Warren's A-34 may be examined at the Harlow Car Botanical Gardens, Harrogate, Yorkshire. Planted May 1971.

Let  
them  
tear  
it up...

## Warren's<sup>®</sup> A-34 Kentucky Bluegrass Comes Back Faster!

Warren's A-34 Kentucky Bluegrass (*Poa pratensis*), grows vigorously in shade and sun alike. It is proving to be the best all round grass for use on sports-grounds, parks and recreational areas. Its ability to recover quickly from injury makes it ideal for sowing down golf tees and all those areas receiving wear and tear.

Warren's A-34 Kentucky Bluegrass will tolerate up to 65% shade when maintained at a two inch cutting height. On open sites it can be mown down to 3/8ths of an inch, still grow vigorously and retain its power to recover quickly. It is the one pure strain of bluegrass seed that will thrive in shade and sun and tolerate a wide range of soil and climatic conditions. It is not necessary to blend A-34 with seed of other species or strains and the best results have been obtained from using it neat at a low seeding rate.

Warren's A-34 Kentucky Bluegrass has been under observation by turf grass research departments of leading Universities and other research organizations in the United States and they have all given it a high rating for disease resistance and shade tolerance.

For more particulars on Warren's A-34 Seed phone your inquiry to:

# Tee Shots

Western Gailes is one of the latest courses to be threatened by the route of a new road. After the excitements of the Curtis Cup, the Committee have to get down to decisions on alterations at the north end of the course. The road is planned by Irvine New Town and it takes off a piece of Glasgow Gailes Golf Course on the way. The new road will cross the railway by a new bridge but no doubt the old crossing to Western Gailes manned by the signal box attendant will remain for many more years.

The new Lisburn Golf Course is taking shape. The town itself has some yawning gaps in the High Street but the I.R.A. activities have not extended on to the golf course. Brian Rimmer who was in charge of the construction has now moved on to Portadown and Mr. Macadam who was formerly with The Sports Turf Research Institute has taken on supervision of the maintenance phase.

Planning Officers are becoming more and more safety conscious where golf courses are concerned. Before planning permission is granted nowadays, the plans are examined to see if any roads are endangered. Discussing the question of safety of the new Minchinhampton Golf Course last week, we had some trouble in persuading the planning official that golf was not a dangerous game. He had been driving past the present course on Minchinhampton Common when he saw a ball coming and after one bounce, it entered his driving window which was fortunately open at the time. He said he did not bother to stop to find the owner but carried on one ball to the good.

We are more than halfway to the minimum total for our trip to Boston in January. More names wanted now so that we can start definite arrangements.

*The Editor.*

# Disposing of Unused Chemicals and Containers

*Unused chemicals and their containers pose a problem of disposal; here are steps being taken in Maryland to solve this problem*

by

James V. Parochetti, Ph.D.

In this age of environmental concern, it is important that great care and wisdom be exercised in using pesticides. First, this requires choosing the appropriate herbicide that will have a minimum impact on the environment. Then comes proper use and, finally, efficient disposal of empty pesticide containers and unused pesticide materials. *Nothing can do more harm to the pesticide industry or those who need and use pesticides than the neglect of the proper disposal of empty pesticide containers.*

In March 1970, the State of Maryland adopted the Maryland Pesticide Applicators Law and Regulations. The Law is administered by the Maryland State Board of Agriculture and receives counsel from the Maryland Pesticide Advisory Board. This Board is composed of representatives from several state agencies including Health, Water Resources, Natural Resources Institute, Agricultural Experiment Station, Agricultural Extension Service and the Maryland State Board of Agriculture.

One of the most pressing problems facing the Pesticide Advisory Board (PAB) was to provide guidelines for the proper disposal of empty pesticide containers, unwanted concentrated pesticides, and leftover diluted pesticide sprays. To provide guidelines on proper disposal, PAB established a task force of experts in the state of Maryland to formulate specific guidelines. The Pesticide Disposal Task Force was made up of representatives from the following state agencies: Health, Air Quality Control, Environmental Services, Water Resources, University of Maryland Agricultural Experiment Station and the University of Maryland Co-operative Extension Service. The U.S. Department of Agriculture was also represented on the task force.

The following guidelines have been adopted by the Maryland Pesticide Advisory Board and are to be considered as *interim* procedures on pesticide disposal. They reflect the latest thinking by various experts in this area. A copy of this total report can be obtained from: Maryland State Board of Agriculture, Office of the State Entomologist, University of Maryland, College Park, Md. 20742.

## **Problem Areas\***

Pesticide disposal problems can be divided into several categories related to use. These categories are: (1) homeowners and others with similar needs; (2) large scale applicators, including public agencies and farmers; (3) retail and wholesale outlets; and (4) formulators. These categories were selected on the basis of similar characteristics inherent in each.

These groups are each characterized by the following: (1) amount and variety of pesticides used; (2) size of containers; and (3) areas involved in the application. The responsibility for properly disposing of pesticides and pesticide containers ultimately lies with the purchaser or owner. Only the first two categories will be discussed.

## **Homeowners and others**

Homeowners, home gardeners, hobbyists, amateur flower growers, small nurserymen, small farm operators and some public agencies usually purchase pesticides in packages of less than 1 gallon or 2 pounds. Small amounts of surplus pesticides may accumulate. These materials are

S.E.1**

Tel: (01)-237 1958/9

shelved until used or disposed of during 'spring cleaning', when there is a change in occupancy or because of safety considerations.

Individually there is a minimum of potential hazard, but collectively this group *may generate* a substantial quantity of surplus pesticides or containers and it is here that a potential environmental hazard may occur.

#### **Guidelines for small users**

1. Purchase pesticides *only* in quantities which can be used during the current season.
2. Wash hands after handling pesticides or pesticide containers.

Where surplus pesticides are concerned:

#### *Do's*

1. Store materials in a locked, safe storage area in the original container. Check containers periodically to insure against leakage or breakage.
2. Dilute according to recommended mixing instructions and spread uniformly on soil where water contamination will not occur.
3. Whenever used, apply in strict accordance with label directions.
4. Wrap package containing pesticide in at least six layers of newspaper and place it in the garbage just before pickup.

#### *Don'ts*

1. Do not dispose of in sink, toilet or floor drains, gutters, roadside ditches, sanitary sewers, storm sewers, streams, lakes or ponds.
2. Do not burn pesticides or pesticide containers.
3. Do not bury where contamination of water may occur.
4. Do not dispose of in unauthorised dumps or sanitary landfills.
5. Do not organise community surplus pesticide pickups, unless a professional is in direct supervision and adequate disposal facilities are immediately available.

#### **Empty containers**

##### *Do's*

1. Wrap containers heavily in at least six layers of newspaper and place in the garbage just before pickup.
2. Where trash collection is not available, bury in an isolated area at least 500 feet from any well or surface water, such as lakes, ponds, etc. If possible, bury to a depth of at least 18 inches, in a well-drained soil; break glass or puncture metal containers (except aerosol) and bury promptly. Paper containers should be buried intact and covered.

##### *Dont's*

1. Do not bury in sand or gravel or other porous substances where ground or surface water may be contaminated.
2. Do not leave containers where children or pets may come in contact with them.
3. Do not reuse.
4. Do not dispose of containers in ditches, erosion areas, streams, ponds or rivers.
5. Do not burn pesticide containers.

#### **Large-scale Applicators†**

Farm operators, custom applicators, pest control operators, arborists, public agencies and industrial weed control operations usually purchase large quantities of many different pesticides through co-operatives, farm supply stores, chemical companies or directly from wholesale distributors. Generally, purchases are made in 5-gallon containers or 2- to 10-pound bags, and some purchases are made in 30-gallon or 55-gallon drums or 50- to 100-pound bags.

Commercial applicators usually purchase only what is needed. Surplus pesticides or pesticides carried over from one year to the next are stored or returned to the wholesale or retail outlets. Inventories of old or faulty pesticides are minimal.

The use of medium size containers (5-gallon pail and 2- to 10-pound bags) generates one of the

# The World's first Greens Management System

Precision Greens Mowing!  
Triplex Tee Mowing!  
Triplex Verti-cutting!  
Triplex Spiking!

## RANSOMES-HAHN tournament triplex

**It takes less than a minute to convert the Tournament Triplex greensmower to a utility mower to a Verti-Cut to a spiker! The 12-hp Triplex vehicle powers all accessories . . . each of which disconnects by just pulling a pin and disconnecting a quick-couple cable. Literally in less than a minute!**

And remember that, because all accessories operate off the standard Triplex vehicle, your total investment in the Tournament Triplex management system will very likely be less than your investment in the four conventional turf maintenance machines it replaces!

Features include: Cuts 18 greens in four hours. All reels up front gives full vision. Easy-to-read dials make variable speed mowing simple. Unique geometric steering of reels. Hydrostatic drive for smooth stops and starts. Individual lifts on each mower reel. Aircraft cable drives are strong, reliable, easily serviced. Excellent climbing power on slopes up to 1 in 3. Reels removed in seconds without spanners. Gravity dump trailer provides fast clean up from all operations.

**For full details and a demonstration . . .**

## CONTACT EASTERN TRACTORS

at Bishops Stortford 3325

Chelmsford 56211 : Colchester 76111 : Braintree 1451 : Steeple Bumpstead 377  
and Anglian Lawnmowers at Kesgrave 4273

major problems of disposal to this group. Extra or excess tank mix and rinse water from cleaning operations poses a serious problem.

Public agencies apply varying amounts of pesticides to control weeds, insects, and rodents. Spills and mishandling are of concern to this group. Surplus pesticides may be stored improperly; containers may develop leaks or may be left open and the concentrate deteriorates.

### **Guidelines for large-scale applicators**

#### **I. Disposal of empty containers**

##### **A. Pertains to all empty containers except 30- and 55-gallon drums.**

###### *Do's*

1. Empty all containers thoroughly.
2. When empty, rinse containers which held liquids several times with water (or other suitable diluent) and use rinse for dilution of spray mixture.
3. When empty, flatten dry containers to facilitate handling, temporary storage and disposal.
4. Hold empty containers prior to proper disposal, in a secure area where children or animals will not come into contact with them, and where any drainage or particles from emptied containers will not be a hazard.

###### *Don'ts*

1. Do not reuse containers for any purpose unless reprocessed (detoxified) by a commercial processor, or in accordance with the label.
2. Do not burn containers unless burning is done in a high temperature incinerator (1800 degrees F).

##### **B. Pertains specifically to glass, light metal, plastic, paper or other single trip containers.**

###### *Do's*

1. When thoroughly emptied and/or rinsed, the containers should be rendered unusable by breaking, flattening or perforating and then disposed of through normal trash collection or buried in an isolated area at least 500 feet from any well or surface water such as lakes, ponds, streams, etc.

###### *Don't*

1. Do not reuse for any purpose.

##### **C. Pertains specifically to 30-gallon or over drums (heavy metal, heavy plastic, etc.).**

###### *Do*

1. When thoroughly emptied and rinsed, return to commercial reconditioning processor

###### *Don'ts*

1. Do not reuse any pesticide container for food, feed or watering purposes.
2. Do not reuse any pesticide container with specific instructions prohibiting reuse.

#### **II. Disposal of unused pesticide concentrates**

###### *Do's*

1. Limit your inventory of unused concentrated pesticides so that a complete inventory turnover occurs within two years.
2. Store properly.
3. Use the pesticide properly. If surpluses accumulate, attempt exchanging with another applicator for pesticides you need or return unopened packages to the distributor or dealer.
4. Dilute pesticides with a liquid carrier and apply uniformly at recommended rates to a non-target area owned or rented by the applicator where the pesticide will be detoxified by photodecomposition and microbial activity.

###### *Don't*

1. Do not dispose of large (5 pounds or 1 gallon or more) amounts in landfills, dumps or directly on the ground surface because of the pollution hazard.

#### **III. Disposal of unused diluted pesticides**

###### *Do's*

1. Applicators should take particular care in preparing the last tank of spray mixture to be used for each job. Calculate closely the amount required to complete the job.
2. All but a few pesticides can be maintained in a dilute solution for a considerable

# FAST, ACCURATE HOLE CUTTING AND RENOVATION

The 'Supercut' Hole Cutter and the 'Squarecut' Turf Repairer are precision implements. Every plug or sod fits *exactly* into the hole made for it with the same implement.

Clean cut ensures minimum disturbance of root-soil structure.

Square shape means unlimited adjacent cuts for any size of patch. No 'in-between' spaces as with round cutter.

Greens can be back in use immediately after renovation.

Perfect holes, perfect plugs. This hole cutter of a completely new design cuts vertically, eliminates wobble, and makes a clean cut simply and quickly.

*Details from*

**H. PATTISSON & CO. LTD.,**  
Stanmore Middlesex 01-954 4171

**Pattisson**

length of time. The user should ascertain if this is true for the pesticide he is using, and if so, the dilute solution can be stored in a sprayer tank until the next day, or stored in a properly labelled container until the spray operation.

3. If the pesticide user has completed use of a particular chemical, or the solution cannot be kept for the length of time desired, the best means of disposal is reapplication to the target area in a very dilute solution. This can be done by further diluting the material with water (or other solvent being used) at least 10:1 and then spraying the diluted material over a portion of the target area which has been previously treated. (Avoid this method with exceedingly excessive amounts which could result in phytotoxicity, over-tolerance residues or other undesirable results.)

Note: For golf course purposes, Dr. Paul M. Alexander does not subscribe to this recommendation, especially where greens, tees and fairways are concerned.

*Don'ts*

1. Do not dump leftover dilute pesticides.
2. Do not dump onto the ground of farmsteads or work areas where humans or animals may contact it.

*IV. Disposal of waste and wash from clean-up*

*Do's*

1. Every effort should be made to clean equipment on the site where application of the pesticide was made, and to dispose of clean-up wastes within the target area.
2. Construct a securely fenced area on the farmstead or at the central operations area used by other applicators, especially for the purpose of cleaning application equipment. One suitable method is to excavate an area of sufficient size to accommodate the amount of waste involved, for example 12ft. by 12ft. to a depth of about 1ft. This excavation should be filled with crushed rock of approximately 1in. size. Wash from equipment can be drained directly into this area with little potential of contact by humans or animals. Locate where surface water will not drain through area and ground water will not be affected.
3. Use same precautions in clean-up as used in handling and applying the pesticide.

*Don'ts*

1. Do not clean equipment in areas where residue from clean-up can contaminate or harm persons or animals using the area for other purposes.
2. Do not clean equipment or discard clean-up wastes in areas where contamination of wells, ponds, streams or other ground or surface water is likely.

### Annual General Meeting

There was a very good attendance for the A.G.M. in the evening.

The election of officers was as follows:-

President – W. Kinsey Esq.

Chairman – R. Vickers Esq., Leigh Golf Club

Vice Chairman – O. P. Jones, Bramhall Golf Club

Secretary – H. M. Walsh – Old Links Golf Club, Bolton

Treasurer – R. Janovskis, 3030 Moorside Road, Swinton, M/C

Vice Presidents were voted en bloc

Committee members – Messrs Rhodes, Walsh, Drage, Owen and J. Gillett (ex officio)

It was decided at the meeting that a further trial of playing 18 holes in the morning and 9 in the afternoon be given at our Autumn Tournament, further details re venue etc. in the next issue of the journal.

### New members

We welcome to the section the following new members and hope their association with us will be a happy one: J. Bennett (Deane G.C., Bolton), W. A. Rodgers, T. M. Holmes, R. A. Graham, (all at Hillside G.C., Southport), M. Mercer (Royal Birkdale, Southport), F. Jackson (Rigby Taylor), A. G. Stewart and M. Sheehan (Childwall G.C.), W. MacDonald (Grange Fell G.C.), J. Stamford (Manchester G.C.).

### In Memoriam

It is with the greatest regret and sorrow that I have to inform members of the sudden passing away of my old friend and colleague of the Section, Ted Macavoy. Ted had been a member of the section for well over twenty years, twenty of these years were spent as a committee man and thirteen of these twenty as Hon. Treasurer of the section. Ted passed away on Monday, 19th June whilst at his work at Hillside Golf Club, where just one month ago he warmly welcomed the members of the section to Hillside to play our Spring Tournament. We can ill afford to lose members of the calibre of Ted Macavoy, and on behalf of all members I would like to extend to his family our deepest sympathy in their loss.

Staffs.

### Spring tournament

The Spring tournament was held over the Droitwich Golf and Country Club course on Tuesday, 23rd May.

Thirty four greenkeepers took part, and after a pleasant mornings golf over 9 holes, the weather took a turn for the worse, and a steady downpour throughout the afternoon made playing conditions more difficult. The Ransomes Cup and Gold Watch was won by Roger Pullen with a *nett score* of 102½ for 27 holes.

The Sutton Cup for the best *gross score* went to Bill Marnock with a 27 hole total of 117.

Other leading scores:

2 R. Goodwin	106	Nett
3 A. Jamieson	106	Nett
4 A. Cutler	108	Nett
5 A. Kite	108	Nett

6 P. Jones	111	Nett
7 W. Barton	111½	Nett
8 D. Haynes	111½	Nett
9 C. Frost	112	Nett
10 V. Smith	112½	Nett
11 A. Boffy	113	Nett
12 D. Brazier	113½	Nett

The Visitor's Prize went to J. Coldicott, with a score of 68 nett over 18 holes.

The Prizes were presented by the President of the Droitwich Golf and Country Club, Mr. A. D. Brackston.

Mr. Brackston extended a warm welcome to greenkeepers to the Droitwich Club and also paid tribute to Walter Drewitt for the high standard and improvements to the course since he had come to Droitwich as Head Greenkeeper.

Mr. Brackston asked all present to join him in liquid refreshment, and so ended a most enjoyable day.

We send our thanks to the following Trade Firms for once again donating to our Prize Fund: Messrs Ransomes Ltd., Fisons Ltd., Flymo Ltd., Sutton & Sons Ltd., Stewart Seeds Ltd., F. W. Lees & Sons Ltd., and Sparkbrook Golf Ball Co., Ltd.,

### Greenkeepers v. President's Team

The Annual match between Greenkeepers and Mr. Bretherton's team took place at Handsworth Golf Club on Thursday evening, 15th June. Despite dark clouds, play got under way by 5 p.m. but by 6 p.m. heavy rain set in and most players were soon soaked through. Nevertheless, all agreed that the course was in excellent condition, and this seemed to favour Mr. Bretherton's team who ran away with the match by 10½ games to 1½ games.

The match was followed by a first class meal provided by our President.

The Club Captain, Mr. R. Whittington, proposed the loyal Toast, and extended his welcome to all present to the Handsworth Golf Club and said how pleased he was to see such a fine turn out for Mr. Bretherton.

Mr. Bretherton said how grateful he was for the assistance he had received from the Handsworth Committee for helping to make the arrangements for this event, and in particular Mr. John Bate, Chairman of the Competition Committee.

Mr. J. Carrick, the Association Chairman, thanked Mr. Bretherton for his hospitality throughout the day and paid tribute to Vic Smith for the fine condition of the course.

George Hart, on behalf of the Greenkeepers, thanked Mr. Bretherton and his players for making this evening such a success, for the

### Spring tournament

Our Spring tournament was held at Brynhill Golf Club on Tuesday 18th April 1972. The weather was good and we had a very nice day. The competition played was a 27 hole medal which produced an excellent score by M. Clisset.

The winners were as follows:-

#### Division I 0-18

1 M. Clisset net score 104 - Umbrella  
2 D. Cheetham net score 113 - Wine Glasses  
3 J. Martin net score 113½ - Golf Shoes  
4 J. Rees net score 113½ - Lighter

#### Division II 18-24

1 W. Jones net score 123 - Shirt  
2 O. O'Rourke net score 133 - 6 Golf Balls

### Thanks

We thank the Captain and Committee of Brynhill Golf Club for the courtesy of their course. Thanks, also, to those who contributed to our prize fund this year.

We give thanks to our President, Mr. C. Murphy, and our Vice President, Mr. W. F. Payne, for being so kind in doing all the accounts and cards for the day.

### New members

A warm welcome is extended to the following new members to the Welsh Section:- Messrs D. Gould, N. Partridge, R. M. Salvage, W. Woodham and H. Russel.

### Draw books

Thank you to the members who have sold their raffle tickets for the *Dunlop Masters*, and to those who haven't this is your last chance to be in with a chance.

Get them out, gents, and if you read the small print it says *all counterfoils, unsold tickets and monies must be returned to the Section Secretary by Monday, 21st August*, so you haven't got long.

It is in a good cause, yours and mine, the Association needs the money and the organisers the encouragement, so lets have 'em! and remember, those who intend to be at Blackpool in August, you won't be able to look Mr. Dix in the eyes if you don't!

### New members

I would like to extend a warm welcome to the following new members whose names are listed below: Messrs A. Pickford, H. D. Lumm, N. Stapley, F. McDonald and D. Conroy of the Hartsbourne Country Club, S. Bridges, P. Seymour and P. Watts of South Herts G.C., T. M. Shipp of Stowmarket G.C., C. N. Butler of Thornden Park G.C. and B. Valentine of Reading G.C.

### Autumn tournament

The Autumn tournament has been arranged to take place on Wednesday 6th September at the Maidenhead Golf Club. Monday 21st August will be the closing date and the entries should include the NAMES of yourself and your partner, CLUB and LOWEST HANDICAP.

Nearest Station - Maidenhead (3½ miles) - Bus service from station.

### Mr. A. E. Creese

Mr. A. E. Creese of 43 Ivy Lane, Bognor Regis, who has been a member of the Bognor Regis Golf Club's Artisan Section for 15 years was elected their Captain for the second time at the recent annual meeting. He previously held the Captaincy in 1963.

From 1959 until he retired last April Mr. Creese was Assistant Greenkeeper at the Club He now works part time on the course,

He has been playing golf for 54 years and has a handicap of 9.

# The right bag for your club

The success of any golf club depends to a great extent on the standard of turf on the course. The better the turf, the higher the standard of performance, and the greater the enjoyment of play. Skilful greenkeeping and S.A.I. Turf Foods' scientific formula give the growth that hard working turf needs to look fresher, play better, stay stronger longer. S.A.I. Turf Foods' acidifying action discourages worms so turf stays cleaner as well as greener, and their granular form means easy handling and spreading with no drift.

# The broad view

Ransomes reputation for gang mowers needs no elaboration here, we're among professionals. Two types of gang unit are available, the Sportcutter for a finish perfect for golf courses and parks, and the Magna, where finish is not the prime factor, and grass up to 8" high can be dealt with.

These quick-coupling units can be used in gangs of 1, 3, 5, 7, 9, to cover a wide application of cutting tasks.

Sportcutter and Magna units can also be built into a mounted 3-unit mower for use with standard tractor 3-point linkage, cutting 7 ft. wide.

Your local distributor has the full story, which he'll be happy to tell you.

## Check these features

NEW heavy rear rolls for even faster, smoother cutting.

Impact-resistant cutting cylinders.

Universal framework eliminates build-up of grass cuttings.

Hardened steel gears for positive drive.

Quickly removable cylinder for rapid mid-season grinding.

Width of cut from 2 ft. 6 in. to 20 ft. 6 in.

Ransomes Sims & Jefferies Ltd., Ipswich.
