RANSOMES SIMS & JEFFERIES LTD., ORWELL WORKS, IPSWICH.

Why your
greens will
improve
with
NITROFORM

NITROFORM is the first successful slow-release concentrated nitrogenous fertilizer, requiring in many circumstances only one application per season, lasting many times longer than conventional fertilizers, and not only feeding for healthy turf, but conditioning the soil for greater root growth.

**HERE ARE THE ADVANTAGES ALREADY FOUND BY
BRITISH CLUBS AFTER ONE YEARS TRIAL**

1. High Nitrogen content (38%) released slowly, steadily, by soil bacterial action—one dressing per season can suffice.
2. Easy to handle and spread by hand, spreader or spray.
3. Non-burning—even 3 times the recommended rates is safe.
4. Non-leaching—it is not directly soluble in water.
5. Completely odourless—easily mixed with phosphates and/or potash.

Enquiries for samples, prices, advisory service and soil tests to

LEATHER'S CHEMICAL CO. LTD.

100, Canal Road, Bradford 2. Tel: Bradford 23323

NITROFORM is the registered trade mark of Hercules Powder Co. Ltd.

No. 220 New Series

JULY 1963

"Let's face it—enough has already been written about the state of the putting greens at Royal Birkdale. It's easy for a reporter to buttonhole a chap who has just three- and four-putted his way round a golf course in 92 and make headlines of his not unnatural vehemence. It does less than justice, however, to the tremendous efforts of the head greenkeeper and his staff to make the course playable at all after the depredations of the severest freeze-up in living memory."

by the Editor

The Committee of the Royal Lytham St. Anne's Golf Club have very kindly placed a small rest tent at the disposal of greenkeepers at the Open Championship on 8th—12th July. Members will also be admitted to the course without charge on production of their membership card. The Association is very grateful for these thoughtful and courteous arrangements, when so many others, more pressing, must be occupying the thoughts of the club.

* * *

President Kennedy did not find time to play round the Wannsee Golf Course when he visited West Berlin at the end of last month. The U.S. forces have 18 holes of the original 27 and the German Club has 9 holes and a separate clubhouse.

Herr Rosshoff, the Secretary, who has been with the club for thirty-five years, is shortly retiring. He well remembers the Alliss family when they were there; Peter Alliss was, in fact, born in a house adjoining the course.

The German course looks to be in better shape than the American one where a couple of lorry loads of defaulters are likely to be turned loose to remove weeds or rake bunkers.

* * *

More roads are eating into golf courses. An enquiry at Lowestoft a fortnight ago confirmed the removal of parts of the 8th and 9th holes. Dartford, in Kent, will lose a large slice out of five holes. Ewewash Valley will soon be rebuilt with six new holes to make way for the M1 extension after it has carved through the Longcliffe Golf Course at Loughborough. Tankersley Park, Sheffield, is another one which will suffer soon—Mill Hill another.

* * *

Members will be sorry to hear that Lou Lowcock, Royal Liverpool, is in Hoylake Cottage Hospital for a few weeks. We saw him the other night, sitting up in bed with one eye on the weather and pencil and paper at the ready to send off a few instructions.

Ernest Folkes, Flackwell Heath, is pegging out four new greens, two of them in new land, which will enable some of the hill-climbs to be cut out. Ernest expects to take on some extra help and an excavator and get half the work done this winter at least.

COURSES IN PLAY I

"It was a staggering example of how a single hole can suddenly snarl round, show its teeth and bite chunks out of the uncertain. . ."

John Stobbs talks about Turnberry in the first of a new series of six articles describing courses with big events.

John Stobbs

THE Walker Cup match at Turnberry goes down in the records not just as the biggest and sharpest disappointment we have yet suffered but also as the occasion upon which for the first time since the war the British Isles side did completely find its feet and show itself capable of matching the Americans, player for player, man for man. The failure on the Saturday was one of psychology: the last horrid uprising of the old underdog complex, which had already been factually exorcised by the home side's triumph in the singles on Friday afternoon. They collapsed on the second day at the mere imagined sight of the ghost of their old fallibility. It was absurd; it was out-of-character; and it will probably never happen to them again.

Examination

The match will also be remembered, though, for how perfectly the course suited the occasion: and how telling proved its examination of top amateurs' weaknesses and strengths. It lies in sandy links-land by the sea: going out through an area of true dune-land stretching in from a great range of steep beach sandhills, rises to a sandy plateau on top of a rock formation, interspersed with beaches, and then comes home on the gentler more inland half of the dune country. The examination progresses in strength from hole to hole. For the 1st, 2nd and 3rd, the player meets three straightforward holes, two of them long ones; the short 4th by the sea is testing to find, but bowl-shaped once the ball hits the green. Then the test toughens. Five is a long dog leg between the dunes; 6 a huge short hole, a full drive from a high tee to a plateau green perched up by the sea-range; 7 and 8

are two good-length holes rising through valleys between dunes, to the 9th: where from a tee out at sea, you drive over a rocky beach to a high fairway on the crest of the hill, torn at by winds, and with the green guarded by a steep mound on one side. Another big drive with the beach yawning on the left, and a maze of sand before the green; a short hole along the top of the rocks by the sea; then inland to a series of holes which look less spectacular but call for firm, bold second shots to get home. The 15th is a long short hole along the edge of a dune-plateau, across which the wind screams again. The last two are good, straightforward 5, 4, finishing holes. But before them comes the 16th; and it was at the 16th that the Walker Cup match was settled.

Challenge

In its place in the round, it is an almost perfect hole, both in concept and lay-out. It comes after two holes with greens reachable only by long shots, and close-set with nasty bunkers; it is followed by a long slog of a 5 through one of Turnberry's dune-land valleys. So . . . the 16th is a perfectly open, simple, slightly downhill drive to a level fairway, hazarded only by a small pot bunker on the left and a little high mound in the rough on the right. The challenge of the hole is reserved for the second shot. This can be anything from a medium iron to a full brassie, depending on the wind. The fairway continues to some 20 yards from the small green, which perches, up at the back, on a minor plateau, but is slightly bowl shaped to hold a long shot.

The actual stroke to it, in fact, could hardly be more straightforward so far as mechanics and result count. But before it there's a strong hazard to the player's mind and eye: a deep, precipitous, grassy gully with a little stream at the bottom of it. It cannot in any way whatsoever affect a properly-hit shot to the green, since it all lies well below the level of the green and the front edge of the green is absolutely unguarded and simple—just a line where the grass is mown on the top of the up-slope from the gully.

It is just the sort of hole to catch a man under nervous pressure in his match. And it did. Down into this gully on the final day went: in the foursomes: Bonallack (under clubbing), Lunt (under clubbing); and again in the singles: Bonallack (wood hit thin), and Lunt (full wood, short by inches). In the foursomes, too, after a bad drive by Green, Saddler had to play short; and in the singles Saddler, going all out for length from the tee, topped his drive. These six strokes were alone enough to settle the whole match; and they came to men who knew the hole backwards. They did not happen to the Americans, who never once fell for the hole's hazard.

* * *

What had happened was that since the Friday the wind veered round; and where the 16th had been comfortably in reach of a mid-iron on the Friday, it lengthened itself to two full woods for the Saturday. It was a staggering example of how a single hole can suddenly snarl round, show its teeth, and bite chunks out of the uncertain before they quite know what's hit them. It is certainly a hole which could well be taken as a model for any club owning a stream in a gully and considering rejigging parts of the course.

Uncluttered

What makes it great, I think, is the simplicity of its challenge, and the absolutely uncluttered way the drive lies open and passive, slightly downhill, to the long shot needed from the tee; and then the green sits perched in its eyrie, lying open in front and at the right to the rim of the gully. The only sand bunker on the hole is the little pot at the left of the fairway. Except when the wind is really strong against, all the 16th says to the player is: "Hit your drive anywhere you like down the centre or right of the fairway; then choose your club; then hit your second straight and firm, with enough height to pitch the green".

That's all. But that is one of the purest challenges in golf.

WATER AND TURF DISEASES

By Holman M. Griffin

*Agronomist, U.S.G.A. Green Section,
Southwestern Office.*

*Reprinted by courtesy of the U.S.G.A.
Golf Journal (February, 1963).*

PLANT diseases have been a problem to man since the dawn of history, and there has been a constant effort to find methods of alleviating or preventing them. Blight and mildew were known in biblical times, and Aristotle described wheat rust in 350 B.C. During these early times the causes of disease were unknown and accordingly many superstitious explanations were offered. At least one of the explanations was that the diseases were caused by demons or angry gods inflicting punishment on the people. In order to frighten away the demons or appease the gods, complex rituals were performed or prayers were offered. This was somewhat like the witch doctor approach some backward nations still use for curing human disease, and it constitutes the first known attempts at plant disease control.

The following directions for plant disease control date back to 1790 and are a good example of some of the earlier experimentations in this field. Take one bushel of fresh cow dung, one-half bushel lime rubbish from old buildings, one-half bushel wood ashes, one-sixteenth bushel pit or river sand. The last three are to be sifted fine before they are mixed. Then work them together with a spade and afterwards with a wooden beater until the stuff is very smooth like fine plaster used on ceilings of rooms. The mixture was made to the proper consistency with soapsuds or wine; and after its application to the plant, it was dusted over with dry powder of wood ashes mixed with the sixth part of the same quantity of burnt bones.

Experiments with mixtures such as these were the forerunners of the successful experimentation that has resulted in

modern controls for plant diseases. Extensive research has now given us chemical as well as cultural methods for combating turf diseases, but these principles and controls must be logically and systematically applied to be of value.

Since our discussion is primarily concerned with water's relationship to plant disease, I would like to define the word "disease" in such a way that it encompasses all detrimental effects of moisture to turf. This is using Webster's definition of disease rather loosely, but in many ways we may think of any condition which impairs health as being a disease.

For years the subject of altering the susceptibility of turfgrass to disease by manipulation of the water and fertility management programmes has interested pathologists and management specialists. Today, there are many opinions along these lines but few facts. There is certainly a great void in our knowledge of the relationship of water to plant disease and in most cases we are left to draw our own conclusions.

Water's Influence

Essentially, there are only three ways in which water can influence disease and affect turf. Our troubles come from either too much water, not enough water, or impurities in water. Again, this is treating our subject rather generally, but I believe we can give some specific examples which fall into each category.

First, we will consider overwatering as a major cause of unhealthy turf. This practice is found rather frequently on golf courses in spite of all that has been said and written about the subject.

Golfers sometimes get the idea that the more water that is applied to a green, the better it will hold a shot. This is neither good golf nor good green-keeping. What actually occurs with many soils is that they become harder with the addition of excess water. The combination of water and traffic on the greens causes the soil to puddle on the surface, and there is a lack of oxygen in the root zone for the grass. Under

these conditions the turf cover is lost, and the soil is further compacted by the lack of a cushion of turf above it; and it becomes increasingly difficult to hold a shot on the green.

Also, a soggy condition of the turf aids disease development. The fungi which cause disease need abundant moisture for their best growth; and when the soil is kept saturated, they develop readily to cause turf injury. Watering is too often a routine rather than an effort to supply the needs of the grass. By watering on schedule rather than according to need we invite trouble from many sources.

Other Sources

Irrigation is not the only source of too much water, however; and rainfall, high humidity, dew and guttational water are closely related to disease incidence.

Rainfall gathers as many as 5 million organisms per square yard on the way to earth, and the figure for snow is even higher. Disease organisms are carried so well by raindrops and run-off water that the activity of disease can actually

be closely correlated with annual rainfall in areas of similar climate. The higher the rainfall, the greater the disease activity.

Rain Often Aids Disease

Often the action of raindrops is the means by which certain spores are liberated. Rain in large drops or driven by wind breaks the disease spores from their stalks or from within an enclosed layer and sets them free.

Relative humidity acts in two ways. During periods of high relative humidity most disease organisms reproduce freely and are able to infect healthy plant tissue. On the other hand, low relative humidity can cause partial wilting of the host tissue in dry air and apparently aids the penetration of certain fungi.

Even though the air around us feels dry, the microclimate surrounding the grass may contain ideal moisture conditions for disease germination. This is sometimes accounted for by dew or the guttation from grass leaves. Many diseases also tend to be autocatalytic in that a certain amount of moisture is produced by the decomposition of the spent disease organisms to provide moisture for new ones.

Early Morning

Watering in the early morning is considered best for dispersing dews and allowing the grass leaves to remain dry as much as possible. Threshing the greens with a limber bamboo pole or dragging a clean water hose across the green surface also helps to disperse dew and moisture otherwise collected on grass leaves.

Another common malady of grass caused by excess water is scald. This condition may or may not be accompanied by disease organisms, and its real cause is somewhat questionable. All too often the term "scald" is used as a "catch all" classification to describe any unidentified turf injury. It is doubtful that grass is ever actually scalded by water that has been overheated by the sun's rays; but we do know that when oxygen is excluded from the soil by overwatering, plants take on a scalded appearance. Low oxygen supply leads to impermeability of the cell walls in

roots and they are no longer able to absorb water in proper quantities. This leads to a moisture deficit in the plant and causes the plant to wilt even though it may be in water.

Because most people fail to associate a wet soil with a lack of moisture in the plant, the condition is not recognised as wilt and is called scald.

Weakness

A lack of water may be associated with turf disease in that it weakens the plant, making it all the more susceptible to disease organisms. A good example of this is the *Curvularia* sp. organisms which usually attack only plants that have first been weakened by adverse environmental conditions.

Fairy ring is a different type of disease which actually denies moisture to the grass. A very dense mass of fungus filaments called the mycelium are produced in a circular pattern in the soil. Because of this dense mycelium, which acts very much like compressed felt in its ability to absorb moisture, the soil cannot be properly wetted by normal watering; and the turf dies or is weakened from lack of moisture.

Mat and thatch also deny moisture to the turfgrass and provide an excellent place for disease to breed. The dead and decaying organic matter in thatch or mat is actually what most fungi pathogenic to turf feed on. Water and air are restricted from the grass roots by an impervious layer of undecomposed organic material, and we have almost ideal conditions for weak grass and strong fungi.

Watch for Warnings

The last and most inexcusable reason for lack of moisture is the failure to apply it when it is needed. The warning signals are always there for those who take time to notice. The grass turns a blue-grey or slate colour and begins to footprint. In many locations during the summer a period of 15 to 20 minutes is the difference between live and dead bentgrass.

By all means we should try to learn and use good watering habits. In this way we will be helping to overcome disease by maintaining vigorous turf.

The third way in which water affects turf is through impurities it carries. Water with an extremely high or low pH can have an effect on bacterial action in the soil, and any detrimental effects should be alleviated by correcting the pH of the soil.

Other impurities in water which may cause trouble are certain salts which are injurious to turf. When water containing a high quantity of injurious salts is used, management of both soil and water is essential. Good drainage is necessary to wash the accumulating salts downward and out of the root zone, and it is therefore necessary to have a permeable soil with a high infiltration rate. Quite often, some relief may be obtained by the use of soil conditioners such as gypsum which replaces the undesirable salt in the soil and allows it to be leached out.

Last of all, the amount of water used as a solvent or carrier for fungicide in a spray solution affects turf. When used in the proper amounts with the proper pressure, it is effective. If large quantities are used, the chemical may become too dilute and have little, if any, effect. If too little water is used, the resulting burn may sometimes be worse than the disease.

The future

Now, let us look to the future. It is possible that someday our whole concept of water may be changed, and we will be better able to use it and understand it. Only in the last three years has powdered water been developed by the National Cash Register Company and put to use industrially. Some day this may be the answer to golf course watering problems whereby exact quantities can be applied with little waste. This may seem ridiculous now, but so did a lot of other things which we now accept as commonplace in our present Space Age.

There is a lot to be learned about water and its relationship to our environment. We know the basic composition of water, but we have not yet measured all its properties. It is so essential we cannot live without water, but we can live better with it if we learn more about it.

76 Four Oaks Common Road
Sutton Coldfield, Warwickshire.

from the Sections

SHEFFIELD

Chairman:
G. HERRINGTON
(Lindrick)

By J. J. Dearlove,
Hon. Secretary:
63 Langsett Avenue,
Sheffield, 6.

A GOLF COMPETITION ORGANISED by the Sheffield Union of Golf Clubs, for Greenkeepers of this Section, was played on the 5th June over the Hillsborough course, in the form of a four ball Stapleford. The scoring was of a very high standard on a lovely day, with the winners, S. Inman and A. Spencers, returning a score of 45 points. Other prize winners, C. Chappell, A. Goldthorpe and G. Herrington, all on 40 points.

It was good to see so many greenkeepers at the same place at the same time, from the youngest to our oldest member, Fred Keys, an Hon. Life Member, whom we were all pleased to see.

The meal afterwards was of the highest order, as were all facilities extended to us by the Hillsborough Club.

Our thanks go out to the Sheffield Union and especially to Mr. Wilkinson—Union Secretary—and his helpers for their hard work in the organisation.

Some healthy discussion took place over the traditional drinks at the 19th on the havoc the past winter has played on golf greens throughout the district, and it was generally agreed that nothing quite like it has been experienced before.

To sum up, an excellent day was had by all. "Keep up the good attendance, lads!"

Journal Postage

I SHOULD LIKE TO REMIND members that the postage for the Journal is now 3s. 6d. That makes the subscription for Head Greenkeepers £1 3s. 6d., Assistants 10s. and Associates 12s. The Treasurer, G. Wilson, c/o 294 Middlemarch Road, Radford, Coventry, will be pleased if members will let him have their subscriptions as soon as possible and will any member who has not got a pass card let him know at the same time, so that he can let them have one with their subscription entered on it, then they will always have proof that they have paid. It is very easy to lose a receipt.

Mr. J. L. Davies, who has been head greenkeeper at the Alfreton Golf Club, Oakerthorpe, Derbyshire, for many years, has had to give up greenkeeping and move to Cheshire owing to the ill health of his wife. We wish him well in his new occupation and hope his wife's health improves.

President's Match

As I am writing these notes the President's Match is only four days away and I am still waiting for replies from eight members to a letter sent them a fortnight ago, enquiring if they would be able to play. I am very angry about it, not for myself, but I think it shows discourtesy towards our President. The amount of time and work he gives for our Association, and the Midland Section in particular, warrants a reply of yes or no, so that I can let him know how many greenkeepers will be coming.

NORTH-EAST

By T. Oliver

Chairman:
J. SIMPSON
(Ponteland G.C.)

Hon. Secretary:
Heathery Cottage,
Heathery Lane, Gosforth,
Newcastle-on-Tyne 3.

OUR SPRING MEETING WAS PLAYED on the course of Hartlepool Golf Club, by kind permission of the Committee, on Thursday, 16th May. We were favoured by grand weather conditions and the course is in fine trim, particularly the greens. Congratulations to our member, Dick Nicholson.

We were pleased to have with us our President, Mr. Leslie Jones. The President's Putter was won by D. Gray, playing from scratch, with an excellent round of 66. Second was R. Derham (7) 70; third T. Davies (18) 72; T. Nutman (6) 74; T. Green (4) 75; M. Moat (15) 76; T. Kirtley (11) 76; J. Snowdon (10) 81.

Following tea, the Putter was presented by Mr. Jones, who said how pleased he was to see such a good turn-out of members. The

other prizes were presented by Mr. Pallister, Chairman of Hartlepool Golf Club, who made us very welcome and said he hoped we had a good day. Mr. Stoker and Mr. Coyne also hoped that we had enjoyed the day. Our Chairman, J. Simpson, thanked the Club and Mr. Jones thanked the Steward and Stewardess for the very good tea.

We were also pleased to have with us Mr. Vaughan, Representative of Ransomes Sims & Jefferies, and Mr. Mackenzie.

Thanks again to Les Lowery for his good work on the cards. Thirty-two members played, 36 attended.

We have to thank Mr. L. Jones for his keen support towards the Association by advising officials of Golf Clubs to encourage greenkeepers to join. We already have new members and at the end of the year in April we had a membership of 50, of which 48 are fully paid members, plus two Class F.

We also have to thank the Northumberland and Durham Golf Unions for their donations.

Receipts and payments have been examined as per Balance Sheet; we have a balance at the bank of £38 17s. 0d.

The Annual Meeting, election of officials, etc., was held on 13th April and the meeting for April expenses was held on 1st June.

NORTHERN

By J. Parker

Chairman:
S. BAILES

Hon. Secretary:
8 Goit Stock Terr., Harden,
Bingley, Yorks.

Visit to S.T.R.I.

ARRANGEMENTS HAVE BEEN MADE for members of the Section to visit the Sports Turf Research Institute at Bingley, on Tuesday, 16th July. Members of the North-West Section will be visiting the Station on the same day. Members are invited to bring along an official of their club and assemble at the main offices at 1.45 p.m. No further notification of the visit will be sent. Note the date.

Course of Instruction

Two places have been reserved for members of the Section to attend the Autumn Course of Instruction to be held at the S.T.R.I., Bingley, from the 21st to 25th October. Anyone wishing to attend is asked to forward his name to me as soon as possible. The Section will pay for the registration fee, but members will be responsible for their own meals and travelling expenses.

New Members

We welcome to the Section the following new members: P. Bowden, 19 Highfield Terrace, Cullingworth, Bradford (West Bradford G.C.); J. Smith, 20 Escott Street, Burnley (Burnley G.C.); R. F. Waterson, 21 Lyndon Avenue, Garforth, near Leeds (Garforth G.C.).

We have already enrolled eight new members in the new financial year and it is to be hoped that members will do their utmost to get more into the Association—I have plenty of nomination forms.

Annual General Meeting

There was a most disappointing attendance at the A.G.M. held on Thursday, 30th May, at the Market Tavern. Only seventeen members were present, these being mostly the old stalwarts who support the Section on all occasions and money raising efforts! In presenting his annual report, the Secretary reported a rather big drop in the returns of both Headquarters and Section Sweeps and hoped that the ones in the coming year would be better supported. Membership and subscriptions were slightly increased. He thanks the S.T.R.I., members of the trade, Golf Clubs, Mr. Mountain (President) and Mr. A. Nott for their help.

Election of Officers

The following were elected as officials for the coming year: Mr. W. Mountain (President), Mr. S. Bailes (Chairman), Mr. D. Roberts (Vice-Chairman), Messrs. A. Routledge, A. Robertshaw, E. Paley, G. Garnett, G. Mason, K. Chamberlain and A. Tallant (Committee), J. Parker (Hon. Secretary and Treasurer). As a mark of appreciation for his services to the Section and Association, Mr. G. Geddes was elected Hon. Vice-President of the Section.

New Chairman.

On taking over Chairmanship, Mr. Bailes thanked members for thus honouring him and hoped he would be able to serve the Section well. He thanks Mr. Mason, who had been Chairman for the past three years, and had declined nomination, feeling that the honour should go round to other members, for his work during that period.

Several matters were discussed in which most members present took part. The meeting closed with members partaking of liquid refreshments with the President.

EAST MIDLAND

By S. T. McNeice

Chairman:
D. G. WHITEHEAD
(Wollaton Park)

Hon. Secretary:
40 Edward Road,
Clarendon Park, Leicester

Spring Tournament

THE EAST MIDLAND SECTION Annual Spring Tournament was played over the Sinfu Lane, Derby, Golf Course, on Tuesday, 28th May.

The weather was bright and sunny, but a strong drying east wind blowing caused the course to be very fast and made approach shots to the green most difficult to hold.

EAST MIDLAND—continued.

These are the leading scores and prize-winners:—

1st, B. Mott, Kingsthorpe Golf Club, 85—13=72.

2nd, S. T. McNeice, Leicestershire G.C., 84—12=72.

3rd, J. Carrick, Northamptonshire Co. G. C., 83—9=74.

4th, F. Frost, Derby Municipal G.C., 80—6=74.

5th, R. W. Willars, Leicestershire G.C., 97—22=75.

6th, A. Thornton, Chilwell Manor G.C., 98—22=76.

7th, D. G. Whitehead, Wollaton Park G.C., 100—24=76.

Special Prize for 3s—S. Fretter, Kirby Muxlow.

Vice-Presidents.

1st, R. Whitcombe, Chilwell Manor, 90—18=72.

2nd, D. Ezard, Bulwell Hall, 73—scr.=73.

All ties were decided on second 9 holes.

We are indebted to the following, who have kindly contributed to our prize fund—Messrs. Ransomes, Sims & Jefferies Ltd., Mr. R. C. Ainscow, The Derby Golf Club, Messrs. H. Pattison & Co. Ltd., Messrs. Leicester Horticultural Eng. Co., Messrs. Thomas Green & Son Ltd., Mr. J. C. Harrison, Mr. S. C. Long.

New Members

We welcome to the Section Roger Frederick Buchanan, 12 Aston Drive, Bulwell Hall Est., Nottingham.

IN SPITE OF THE THREAT OF RAIL strike, we had quite a good entry for our Spring Tournament, a total of forty-one.

The winners were as follows:

Scratch prize—J. Kirkpatrick, 158.

Handicapped players—1st, J. Noakes, 155; 2nd, G. Darby, 156; 3rd, G. Hitchcock, 156; 4th, J. Corner, 156; 5th, J. Glass, 157; 6th, D. Major, 158; 7th, D. Kirkpatrick, 159; 8th, J. Ness, 160; 9th, F. Hayter, 161; 10th, J. Stobbs, 161; 11th, S. Freeman, 162; 12th, S. Dennis, 164; 13th, E. Folkes, 164; 14th, G. West, 164.

Our thanks go to all those firms who kindly contributed towards our prize list and also to Thorndon Park Golf Club for their great welcome.

Will members please not that subscriptions are now overdue.

New Members

We welcome to the Section the following new member: P. W. Robinson, 11 Council Houses, Shephall, Stevenage.

NORTH-WEST

By V. Crabtree

Chairman:
T. BRENNAN
(Wilmslow G.C.)

Hon. Secretary:
223 Market Street
Whitworth, Nr. Rochdale

GREETING TO THE MEMBERS OF the North-West Section.

This is the first edition of my notes and reminders to you since I was elected your Secretary. I hope most sincerely that I can maintain the high standard of efficiency shown by my predecessors and that your confidence in my appointment has not been misplaced. I will try to give satisfactory service and with your full co-operation and support lift the North-West Section to even greater heights.

If you have any news, let me have it for publication.

If you know any greenkeepers who are not members, let me know or send for a membership form.

Have you paid your subscriptions? Please note Class A is now £1 3s. 6d., Class B 16s., Class C 12s. This increase is due to the cost and postage of the journal. Please send your subscriptions to the Hon. Treasurer, Mr. E. Macavoy, 21 White Meadows Drive, Thornton, Liverpool, except in the case of new members, when they should be sent to me. No new member will be placed on the membership roll until the first subscription and entrance fee of 2s. 6d. is paid.

The Chairman and Committee feel that should you play your part along with us, greater benefits can be gained by all concerned.

Mr. B. Ellis

We were all very sorry to learn, at our Annual General Meeting, that Ben was adamant about his decision to resign as Secretary. His resignation was accepted with real regret, his wishes to be a back-bencher were acknowledged. He joined the Golf Greenkeepers' Association 36 years ago, the knowledge and experience gained over so many years cannot but leave a place that requires a lot of filling.

He has served on the staff at Romily Golf Club for 32 years, which shows a steadiness and consistency to be admired. In 1946 he was approached by Mr. Hawtree regarding the re-formation of this branch, so along with Mr. T. Bridges and Mr. T. Morton and a bank balance of 7s. 4d. he was appointed Hon. Secretary. Mr. W. Hargreaves, who was then President, was contacted and the circumstances made known to him. He promptly wrote out a cheque for £10 to help start. Ben continued in this office for six years until 1952, he was then Vice-Chairman and Chairman in 1953-54. Again he stepped into the breach for two years as Secretary in 1961-62.

This sounds a bit like "This is Your Life", and perhaps it is, but it is a record without which The North Western Section would have been much the poorer.

From us all, "Thank you, Ben, for a good job of work".

The meeting then acknowledged Mr. Ellis' services by making him a Life Member, and a tankard is to be purchased, suitably inscribed, and presented to him.

Trip to Research Station, Bingley

A visit has been arranged to the Turf Research Station, Bingley, for Tuesday, 16th July, 1963. Would members wishing to go please let me have their names by 1st July, so catering arrangements can be finalised. The party will travel by coach, picking up times as listed below: Queen Hotel, Bradbury, Bents Lane, at 8-0 a.m.; Cherry Tree Hotel, Romiley, 8-5 a.m.; Navigation Hotel, Marple, 8-15 a.m.; Goyt Mill, Marple, 8-15 a.m.; Blossoms Hotel, Stockport, 8-25 a.m.; Queen's Hotel, Piccadilly, Manchester, 8-45 a.m.; Victoria Station, Manchester, 9-15 a.m.; Rochdale Town Hall, 10-0 a.m.

Spring Tournament

Our Spring Meeting was held at Sale Golf Club on Monday, 13th May, 1963. Thanks to the Captain and Council, with the co-operation of the inside and outside staff, an excellent day's golf was enjoyed. We played 18 holes in the morning and 9 holes in the afternoon, followed in the evening with the Annual General Meeting.

A wonderful array of prizes were displayed to spur us on to greater things. The John

Fitton Rose Bowl and camera, coffee percolator, electric clock, holdall, tankard, two bottles of whiskey, crystal bowl, canteen of cutlery, golf balls, fruit set, a golf umbrella. These were presented by Mrs. B. Ellis, Mrs. L. Haken, Mr. L. Haken, Mr. O. P. Jones, Mr. W. H. Payen and the President, Mr. W. Kinsey. Messrs. W. E. Sowerbuttes & Co., Messrs. T. Burrows (late Ellis Rees and Co. Ltd.), Messrs. Lunevale, Messrs. Barthers Ltd., Messrs. Suttons Ltd., Messrs. Rigby Taylors. Thank you, prize donors, and Mr. Captain, Sale Golf Club, for a donation to branch funds.

The prizes were played for over the 27 holes and won by W. Brady, 121 gross; H. Smith, 109 nett; A. Warhurst, 111½; G. Davey, 112½; T. Cooper, 116 (on first 9 holes); A. M. Shaw, 116; R. Mayer 117; W. Brady, 118; D. Pate, 119½; A. M. Shaw, on first 6 holes; A. Curran, the highest score; and the visitor's prize by Mr. V. Howard, 69 nett.

Tournament Accommodation—Note to All Sections

Would any members who have to travel long distances to reach Royal Birkdale for the Autumn Tournament, having any difficulty fixing accommodation, please let me know and we will do our best to find suitable hotel or boarding house in Ainsdale or Southport. Please reply as early as possible, as this period as at peak holiday times.

Chairman:
G. GILBERT,
(Warminster G.C.)

By A. Cockfield
Hon. Secretary:
(Shamcastle G.C.)

OUR ANNUAL GENERAL MEETING was held at Knowle Golf Club by kind permission of the Captain, on Monday, 6th May.

The meeting was opened by our Chairman, Mr. Gilbert. The Hon. Secretary gave a brief report on the activities of the Section during the past year.

The accounts showed an improvement and after a detailed report these were approved and carried. The meeting was concluded after a vote of thanks was given to the Club.

Annual Tournament

It was decided to approach the Committee of the Bristol and Clifton Golf Club for permission to hold our Annual Tournament there in July.

They have very kindly offered us Tuesday, 23rd July, for this event. In order to assist catering arrangements, the closing date for entries will be Tuesday, 16th July. Will all those competing please forward their entries together with a fee of 10s. (towards lunches, etc.) not later than the above date.

WELSH

Chairman:
M. GEDDES
(Royal Porthcawl)

By S. A. Tucker

Hon. Secretary:
36 Clase Road,
Morrison,
Swansea, Glam.

OUR ANNUAL GENERAL MEETING was held at the Southerdown Golf Club, by kind permission of the Captain and Committee, on the 28th May. As usual, it was run in conjunction with the Secretaries, who invited us to supper. We played 18 holes before lunch and held our Annual Meeting in the afternoon, which was well attended. There was some very good golf played, as you will see from the results.

The first prize went to J. Davies with a score of 99—24=66. His prize was a putter given by J. C. Clay, Esq. Second was D. Jones with 79—12=67. His prize, a holdall, was given by I. G. Nicholls, Es., our President. Third was J. R. Williams, 81—11=70, who won a clock, and fourth J. Rees, 78—7=71, whose prize was a salad-bowl and servers.

The First Year Competition was won by W. Hooper — 99 gross. Our President presented the prizes after supper to finish off a splendid day, which everyone enjoyed.

As you all know, our subscriptions are due and I would ask those few who did not square up with the Treasurer at our last meeting, to please send theirs to Mr. M. Geddes, 23 Fenton Place, Porthcawl, Glam., without delay, so that Mac can close that section of the books.

As you have all heard from Mr. Lord how much money is needed to maintain our Association, I hope you will do your best to sell out all raffle tickets in the parcel which you will have received from me before you read these notes. Thank you all for your support in anticipation of a good year.

The Autumn Meeting will be held by kind permission of the Captain and Committee of the Cardiff Golf Club, Cyn-Coed, Cardiff, on Wednesday, 18th September. Please let me know how many will be coming from each club, so that I can arrange the catering with the steward.

Annual Tournament

OUR ANNUAL COMPETITION WAS held on the Old Course, St. Andrews, by kind permission of the Joint Kinks Committee. It was a grand day and the course was in excellent condition, thanks to Mr. J. K. Campbell, and his staff.

The results were as follows: 1st, Mr. J. Moffat, St. Andrews, 71; 2nd, Mr. I. Simpson, Blairgowrie G.C., 72; 3rd, Mr. W. Falconer, Panmure G.C., 74; 4th, Mr. J. K. Campbell, St. Andrews, 76; 5th, Mr. W. Donnachie, Deeside G.C., 77; 6th, Mr. J. A. Riddell, Deeside G.C., 77; 7th, Mr. J. Falconer, Panmure G.C., 79.

Mr. J. K. Campbell, our Chairman, thanked the Committee for the courtesy of the course, the New Club for their excellent hospitality and Mr. and Mrs. G. Mearns for the nice meals. We are also indebted to Col. Brown of the R. & A. for presenting the prizes and conducting us through the R. & A. Club with all the historic trophies and relics of the home of Golf.

ROYAL BIRKDALE

NOTICE IS HEREBY GIVEN THAT the Forty-sixth Annual General Meeting of the British Golf Greenkeepers' Association will be held at the Royal Birkdale Golf Club, Southport, on Monday, 12th August, 1963, commencing at 3-0 p.m.

Notice of Resolutions must be sent in writing to the Honorary Secretary TWENTY-ONE DAYS before the date of the meeting. Under Rule 29, Proxies may be voted at all General Meetings. A Form of Proxy may be obtained from the Honorary Secretary and returned not later than FIRST post on Wednesday, 7th August.

The Annual Tournament

THE FORTY-SIXTH ANNUAL GOLF Tournament will be held at the Royal Birkdale Golf Club, Southport, on Monday, Tuesday and Wednesday, 12th, 13th and 14th August, 1963. Entry Forms appeared in the June issue of the Journal.

Programme

Monday, 12th August.

Morning—18 Holes Stableford.

Afternoon—Annual General Meeting, 3-0 p.m.

Tuesday, 13th August.

36 Holes.

"News of the World" Cup (Scratch).

Senior Division (Plus to 11).

Junior Division (12 to 24).

The Artisan Medal.

The Jubilee Cup (Team Prize off Handicap).

The Coming of Age Cup.

Wednesday, 14th August.

Morning—18 Holes Medal Competition.

Afternoon—Prize Distribution at 3-0 p.m. (approximately).

Members requiring accommodation should look under Mr. Crabtree's North West Section Notes, where he kindly offers to assist.

HON. SECRETARY'S NOTES

Handicaps

Section Secretaries will be asked to verify the handicaps of all competitors from their records before the Tournament. All Handicaps and revisions must be based on the National Golf Unions' handicapping system.

A MEETING OF THE EXECUTIVE Committee will be held at the Royal Birkdale Golf Club, Southport, on SUNDAY, 11th AUGUST, 1963, at approximately 5 0 p.m.

May I remind holders of trophies from last year's Tournament, who are not taking part this year, to ensure that these are returned to Royal Birkdale Golf Club, Southport, prior to this year's meeting.

Annual Draw

May I remind members that all counterfoils and monies should be returned to their own Section Secretary and NOT to me.

C. H. DIX,

Hon. Secretary.

The Editor,
"British Golf Greenkeeper".

Dear Sir,

Whilst reading the sports page of a Scottish newspaper, I was interested in an article written by a well-known Professional golfer.

Among other things, he mentioned the bad condition of courses during this spring. He said, however, that this was caused by the very bad winter.

In another paragraph he said:—

"Harping back to the condition of our greens, I have heard the theory several times from knowledgeable men that intensive cultivation of the putting surface has over the years produced a foreign type of grass which cannot withstand harsh weather.

Indeed they maintain that generally speaking many British greens have been deteriorating over the years and that more natural methods of cultivating will have to be done to restore them."

I wonder if the writer has ever given thought as to how these supposed foreign grasses arrive in golf green? Does he realise that most courses are understaffed and overgolfered? Tournaments are played too early in the year, which means that fertilising is carried out before the finer grasses reach their peak,

thus giving the coarser grasses a chance to choke them out. Regarding over-cultivation, I suppose he means such things as hollow tining, etc. I agree this encourages other grasses, but it is necessary so as to give the golfer the well-aerated, poached egg green he so desires.

Yours faithfully,

J. WALLIS-ARTHUR,
Vice-President,
Southern Section.

SITUATIONS VACANT

GREENKEEPER required to take complete charge of 18-hole Golf Course. Applicants should be fully experienced in all aspects of greenkeeping and the care of machinery. Apply to Secretary, Dudley Golf Club Ltd., Oakham House, Dudley, Worcs.
