NITROFORM

CONTROLLED RELEASE

Nitrogen Fertilizer

Nitroform is an organic turf fertiliser containing 38% nitrogen.

- * Does not scorch
- * Is labour saving—only one application needed a year
- * Releases nitrogen—the vital plant food for grass throughout the growing season

- * Has no smell
 - * Easy to spread by hand or distributor
- One application feeds the grass for a whole year, giving a healthy sward of a rich deep green colour and a strong root system. Also available in compound fertilisers. Ask for **Nitroform** at your usual supplier of fertilisers. In case of difficulty write to
