No Club accommodation.

Salary by negotiation.

Apply:

**The Secretary
Ashford (Kent) Golf Club
Sandyhurst Lane
Ashford, Kent**

NEW CURE FOR TURF DISEASES

Since its introduction, only three years ago, the systemic fungicide Benlate has revolutionised disease control in many U.K. horticultural crops. There will be few experimental workers engaged in crop disease research who have not made an assessment of Benlate's potential.

At the Sports Turf Research Institute, J. R. Escritt and A. R. Woodhouse have been evaluating Benlate for turf diseases over the past three years. The results have been outstanding.

The manufacturers of Benlate, Du Pont, have just brought out a leaflet on turf diseases recommending Benlate for Fusarium Patch, Red Thread and Dollar Spot. Benlate at 6 oz. in 2 gallons of water per 1,000 sq. feet is recommended for Fusarium Patch Control and at 4 oz. in 2 gallons of water per 1,000 sq. ft. against Red Thread and Dollar Spot. It is probable that after further work a recommendation will also be made for the control of OPhiobolus patch.

Benlate (under the name Tersan 1991) is already being successfully used on a wide scale in the U.S.A. for the control of turf diseases. There is no doubt that it is destined to
