NOTE:—The Authorities impose an Airport service charge on all passengers embarking on International Flights from Le Touquet. This is paid locally and the present rate is 4 F. Francs per person.

THE NEW SISIS TRIO-ROTORAKE

The build-up of 'thatch' at the base of fine grasses leads to poor greens. Using a SISIS Rotorake is a means of removing thatch from fine turf.

With the introduction of the new Trio - Rotorake, SISIS Equipment (Macclesfield) Ltd. extend their range of Rotorakes to suit most requirements and budgets.

The Trio-Rotorake operates three reels for thatch removal, thatch control and wire scarifying, but these reels are now 'snap-in' for rapid, simple interchange. Depth of cut is adjusted from the operating position. The Trio-Rotorake costs from £105.00 ex-works (plus VAT).

Other Rotorakes in the range are the heavy-duty Auto-Rotorake, priced from £283.15 ex-works (plus VAT) and the Fibamo, 12" model with optional collection box, from £65.00 ex-works (plus VAT).
