

## NEW POROUS MATERIAL FOR DRAINAGE

Lyttag is a lightweight aggregate manufactured by pelletising and sintering pulverised fuel ash at a high temperature. The grades used are  $\frac{1}{2}$  inch Medium and  $\frac{1}{4}$  inch Single Size. Both are spherical in shape.

There are plants in Kent, Essex and Staffordshire. Granular Lyttag costs 30s. a cubic yard ex-works.

Lyttag is suitable for land drainage having high water absorption characteristics of up to 30 per cent by weight. After continuous thawing and freezing, Lyttag shows no sign of breakdown over long periods.

It has a bulk density of 48 lbs. per cubic foot and is therefore of assistance to drainage contractors when operating in wet and difficult conditions. Lyttag does not break down in clay soils. It is a vitrified material and is chemically inert. Tests have shown that the degree of compaction after long periods underground is negligible.

Because of the spherical shape the proportion of voids in Lyttag drainage material is a maximum.

Acceptance of coarse grade Lyttag has been given by the Ministry of Agriculture and Fisheries for grant aided land drainage schemes.

It is also claimed that Lyttag will improve the moisture retention of dry sandy soils when used as an admixture.

### SITUATIONS VACANT

**EXPERIENCED GREENKEEPER** required for Rochford Hundred Golf Club, Rochford, Essex. No accommodation. Apply to Secretary, stating

salary required. Tel. No. Southend-on-Sea 544302.
