

*Main laying by Mole Plough. A method of special interest to golf clubs due to the small surface disturbance.*

Laying Chemidus 3000 uP.V.C. 3 ins. pipe by mole plough in heavy Oxford clay for the West Wilts. Water Board at Wincanton recently. The 3 ins. Chemidus pipe is attached to the 6 ins. expander by means of a collar adaptor. The mole plough blade was set at a depth of 3 ft., and a 200 yd. length of plastic pipe was drawn underground from a prepared entrance. The blade of the mole plough can be seen at the top of the picture.
