## New Machine For Turf Management

For the first time in the United Kingdom, Howard Rotavator Co. Ltd. will be displaying their tractor powered 'Turf-Quaker' machines, the latest equipment in the field of turf management. Special blades operate in such a way that the turf in addition to being slit is also shaken so that compacted roots are freed, whilst the surface is hardly affected. These machines, which are proving most effective in the U.S.A. and Australia, should be of great interest to groundsmen responsible for playing fields, sports grounds, etc., whilst a hand-controlled model is available for lawns.

Hand-controlled Rotavators and the full range of Howard Bolens riding mowers and garden tractors will be on display together with some of the many attachments available for those machines.

## New Sprayer From Allmans

A new model of the Polypak shoulder mounted sprayer will be introduced at Motspur Park by E. Allman & Co. Ltd. of Birdham Road, Chichester, Sussex. Stand No. H26.

It is an 18 litre (4 gal.) version, which replaces the 13.5 litre (3 gal.) model.

A translucent polythene container is mounted on a lightweight steel frame which has an adjustable shoulder harness.

A lever operated pump provides a working pressure of 65 p.s.i. and a full range of booms and attachments is available.

Containers are interchangeable so that most types of chemical can be applied without fear of contamination.

Price of the new 18 litre model is £22.50 plus V.A.T.

## Motspur Debut For Ride-on Mower From Flymo Ltd.

A 25 in. ride-on rotary mower new to the United Kingdom will make its Motspur Park debut on the stand of the Consumer Division of Flymo Ltd. of Watford.

The new, compact Toro 25 ride-on mower is designed to speed mowing time on semi-formal grass areas of around one to two acres.

All-up weight of the new machine is 210 lb. Length is 48 in., width 31 in. including the cutter unit, and height is 34 in. The turning circle is only 62 in. to the inside rear wheel.

Also seen at Motspur Park for the first time will be the Toro Trojan 3 with three 21 in. heat-treated rotary blades providing a 60 in. cut under a heavy-duty 10 gauge steel cutter housing. With a more powerful 14 h.p. Kohler engine than the earlier 50 in. version, the Trojan 3 has a daily capacity for 15 acres of rugged grass-cutting at 3.5 m.p.h.
