10th	J. Risbridger (Beaconsfield)	148
11th	P. Whitehead (Shooters Hill)	150
12th	R. Plain (Beaconsfield)	151

Our thanks to everyone at the West Byfleet Golf Club for the warm and friendly way in

which we were received and looked after; to 'Mac' for the good 'nic' of the course, to the Steward, Mr Cullen, for the excellent 'Grub', no after effects yet following the deep-tynded grapefruit, scarified beef or pork, pop-up watered greens, peas, beans or potatoes and fertilized sweets with cream, nitro chalk or PS4, etc.

Mr Cullen was also responsible for a free barrel of beer via Mr Hancock of Whitbreads which meant 'drinks all round', and a bottle of Glenn Drummond for the Benevolent Fund Draw.

Again our grateful thanks to our willing band of members in the trade who kept things running so smoothly from the 'Starting' at dawn, to the Prize presentation in the evening. The proceeds from the Benevolent fund draw totalled £26-00.

Trade contributors to the Prize giving:- R. C. Craig, Ransomes, Sims & Jefferies, Pattisons & Co, Flymo Ltd, Parkers & Sons, Suttons & Sons, Maxwell M. Hart, Kingston House Mowers, May & Baker, Universal Mat Co, Huxleys Garden Machinery and Gibbs Ltd.

New Members

A warm welcome to the new Members whose names are as follows:- A. K. Gadd (New Zealand), J. P. Smith (Ellesborough), G. Moss and D. R. Piggott (Henley), P. J. W. Scales (Arkley), R. Bowey and P. C. Quarmby (Berkhamsted) and A. Morton of the West Byfleet Golf Club.

Bingley Trip

A reminder to members not to leave it too late before advising me if they intend to travel to Yorkshire on 30th September.

POLYTHENE DRAINAGE TUBING

Muntz Plastics 'Landcoil' Polythene Land Drainage Tubing was primarily developed for draining agricultural land but, in recent years, it has been used quite extensively on sports grounds, tennis courts, etc and has an application on golf courses. The piping is supplied in black only.

'Landcoil' is a 2 in. diameter tube manufactured from polythene in coils 660 ft. long. The polythene from which it is made has been selected to give a tough tube which has a high crush resistance. At the same time, it is sufficiently flexible to allow it to be manufactured in easily handled coils.

In order to provide maximum water absorption, there are 16 rows of small slots running along the length of the tube. These slots are scientifically designed to prevent larger soil particles from entering the tube. Where it is necessary to make a joint between two lengths of 'Landcoil', or it is required to discharge through an outfall into a dyke, a slightly larger diameter tube is available to sleeve over the perforated tube.

'Landcoil' may be used with or without permeable fill, except that permeable fill must be used in all situations where it would be used with conventional materials.
