UNCIRCULATED COIN SETS

Mint Director, Stella B. Hackel, announced today that orders for the 1978 Uncirculated Coin Sets will be accepted beginning September 1, 1978, at the San Francisco Old Mint.

The 1978 Uncirculated Coin Sets will be sold for \$7.00 each with a limit of five sets per customer. "We are pleased that the selling price has not increased," Mrs. Hackel said.

The 1978 Uncirculated Coin Sets contain twelve coins—a dollar, half dollar, quarter, nickel, dime, and cent from the Denver Mint and the same denominations from the Philadelphia Mint. The six coins from the Denver Mint have the "D" mint mark and are sealed in red-striped polyester film. The six coins from the Philadelphia Mint, which have no mint mark, are sealed in blue-striped polyester film. Both are inserted in a presentation envelope.

Since limited production and mailing capability make it necessary to limit the ordering period for these sets, Mrs. Hackel urged individuals interested in obtaining 1978 Uncirculated Coin Sets to order as soon as possible. Orders will be accepted for approximately two months, and the sets will be mailed by the end of December. The Mint must reserve the right to cancel any orders which exceed production capacity.

The Director noted that those individuals already on the Mint mailing list would soon receive their order cards. Individuals not on the mailing list may order sets by writing to the Bureau of the Mint in San Francisco. They should indicate the number of sets they wish to order (limit of five sets per individual), their name, address and enclose a check or money order payable to the Bureau of the Mint. Orders should be mailed to: Bureau of the Mint, 55 Mint Street, San Francisco, CA 94175.

IN RETROSPECT

When his report was made out and a copy was sent to the local post office it contained a glowing account of the efficient and courteous manner in which the carrier conducted himself.

But the inspector asked me what this rejuvinating liquid was made of and we informed him that apple juice and citrus fruit juice with sugar and other flavoring materials mixed by and carefully tested

by those German farmers was a sure cure for most any ailment when used in moderation.

This he agreed to but said the doses taken should be carefully measured and also that he could really find no reason why a carrier shouldn't be nice to the customers and that it was or should be acceptable procedure especially under such circumstances.

Your Daily Working 5 1/4% Account

Here's what it can do for you...
With all the recent emphasis on high interest rates for investment certificates, you may be overlooking a very important family financial tool...the 5 1/4% per annum passbook savings account.

This is your "daily working" savings account. It earns daily interest - from day of deposit to day of withdrawal. The money is always available, so you use this account to accumulate dollars, take them out when you need to pay a medical bill, a repair bill, taxes, a trip. It's about as convenient as a wallet, but your money is earning a good return every day it is on deposit and it is safely insured with an agency of the federal government.

A bonus feature is that by maintaining a balance of \$1000 or more in savings you are entitled to all of the travelers checks and money orders you can use. No charge.

So invest all the money you can in our top interest paying certificate accounts for long term requirements, but for day to day needs and emergencies keep a healthy balance in a 5 1/4% daily working account where it will be immediately available and earn a good return.

Community Education

All Manchester area residents should have received a copy of the Fall Community Education schedule of classes and programs. If not, you should be able to get a copy from most Manchester businesses or stop by the Community Education Office. Just a reminder, when registering for a class, please pick and alternate class in case your first choice does not have sufficient enrollment to start this semester. If you have any questions about the programs call the Community Education Office at 428-7804. Because of space limitations in the Fall Schedule we were unable to get the description of last year's successful S.T.E.P. program included.

Another session of the S.T.E.P. program will be starting on Tuesday, September 19 and Friday, September 22. The program is Systematic Training for Effective Parenting (STEP). The STEP program is widely recognized and accepted for creating an effective, parent-child relationship that can grow and grow in an atmosphere of love, understanding, cooperation, and mutual respect. Parents and grandparents alike often refer to "the good old days" when life seemed more simple and everyone's role was more clearly defined. There was an atmosphere of peace and order in the era of "Father knows best" and "do what your Mother says." But times have changed, and people have changed. Relationships have changed

between women and men, employees and employers, children and adults. Concerned and sometimes bewildered by the effects which these and other social changes have had on family relationships, today's parents have an increasing interest in finding more effective ways of relating to their children. Parents can admit that they, too, have the right to make mistakes and learn from them; that they, too, have rights as well as responsibilities. Effective parents are kind but firm. They provide opportunities for children to make decisions, within limits, and to be accountable for these decisions. They freely give encouragement. They show confidence in their children's ability to handle difficult tasks without parental "supervision", and they help their children to develop the courage to be imperfect in a society that holds unrealistic expectations of its members. Step participants are helped toward realizing the goal parents want most: to raise responsible children who will grow into responsible men and women, capable of living meaningful, happy adult lives.

Learning more effective ways of relating to your children takes courage, practice, and patience...the courage to be open to, and accept, new ideas and attitudes, in our modern society, we have come to expect "instant" results. "Instant" success, "instant" everything! But anything of value takes time...the STEP program usually takes nine weekly sessions to complete. Take the very first step now. Begin...

- STEP 1. Understanding your child's behavior and misbehavior.
STEP 2. Understanding more about your child's emotions and yourself as a parent; recognizing the differences between "good" parents and responsible parents.
STEP 3. Learning to use encouragement.
STEP 4. Improving communication by becoming an effective listener.
STEP 5. Communicating your ideas and feeling to children; helping your children explore alternative ways of behaving.
STEP 6. Replacing reward-and-punishment with learning-from-consequences.
STEP 7. Applying natural and logical consequences to the challenges of child-training; acting positively, rather than reacting negatively.
STEP 8. Establishing family meetings that encourage democratic family relationships.
STEP 9. Developing confidence and growing as a person, as well as becoming a more effective parent.

The Tuesday, September 19 meeting will be held at the Middle School from 7-9:00 p.m. under the direction of Barb Lund and Anne Shain. The Friday, September 22 session will start at 9:15-11:00 a.m. at the Middle School with Barb Lund and Diane Friese. The cost of the program is \$5 per person or couple which is used to pay for the handbook used in the program. To register for either date please call Philip Mains at the Community Education Office at 428-7804. Each program will be limited to approximately fifteen participants, so register early. Registration for all programs and activities will be held Monday, August 28 thru Friday, September 1 and Tuesday, September 5 thru Friday, September 8 from 10:00 a.m. to 5:00 p.m. You may call 428-7804 to register or stop by the Community Education Office located in the high school during the time indicated.

Freeze Summer For Winter

Freezing is the simplest and easiest way to preserve food. It's also an economical way to take advantage of summer's seasonal produce and food specials for winter use. And the convenient Seal-A-Meal food packaging appliance is the best way to lock in flavor, color and nutritive value of frozen foods. It seals foods in slim, airtight food pouches that perform double duty in the kitchen—going from freezer, to reheating in boiling water (or microwave) to serving in minutes.

For example, let the Seal-A-Meal food packager help you harvest summer's bounty of fresh tomatoes. Make up batches of this zesty sauce to freeze in food pouches and to use in a variety of ways. One way is to package and seal pre-cooked spaghetti in a pouch too. Then the sauce and pasta are ready to enjoy as an instant dinner any time. Or use this fresh tomato sauce to top English muffin mini-pizzas, garnish with your favorite add-ons and seal in airtight food pouches. These summer-fresh treats will be a family hit all winter long!

FROZEN SPAGHETTI ALREADY

- 1/2 cup chopped onion
3 cloves garlic, crushed
1 pound lean ground beef
3 pounds tomatoes, peeled and cut in chunks
1/2 cup chopped green pepper
1 cup chopped parsley
1 teaspoon salt
1 teaspoon oregano
1 teaspoon sugar
1/2 teaspoon each paprika and rosemary
1/2 teaspoon pepper
1 pound spaghetti, cooked and drained
Parmesan cheese

In large Dutch oven, brown ground beef with onion and garlic. Add tomatoes, green pepper, parsley and seasonings. Bring to boil; simmer, uncovered, 40 to 45 minutes, stirring occasionally. Cool 10 to 15 minutes. In 10-inch Seal-A-Meal boilable cooking pouch material, seal 1/2 of the spaghetti, then 1 1/2 cups sauce with Seal-A-Meal appliance. (Spaghetti and sauce should be sealed in separate compartments in same pouch bag.) Repeat with remaining spaghetti and sauce; freeze. To serve: heat frozen pouch in boiling water 10 minutes, following procedure in instruction book. Begin timing when water returns to boil after adding pouch. Serve sauce over spaghetti; sprinkle with Parmesan cheese. Makes 8 servings.

To Heat in Microwave: Place frozen pouch on paper toweling or plate in center of microwave oven. Cook on full power 6 minutes. Turn over; pierce pouches to make steam vent; cook 3 minutes longer. Let stand 1 to 2 minutes before serving.

'Oh Boy, Homemade Ice Cream!'

Just listen to the "oohs" and "aahs" and "oh hurry" when the decision is made that the ice cream is ready, and the dasher is pulled free of the freezer container! Luscious, and deserving of a finger dipped in for a quick tasting, homemade ice cream evokes only the happiest of feelings. And when that ice cream is flavored and blushed with bananas and plump strawberries, so much the better. The wonderfully smooth consistency comes from the cream of canned milk - evaporated milk, the all important ingredient that's always ready for an at-home ice cream making party.

Strawberry-Banana Ice Cream

- 5 eggs
2 cups sugar
3 tall cans (5 cups) Pet Evaporated Milk
1 quart strawberries, cleaned and sliced
3 bananas, mashed (about 1 cup mashed)
1. Beat eggs well. Add sugar and beat until light yellow in color.
2. Stir in evaporated milk.
3. Mash together strawberries and bananas. Mix into evaporated milk mixture.
4. Pour into ice cream freezer container and churn and freeze according to manufacturer's directions. Makes about 4 quarts.

Almonds Add Crunch To Casseroles

Busy days are the time for easy make-ahead meals. Vegetable Casserole Almondine can be made the night before and heated just before serving time. With the addition of French bread or dinner rolls, it becomes a complete and well-balanced meal. The casserole is an economical dish that will satisfy the heartiest appetite. Eggplant and zucchini, both in season right now, are two of the principle ingredients. Protein is provided by the almonds, cheese and bacon.

Toasted almonds add a special crispness and delightful crunch to this casserole. For an extra flavor and protein boost, add one of the many convenient forms of almonds to any casserole or meatloaf recipe.

VEGETABLE CASSEROLE ALMONDINE

- | | |
|---|--|
| 1 pound sliced bacon | 1 teaspoon minced garlic |
| 1 pound zucchini, sliced in 1/2-inch rounds | 1 teaspoon salt |
| 1 pound eggplant, cubed | 1/2 teaspoon pepper |

Bake uncovered in 400 degree oven about 15 minutes or until hot in center. To serve later, cover and refrigerate, to heat, uncover and bake in 400 degree oven about 30 minutes or until hot in center. Makes 4 to 6 servings.

Peach Time Is Here

Fresh peaches and pudding are an irresistible combination when it comes to summer desserts. Almond Custard Cream is deliciously different and a fitting welcome to the peach season. It's made with vanilla flavor Jello-O pudding and pie filling — the cooked version — enriched with egg yolks and discreetly flavored with almond extract. Topped with prepared Dream Whip whipped topping and succulent slices of fresh peaches, it's a dessert to savor on a sultry day.

- | | |
|---|--------------------------------|
| 1 package (4-serving size) vanilla flavor pudding and pie filling | 1/4 teaspoon almond extract |
| 2 cups milk | 2 egg whites, stiffly beaten |
| 2 egg yolks | Sweetened sliced fresh peaches |

Combine pudding mix and 1/4 cup of the milk in saucepan; blend in egg yolks. Add remaining milk. Cook and stir over medium heat until mixture comes to a full boil. Remove from heat. Add extract; then fold in beaten egg whites. Cool, stirring occasionally. Spoon into individual dessert glasses; top with peaches and garnish with prepared whipped topping, if desired. Makes 3-1/3 cups or 6 servings.

MICHIGAN FARM BUREAU EDITORIAL

THE NITRITE CONTROVERSY

Cyclamates, saccharin and now, maybe, nitrites.....

The first two were an inconvenience to a lot of people, but if the government decides to completely ban nitrites, it will be more than an inconvenience. It will shake up the entire meat industry, and could see the rise in one of the most deadly food poisoning agents around... botulism.

Nitrites are used to cure bacon, luncheon meats, hot dogs, etc. A few months ago, one of the famous government reports came out that said that nitrites combined with heat could convert to nitrosamines, which have been shown to be carcinogenic to some laboratory animals.

In recent weeks, another report has been issued saying that the latest cancer evidence against the meat preservative

nitrite is so damaging that government food experts have already drawn up plans to ban it completely.

As with cyclamates and saccharin, one has to look at how much meat you would have to eat in order to get the same amount of nitrite that caused cancer in laboratory animals.

Virginia Congressman William Wampler and North Carolina Congressman James Martin have already introduced legislation that would prohibit the ban on nitrites by the government until the government completes its study on saccharin.

Rep. Martin has a PhD in chemistry, and is a former professor of chemistry at Davidson College. He says that he and Rep. Wampler want to make sure that the government is on "solid and undisputed scientific ground" before it takes "precipitous action to ban nitrites."

The former chemistry teacher also passed along the information that the rats in the test were fed 1,500 times as much nitrite as humans ordinarily digest from cured meats. A human would have to eat 586 pounds of cured meat a day to reach that same level of intake.

That's a bit more than most of us could handle!

Donald A. Roth, Community Relations Manager, Ann Arbor, offers you this telephone tip:

Call us before you move... you might save unnecessary expense.

If you're planning to move to another home, now's the time to think about how many phones you might need in your new home and what kind of changes you might need in your phone service. A little planning can help you avoid unnecessary installation charges.

Call your Michigan Bell Service Representative. Allow enough time before moving for a full explanation of service and equipment options and time to order the phone service you need when you need it. Remember, once your new service is installed, extra visits by your installer mean extra expenses for you, expenses we'd rather you didn't have to pay.

Michigan Bell... people who enjoy serving people.
