pre-move househunting and temporary living expenses has gone up from \$1.000 to \$1.500 and the deduction for expenses related to buying, selling, or renting a home increased by \$500, it is now \$3,000.

Older Americans who sell their homes in 1977 will be glad to learn that there has been a sizable change in the tax break available to them. Previously, anyone 65 or over who sold his or her home did not have to pay any tax on the gain if the adjusted sales price of the house

The exclusion amount has now beet increased so that you pay no tax on the gain from the sale if the adjusted sales price is \$35,000 or less. If the adjusted sales price is over \$35,000, the tax break

Remember, the adjusted sales price of your home is the amount you receive after paying selling commissions and certain allowable fixing-up expenses, such as painting part of the interior of your home.

Here's something else new for 1977! If you are a worker under the age of .70 1/2 and do not participage in any year, you may for the first time, include your non-working spouse in your In-

The advantage of an IRA. of course. is that contributions are not taxed until they are withdrawn at which time the individual would normally be in a lower tax bracket.

Other changes that could mean a difference in your tax liability are in the areas of alimony, child support, and child care

Allmony, previously an itemized deduction, is now an adjustment to income, which means that anyone can claim on his or her tax return the amount of alimony

If you make child support payments to former spouse, you may have to pay children as dependents on your tax return. In prior years, if the tax exemptions were not allocated in the divorce decree, and you were the noneustodial parent, you had to contribute \$1,200 or more for the support of one or more children in order to take the dependency exemptions. That amount has now increased to \$1,200

Expenses you pay for work-related child care may now be claimed as a tax credit. The credit is 20 percent of the amount you pay during the year for child care. The maximum amount of the credit allowed is \$400 for one child and \$800 for two or more children.

It's obvious there are changes in store

A trip to the country to find a special tree to grace the family's living room at Christmas is an age-old custom that is heing revived each year at Michigan's 78 choose-and-cut Christmas tree farms, according to Automobile Club of Michigan.

"Even a latter-day Scrooge can't help out get in the holiday spirit after a wagon ride through a snowy field of evergreens with the entire family," stated Joseph Ratke, Auto Club touring manager.

Each year, more farms than ever go out of their way to make treecutting trips special events by offering pony and wagon rides, yule log fires, train rides, plus ree treats and weekend visits by Santa. Auto Club said.

At many of the farms listed on Auto club's guide, hot apple cider and homenade donuts are sold and there are farm mimals children can feed and pet.

"One owner even dispenses free peach randy recipes, while another sells handmade toys from the Virginia mountains."
