## FOR THE BEST IN SPORTICULTURE SERVICES

Appointed Sales Distributors for all leading makes of Machinery - Mowers - Seeds - Fertilisers - Accessories

a range of seeds and fertilisers suitable for use on ANY TYPE OF SOIL, the result of years of patient research under all playing conditions. London and Southern Counties Distributors for the fine range of Mommersteeg pedigree grass seeds

VERDANT GRASS MIXTURES FOR THE GOLF COURSE. All verdant seed is treated with bird repellent.

VERDANT NO. 8. A superfine mixture without rye grass for Golf Greens.

VERDANT NO. 9. A mixture of superfine grass seeds without rye grass for good quality greens at a lower price.

VERDANT NO. 10. A blend specially mixed without rye grass for Fairways and Tees of a sandy mixture.

Mixtures containing S23 and other selected grasses.

VERDANT NO. 11. For Tees and first-class Fairways on the heavier loams.

VERDANT NO. 12. An all round mixture blended for Fairways and Tees subjected to hard wear.

### VERDANT FERTILISERS

VERDANT F1. Spring and summer semi-

organic fertiliser for fine turfs. A fertiliser which can be applied from March to July to provide a steady feed combine with a tonic to promote a healthy, vigorous turf. VERDANT F22. A higher nitrogen fertiliser for fine turf designed to produce a quick initial response combined with a steady growth throughout the season.

VERDANT F2. Spring and summer granular fertiliser for Fairways. A balanced feed which may be used from March to July to give a strong healthy growth of good colour.

A COMPLETE RANGE OF STRAIGHT FERTILISERS ALWAYS IN STOCK. COMPOUND FERTILISERS MIXED TO YOUR SPECIFICATION.

Consult our free advisory service on all problems of Course Maintenance and Equipment.

it up...

## Warren's<sup>®</sup> A-34 Kentucky Bluegrass Comes Back Faster!

Warren's A-34 Kentucky Bluegrass (*Poa pratensis*), grows vigorously in shade and sun alike. It is proving to be the best all round grass for use on sports-grounds, parks and recreational areas. Its ability to recover quickly from injury makes it ideal for sowing down golf tees and all those areas receiving wear and tear.

Warren's A-34 Kentucky Bluegrass will tolerate up to 65% shade when maintained at a two inch cutting height. On open sites it can be mown down to 3/8ths of an inch, still grow vigorously and retain its power to recover quickly. It is the one pure strain of bluegrass seed that will thrive in shade and sun and tolerate a wide range of soil and climatic conditions. It is not necessary to blend A-34 with seed of other species or strains and the best results have been obtained from using it neat at a low seeding rate.

Warren's A-34 Kentucky Bluegrass has been under observation by turf grass research departments of leading Universities and other research organizations in the United States and they have all given it a high rating for disease resistance and shade tolerance.

## We make people see green

Golf, cricket, bowls, tennis, whatever the game, Suttons can supply the right mixture of grass seeds.

But sometimes it is necessary to devise prescriptions to meet special conditions. And sometimes problems arise in turf management which call for specialist advice.

This is where Suttons unique knowledge comes in, knowledge gained by years of planting, growing, blending and experimenting. Our team of experts, headed by Bob Palin, will be delighted to help you.

Send today for Suttons 1972 catalogue for the full story, as well as lots of useful information and ideas. This is free and gives you a ready guide to the best range of grass seeds and turf dressings on the market. It is also a sound basis for your own turf care ideas.

## Late date

Although power cuts are now in the past, when they were with us they prevented the printer from doing his job. We must apologize for the late publication of this issue but it really was beyond our control.

## Did you know . . . ?

. . . That there are 17,200 acres under hops in Britain; 5,000 less than in 1971. But this does not mean less beer. Brewers extract more from the whole hop and the proportion effectively used is increased.

. . . That a new irrigation sprinkler has a 1,200 foot span and covers 25 acres with each revolution. It does not look to be the kind of device which players easily turn off. But they would presumably be playing on the dry side of the course.

## Hoofmarks

New rules laid down by The Animals Act which became operative last 1st October, concern golf courses in agricultural areas.

It remains a farmer's duty to fence in his stock. It is not the golf course's job to fence them out. Thus compensation will be due for any damage done.

But the old rules about detaining and selling trespassing live stock are abolished. Now you may detain stock not under anyone's control but the right to detain others ends after 48 hours unless the police have been notified, and the owner if he is known.

Animals must be released if their owner offers a sum meeting a reasonable claim for damage and expense due to trespass. If there is no damage or expense, he is entitled to repossess them.

If you do decide to detain stock, you must give them reasonable feed and care.

*The Editor.*

## Shorter, more strategic courses on horizon

by

C. E. Robinson, *President American Society of Golf Course Architects*

When all is said and done, money is what makes business tick, and budgets certainly dictate the number of new courses to be built and older ones to be remodelled. With tight money the past two years, many plans for building and remodelling have been shelved. However, in the past six months there have been several positive indicators that construction activity will be strong in 1972. In addition, most developers feel that a golf course is a must in a resort complex or quality residential development.

Since money is a factor, many of these new courses will be shorter than the standard 18-hole courses. With land at a premium, many will be par 60, or executive length. Although shorter, they will require as much, or more, strategy on the part of the player. Golf course architects are requiring accurate club selection and shot placement by the strategic location of multiple tees, hazards, and smaller greens.

Although the trend toward shorter courses may not please the touring pros (although there still are plenty of championship and standard 18-hole courses being built), the new type courses are preferred by businessmen, senior citizens and women. The executive-length course doesn't require five or six hours to play and it doesn't have the long par-5 holes that discourage many golfers.

In all current golf course design—remodelling as well as new courses—easy maintenance is a prime consideration. The golf course architect, while planning the most challenging course he can on the available land, also must think ahead and give the golf course superintendent a layout that can be maintained at peak condition with the modern equipment and supplies now available. Monster holes that require a great deal of hand mowing, raking and watering put too great a dent in the superintendent's schedule and budget.

The American Society of Golf Course Architects is most interested in preserving the green belts in our urban areas, many of which are golf courses, and many of the design techniques used on the shorter executive courses can be utilised in the remodelling of some of our older courses, giving them new dimensions for years to come. With the many executive-length courses now on the boards, it appears that golf soon will have a course for everyone—championship, standard, executive, and par-3. And if you don't have every type in your area, remodelling tees and greens can give a standard course the versatility to stretch itself into championship length, or shorten itself for ladies competition. With this planning, it seems certain that golf will continue to be the most popular sport with our leisure-conscious population.

## well-seasoned.

We may be a new name to you, but we have been in the business of supplying and servicing professional machinery for nearly 70 years.

# The Green Committee

## its functions and malfunctions

Fred M. Adams, M.D.

*Serving in an advisory capacity and acting as a buffer between the superintendent and the membership, the green committee can make a true contribution to its golf club*

Having served as the green committee chairman at Orchard Lake (Mich.) CC for 14 years, I have made some observations regarding this important committee's functions and malfunctions from both the committee's and the superintendent's points of view.

Committee responsibilities in a country club have always been an enigma to me. On one hand, the board of governors goes to great lengths to hire competent and well-trained club managers, golf professionals and golf course superintendents; it then turns right around and appoints committees composed of interested but poorly trained, thoroughly inexperienced club members who are eager to run the operation. In many instances, this paradox leads to undermining the trained personnel, and inefficiency, confusion and chaos are the result.

Many golfers picture themselves as agronomists merely by virtue of having played golf for many years and at many different courses. They have drawn their own conclusions as to what makes a great golf course from both an architectural and maintenance point of view. With their appointment to the green committee, the self-styled "agronomists" finally have the opportunity to implement all the changes they've dreamed about and can hardly wait for the first committee meeting to present all of their ideas for course improvements.

In actuality, how much preparation do green committee chairmen have for this job? They probably have lawns at home which are fertilised regularly, watered irregularly, sprayed occasionally for weeds, and mowed about once a week with surprisingly good results—but they certainly are not, by any stretch of the imagination, agronomists. Chances are they have no concept of plant morphology in relationship to what the fertiliser requirements may be; have never heard of the types of subsoils or their makeup in relationship to the types of subsoils or their makeup in relationship to maintenance procedures; think *Poa annua* is a rare, exotic potted plant and Dollar Spot has something to do with the Internal Revenue Service. In short, most green committee chairmen are ill-prepared to offer much in the way of constructive criticism to a superintendent's turf maintenance programme.

### Selecting the chairman

Therefore, the board of directors should select a chairman who realises he does not know much about agronomy and is satisfied to leave the enormously complex problems concerning the growing of grass to the man who has been trained for this job—the superintendent.

The projected tenure of this chairman is equally important. In my opinion, no man should be offered this job unless he is willing to serve for at least five years and possibly longer. As it takes at least two years for the chairman to begin to understand the inherent complexities and uncertainties that arise with managing turf, the green committee chairman should have had an indoctrination period of two to three years as a committee member prior to being offered the chairmanship. This will give the superintendent an opportunity to make his own observations concerning the abilities and temperaments of green committee members. The club president would do well to consult and heed the superintendent's feelings when appointing a new chairman.

## Pattisson

What should the green committee's functions be? *It should act primarily in an advisory role rather than in a supervisory capacity.* There are problem areas related to turf management with which even the best trained superintendent needs help.

### **Value of communication**

Communication is one area in which the green committee should assume prime responsibility. It should act as a buffer between the membership and the superintendent. When unforeseen problems as well as planned construction and reconstruction projects arise that affect playability of the course for any period of time, members should be apprised of these contingencies so they won't hound the superintendent and make his life miserable. The blow can be softened if the membership is informed through the newsletter, a special communication or word of mouth. When presented with the facts, most members will accept the inconveniences, especially when they realise that the improvements are being made for only one purpose—to further their enjoyment of the game.

However, it is up to the superintendent to initiate the flow of information to the committee so that it can be properly disseminated. Nothing would be more embarrassing or frustrating to a committee member than to be asked why certain procedures are being carried out when he himself does not know what is being done and why. The club manager and golf professional staff must also be informed about the superintendent's plans for the course. It is vital that the golf club's three departments coordinate all their activities at all times, preferably in writing. What a ridiculous situation arises when the greens are aerified the day before a special tournament simply because the superintendent was not notified of the event.

Another area in which the green committee can offer invaluable help to the superintendent concerns personnel relations. While all costs are constantly rising, the biggest increase in today's green budget is due to the labour force. To forestall union activity, country clubs had better be aware of competitive wage scales and be prepared to offer such commonly accepted fringe benefits as medical and life insurance and pension plans for the green crew. Many superintendents are generally unfamiliar with all the complex ramifications of the various benefit plans. Therefore, there should be someone on the green committee who has experience in personnel management and labour negotiations, so that he can properly assist the superintendent.

It is also practical to have an individual on the committee who is knowledgeable about machinery to aid the superintendent in making an inventory of all his mechanical equipment and prepare a long-range plan for an orderly and sensible replacement of these items. Such planning eliminates having to go before the board of directors and ask for four new greens mowers, two new tractors and one seven-gang fairway unit—all in one year!

To elevate his status in the members eyes, the superintendent should appear before the board of directors at their regular meetings. He should most certainly be present to seek board approval for a major capital expenditure either for equipment or renovation procedures, so that he can answer any questions that arise.

### **The superintendent's image**

Many golf course superintendents do not exhibit enough self-confidence. This should not be the case, inasmuch as they are generally well-educated scientists who know far more about growing turf under the most trying conditions than any member of his green committee. But too often superintendents compromise their well-founded principles of agronomy for fear of losing their job if they incur the wrath of a committee chairman. No one expects them to know all the answers and it is realised that unexpected weather conditions and plant diseases occur that can make superintendents look bad. It is also realised that not all the mistakes that endanger turf are the result of Mother Nature's vagaries, an unco-operative and demanding manager or an un-

# The earlier you let us service your Atco this winter the happier you'll be.

Every winter the Atco Service Organisation is snowed under with mowers waiting for their annual service.

This rush starts in early December and lasts all the way through to late March. And as each mower receives the personal attention of skilled mechanics each job takes a considerable amount of time. Consequently the queue of mowers waiting for service grows longer and longer. Obviously it's best if you can get your machine to us before the rush.

That way you get your Atco serviced, oiled and greased for its winter hibernation and back to you quickly. So you're left with plenty of time to get on with the more important winter jobs without any worries.

The same goes if you want a new machine. Order it before December and you can be sure of a swift delivery.

So contact your local Atco branch early this winter. We'd be happier if you did. And so will you.

reasonable board of directors. Intellectual honesty on the part of a superintendent is appreciated. Making excuses for errors in judgment is not the way to inculcate the confidence that is so necessary for the green committee to have in the superintendent. The committee will quickly learn to respect a man for his opinions and judgment if he is forthright and can back up his statements with scientific facts and logic. If the superintendent does not have an answer to a given problem, he should promptly admit it and show willingness to try to find someone who may have the solution.

The superintendent should take it upon himself to introduce his entire crew to the green committee. On the other hand, committee members should familiarise themselves with the crew members' names and their jobs. Nothing motivates most workers toward conscientious performance of their jobs more than recognition.

### **Avenues of improvement**

There are other possible avenues toward image improvement for the superintendent. One is the establishment of an accreditation board for superintendents, which the Golf Course Superintendents Association of America is currently working on. This programme should elevate the golf superintendent to the professional status he so richly deserves. It is about time the golfers throughout the world appreciate what it takes in "blood, sweat and tears" to grow and maintain turf. Certification is likely to encounter opposition from some superintendents—possibly from those who have not had formal education in turf management and who fear that the examinations will be devised to expose their lack of such an education. The examinations, therefore, should be designed to test an individual's practical knowledge of currently accepted turf management principles, thus assuring a potential employer that the accredited superintendent has been trained either through his own experiences, enhanced by regular attendance at turf conferences and refresher courses, or through a formal educational programme leading to a degree in agronomy.

Superintendents can also avail themselves of the visitation service of the United States Golf Association Green Section, which offers on-the-spot evaluation by experts in the field. The protection this service gives to the superintendent against a committee demanding unrealistic course or maintenance procedure changes is of prime importance. Conversely, not all superintendents are as knowledgeable as they appear and maintenance procedure changes that should be brought about can be better and more subtly accomplished by these experts.

Membership in the Golf Course Superintendents Association of America and local GCSA chapters should be a must for all superintendents. They should also attend their annual national conference and regional GCSA chapter meetings. Equally important are turf conferences sponsored by state universities to relate the turf research they are doing, superintendents as well as green committee members can benefit by attending these conferences. Such conferences will quickly teach green committee members to appreciate the complexities involved in growing grass. It is interesting to observe these men become more humble and less dogmatic in their attitudes toward the well-trained superintendent.

Each club would benefit by having a registered golf course architect on a retainer basis. Much money is wasted and many golf holes are ruined by the amateurish attempts at renovation by the green committee. One of the greatest insurance policies a membership can have against such a situation is through the services of a good architect.

In any efficiently run, successful business, appropriately trained individuals are given the responsibilities of the many facets of the operation. Why can't golf courses be managed on a similar basis? The superintendent as an agronomist should be treated and respected as the scientist that he is and be given the responsibilities that are obviously in his domain, with the green committee assisting him in an advisory capacity and also serving as a buffer between him and the membership.—*With grateful acknowledgements to 'The Golf Superintendent'.*

# PRO OR AM?

Patrick Smartt

It would not be inaccurate to say that golf course architects (I know three, though not closely) in general view golfers, in particular committees, as morons. Golfers, in their turn, incline to regard the architect as an invention of the devil, and the committee morons for calling upon him. They dislike paying out money for a task they consider could be carried out by themselves.

I have in mind alterations to existing holes. It should be obvious that the planning of a new course out of virgin woodland, or using to their best advantage the sweeps and folds of commonland can be left only to the professional designer. He has three primary qualities: knowledge, experience and imagination. He can see the wood for trees.

Though, to adapt the words of P. G. Wodehouse (I think in reference to bishops), the incidence of insanity among architects is not high, two of these gentlemen, of different firms and editors of different journals, have accepted my effusions. I put that forward as the reason for my presumption in discussing the make-up of golf holes. I have been on both sides of the fence. During 25 years in the colonies (an archaic word), in the absence of anyone else I was invited on three occasions to 'improve' holes, thus becoming, may I be forgiven, an amateur architect. The bush had already been cleared, inevitably in dead straight tram-lines . . . no imagination.

A good golf hole is one that makes the useful player scratch his head a bit when on the tee. His drive must be placed so that the green, if not the flag, should be 'open house' for the second. But, *and this is important*, the ordinary club member who is not looking for and unlikely to achieve a four, must have an alternate route so that he may enjoy his game; which when all is said and done, is the reason why he pays a subscription. And that surely is the practical idea of a hole. It is possible for a single, intelligently sited bunker to govern the tactical play of a hole.

In this discourse I should mention, with the purpose of my editor retaining his reason, that there is a clause in most journals to the effect that the editor does not necessarily agree with his contributors' opinions.

It is interesting to take a look at some old courses that have not altered over the years. It can be that even the old die-hards would agree with certain changes. I believe that the first act of an architect would be to abolish a large number of bunkers. These in the old days were placed to punish the poor players. A stupid policy, for in that category he has quite enough on his hands in reaching the hole at all. Those pointless bunkers, those ancient barrows planted with primness on either side of the fairway to catch the sliced or pulled drive, and repeated some way from the green to trap the inferior second. They are, so far as the good striker is concerned, redundant. Today he can carry them. Fill them in. They cost money in upkeep. Let the long-handicap player when he errs, which is often, finish in the rough; that will give him plenty of food for thought. The erasing of bunkers should be left to an architect, otherwise you have conflict in the club between the habitual slicers and the habitual hookers.

It is the good player who should be challenged, both in his thinking and his stroke-making. He must be forced to calculate risks: by how much dare he cut off a corner, will it or will it not pay him to go for the pin with his next? He should be made to think on every stroke in the round.

There is a school, small, may Allah be praised, who wish to replace rough grass, heather or bracken—with trees. In earlier days a ball in the rough could be counted as costing half a stroke. With trees it depends which side of the tree the ball strikes.

The only bad hole is one that is featureless and dull. Luck? We hear too much of so-called unfairness. Bernard Darwin when writing on this asked: "Do we wish to raise the game to the bloomless heights of chess?" I confess to a weakness for blind holes—fun and luck. I can, however, picture what would happen to the professional designer who introduced one into his plan. And yet life consists of wondering what lies on the other side of the hill.

There is a delusion that a good player can lay out a good hole. There was a famous amateur international, a good friend of mine now dead, who for no apparent reason layed down a green close to the existing one. I paced its area one day. Seven paces wide, 12 from front to back. He did me the honour of asking what I thought of it. My reply was that given a medium or long iron to this unwatered green, I would bet against Henry Cotton at his best leaving the ball on that green more than three times in 20 attempts. It was never used.

I recall a course which was altered by a famous professional. The members, who contributed to the cost, now find it takes half an hour longer to complete the round. There is a new short hole, a feature of which I cannot fathom. The teeing-ground is at the top green defended immediately in front by a stream. An out-of-bounds fence on the *left*. Just over the water hazard and a sentinel over the left entrances to the green stands a tree. The right-hand side is open, calling for a downhill chip. So far, so good. But just beyond that tree is a bunker. What for? One or the other is dispensable. That is an isolated case. If alterations are to be made, I come down heavily on the side of the Pro architect against the Am.

There remains one question. Provided the course is not one of those that caters for professional tournaments, or upkeep is a burden, why not leave things as they are? In short, committees are not elected to change a course.

## 60 golfers join Omega Hole-in-one Club in 1972

No less than 60 golfers have joined the Omega Hole-in-One Club, founded this year and open to all golfers belonging to recognised U.K. and Irish golf clubs scoring a hole-in-one while playing for the Captain's Prize.

Each of the golfers achieving this feat has now been presented by Omega with one of the Swiss watchmakers' Chronostops, inscribed with the player's name and the date on which the hole-in-one was scored. The most successful club to take part in the scheme was the Knock Golf Club, near Belfast, with the surprising tally of three hole-in-one scorers in the Captain's Prize. This remarkable feat was achieved by Mr. V. Skillen and Mr. A. V. Reid (both 16 handicap players) and Mrs. W. T. Dawson (handicap 26), from the ladies' section.

The Southport and Ainsdale Golf Club, Southport and the Peterborough Milton

Golf Club, Peterborough, also each produced two qualifiers.

Irish golfers were well to the fore with 10 players from the North and Eire qualifying. Seven Scottish golfers scored holes-in-one in the Captain's Prize, and Mr. Dennis L. Jones from the Morrision Golf Club, Swansea, was the sole Welsh representative. Out of the 60 players qualifying, 11 were ladies.

Commenting on the scheme, a spokesman from Omega said: "We have been delighted with the response given to our 'Hole-in-One' Club in its inaugural year. Over 1,000 clubs signified their wish to take part in the scheme, and we have had a most enthusiastic response from golfers joining the Club and our dealers have been delighted to be associated with the presentations made at the various clubs." Omega will be advising clubs about next year's plans in the New Year.

### Appointments at Sisis

Sisis Equipment (Macclesfield) Ltd. announce the following appointments and internal changes effective from 1st January, 1972.

Albert Howe, Sales Representative for many years, who will be well known to many of our customers, is now based in North Wales and will cover the North Wales, Shropshire and the Wirral area, and his telephone number is Deganwy 83486.

Ken Heath, Sales Representative, also well known to many of our customers, will be covering the Lancashire/Cheshire area, telephone number Wilmslow 25478. Adam Cargill, is moving from his present location in Glasgow, and will be based in Dumfermline, telephone number Dumfermline 26661, to cover the East of Scotland. He will have overall responsibility for Sisis Sales and Service for all Scotland. He will be supported by Mr. Eric Burgess, who has had considerable experience as demonstrator with Sisis Equipment (Macclesfield) Ltd., and has been promoted to Sales Representative to take his place in the West.

An addition to the Sisis staff is Mr. Barry Cummings, who takes over as Demonstrator, and will be based at Macclesfield.

### Peat land handed over

Fisons have handed over to the Lincoln-

shire Trust nearly 300 acres of peat land between Goole and Scunthorpe. Nature Conservancy indicated that this was a site of special scientific interest with an unusual diversity of ecological situations to encourage plants found in only a few other localities.

Certainly after peat has been removed, if one can use the vast Irish peat fields as an example, ecological situations settle down to one vast brown, barren waste, which not only seems to go on and on but also down and down.

### Hayters exports rise by one-third

Export orders during the past 12 months were up by 30 per cent over the previous year, it is announced by Hayters Ltd., of Spellbrook, Bishop's Stortford, Herts.

Exports have accounted for an increasingly larger share of Hayters' turnover in recent years, and the past 12 months' figures represent nearly a quarter of the company's turnover. During the year the company appointed new agents in Greece, Norway, Ethiopia and Nigeria. In addition to the continued expansion of its overseas orders, the company's home sales also showed an appreciable increase last year.

### Autumn tournament

Our Autumn Tournament was held on Thursday, 23rd September 1971, at the Ponteland Golf Club, by kind permission of their Captain and Committee.

### RESULTS

Best Scratch score over 27 holes: D. Cooper (Wickham G.C.) 117—Joseph Miller Salver and Table Lighter. The Ransomes Cup and Watch was won by P. J. Bryne (Dinsdale Spa G.C.) for the best nett 107½.

March 1972

2nd. T. Nutman (Tynemouth G.C.) 112—Blanket and the Jack Wroath Trophy for the over 50 age group.

3rd. C. Maston (Billingham) 116—Travel Alarm.

4th. S. Graham (Newbiggin) 116—Flannel Sheets.

5th. G. Gainford (City Newcastle) 118—Bed Spread.

6th S. Pope (Tyneside G.C.) 118—Blanket.

7th. G. Thompson (Goswick G.C.) 118—Pocket Watch.

8th. S. Farrington (Warkworth G.C.) 119—Table Lamp.

9th. C. Baxter (Whitburn G.C.) 120½—Lighter.

10th. T. Oliver (Gosforth G.C.) 123—Shopping Bag.

11th. J. Richardson (Tyneside G.C.) 123—Alarm Clock.

12th. W. Arrowsmith (Gosforth G.C.) 124—Bed Rug.

13th. T. Robson (Ravensworth G.C.) 124—Towels.

14th. A. Lowes (Chester-le-Street G.C.) 126—Knives and Forks.

15th. J. Carss (Dunstanburgh Castle G.C.) 128—Casserole.

The Association Prize went to R. Hinson (Tynemouth G.C.) 108—Casserole.

Our Chairman J. Simpson thanked the Captain and Committee for the courtesy of the course and club house; he then introduced the Captain Mr. Bolton and the Chairman, Mr. Batley of Ponteland Golf Club, who had a few kind words to say to the section. Mr. Bolton then kindly presented the prizes. Our chairman than thanked the Steward and Stewardess, and staff for two most enjoyable meals. Thanks must also be given to J. Simpson and his staff for the splendid condition of the course.

Thanks to our Chairman, Norman Fraser, Jim Taylor, and Graham Forbes, for their work with the score cards, and to Tom Oliver for his work with the raffle tickets. Our thanks are due to the members of the trade, and golf clubs for kindly contributing to our prize fund.

### Spring competition

The Spring Competition will take place at the Gosforth Bridle Path Golf Club, on Thursday, 20th April 1972, by kind permission of the Captain and Committee. This will be an 18-hole event, starting at 1 p.m., arrangements can be made for those staying for tea.

## New members

We welcome to the section P. J. Bryne, Head Greenkeeper of Dinsdale Spa Golf Club, and P. Dawson, first assistant of Westerhope Golf Club, and hope their association will be a happy one.

### Lecture

Our thanks to Mr. A. R. Woodhouse, B.Sc., of the STRI, Bingley, for the very interesting talk and the excellent slides with which he illustrated his lecture on the various fungal diseases which help to keep the greenkeeper on his toes, in his battle to give his members the best of courses to play on.

### Spring tournament

Due to the kindness of the Captain and Council of the Hillside Golf Club, Southport, we have been granted the courtesy of the course, for the playing of our Spring Tournament on Thursday 18th May 1972. Once again I ask you to please let me have your entries as soon as possible to facilitate catering arrangements, etc. Further details if necessary in the next issue of the journal.

C. A. MOORE  
(Stanmore)

### January lecture

Thirty-three members were present at the Ship Tavern on Wednesday, 5th January, and spent a very pleasant and rewarding hour listening to Mr. Robert Morris talk on green-keeping in general. Aided by a small but efficient projector he covered a wide range of subjects, mainly topical, such as FUZZ, WORMS, MOLES, DRAINAGE, etc. Members troubled by moles may be interested to know that a treatment of lead arsenate all around a tee, for instance, will keep the moles out of that area—they will not penetrate the ring.

Question time found its way back to automatic watering again and Mr. Morris agreed that the draining systems of most of our golf greens were not adequate to take the amount of water made available by POP-UPS. Until such times as the greens were lifted and re-drained, problems such as thatch, etc. would occur, and in any case a programme of scarification and aeration would have to be carried out.

Our thanks to Bob Morris for making the journey from Levington to lay on such an interesting and educating evening for us.

#### Trip to Ransomes

There will be a coach trip to Ransomes at Ipswich on Wednesday, 12th April and as in previous years the arrangements will be the same.

A coach will leave Charing Cross underground station (EMBANKMENT SIDE) at 8 a.m. sharp, arriving Ipswich 10.30-11 a.m. A tour of the works followed by lunch at 1 p.m. Continued tour of works at 2 p.m. with approximate departure for London at 3 p.m. So that members may obtain as much information as possible on the trip, I have been asked to limit the number to 40. Members wishing to avail themselves of this enjoyable day out let me know as soon as possible. First come first served!

The coach will pick me up at Hendon Golf Club at 7.15 a.m. Members finding this more convenient, will be welcome with the warning that it WILL leave at 7.15 a.m.

I have written to the London Golf Captains Association to let them know of our intended trip and to thank them for their splendid donation to our funds which helps to make these trips possible.

#### Bereavement

It is my sad duty to report the sudden death of one of our oldest members—A. M. Webster, Head Greenkeeper at Bush Hill Golf Club. He died on Thursday, 30th December. 'Mac', as he was known to all his friends, was greatly respected at the club and indeed by all who knew him. This was evident by the number of people who attended the funeral. In her letter to me, Mrs. Webster said he was 69 and had been with the club for 33 years and that it was even more sad as he had been contemplating retiring shortly and was looking forward to a few years of leisure after a hardworking life. In his earlier years he had led a varied life and had at one time played professional football for Scunthorpe United.

The funeral took place at Enfield Crematorium on Thursday, 6th January, and a sheaf of flowers was sent from all his friends in the Southern Section.

#### New members

A warm welcome to two new members and an invitation to attend our meetings and meet new friends: Donald J. Tilehurst, Sales representative to Maxwell Hart and Eric D. Williams, of Langley Park Golf Club.

### Old friends

The following list are names and addresses of Class F members of this section, i.e. life members, retired head greenkeepers who have done so much for the Association in the past by their attendance at meetings and services on committees, etc. To let them know that they are not forgotten men, our Chairman, Charlie Moore, visited several of them at Christmas taking with him a bottle of their favourite Christmas spirits. Money gifts were sent to the widows of recently deceased members and I understand that all our Class F members will be contacted as soon as our new benevolent fund builds up again.

I am sure they would all like to hear from some of their old friends and if anyone with a car in those areas could make contact and pick them up to bring them to a meeting, Annual Dinner, etc., this would also be much appreciated.

G. T. Atfield, 2 Old World Cottages, Camber, Nr. Rye, Sussex.

C. R. Cooke, 64 Fox Holes, Queen's Road, Weybridge, Surrey.

C. Chamberlain, 38 Talbot Avenue, Stud Hill, Herne Bay, Kent.

### Offer of help

I am very pleased to be able to tell you that I have now been offered help in the running of the Section. This offer comes from Mr. David Green of Huxley Garden Machinery and I am accepting it with open arms.

### Spring tournament

The Spring Tournament will be held at the Rowlands Castle Golf Club on Tuesday, 18th April 1972. I am awaiting confirmation of the Summer and Autumn Tournaments.

### New members

The following new members are welcomed to the Section: John R. Stinson (Burley G.C.), Donald J. Hall (Goodwood G.C.), Joseph C. Newman (Ferndown G.C.), Cyril G. Grubb (Ferndown G.C.), Harry W. Care (Ferndown G.C.), Ian P. Rickman (Ferndown G.C.), John Farmer (Goodwood G.C.), Percy Farmer (Goodwood G.C.), Nicholas Devonshire (Sherborne G.C.), Raymond Howlett (Ferndown G.C.) and a welcome to J. Moore, transferring from Langland Bay Golf Club, Swansea in the Welsh Section to take over as Head Greenkeeper at Lee-on-Solent G.C.

## News of Paul Voykin

Extracts from *The Golf Superintendent*

"Indefatigable Paul Voykin, superintendent at the Briarwood Country Club, Deerfield, Ill., informs us that he is running unopposed for a park board commissionership in Lake Bluff, Ill. He also has begun work on his second book, which is designed to tell the new homeowner how to landscape his property without going bankrupt. You may recall that his first book is titled *A Perfect Lawn the Easy Way.*"

# Easy Guider

Climb aboard the Ransomes 'Twenty-Four' Ride-on and you're ready to take lawns, golf tees and approaches in its stride. If there are trees and flower beds to be negotiated you're really on a winner. There's no easier Ride-on to control, differential gearing and complete accessibility of all controls from the driving seat ensures that. A mower that is such a pleasure to use that you take the fine finish it gives to grass almost for granted.

If you feel you need the exercise the 24" Ride-on converts to a pedestrian controlled mower in seconds. Your local distributor would love to show it to you. He's waiting for your call.

## Check these features

Dual clutches for landroll and cutting cylinder for perfect control.

Well-proven 4-stroke petrol engine, especially silenced.

Electric starter can be fitted.

2,560 square yards cut per hour. (Ride-on)

Ransomes Sims & Jefferies Ltd., Ipswich.
