

Program III—Where the fertilizer used contains less than 15% of the total nitrogen as water insoluble nitrogen:

Apply in late April and *again* in late May to early June, 7 1/2 pounds of 10-5-5 (304 pounds of nitrogen) or the equivalent per 1000 square feet.

Apply in late August to early September and *again* in late September to early October 12 to 15 pounds of a 10-5-5 (1 1/5 to 1 1/2 pounds of nitrogen) or the equivalent per 1000 square feet.

Program IV—Where soil tests shows oils to be high in phosphorus and potassium, nitrogen alone may be applied:

Apply two applications per year in mid spring and mid to late August of 6 to 8 pounds of a ureaform compound (38-0-0) (2 1/4 to 3 pounds of nitrogen) per 1000 square feet.

or

Apply in late April and *again* in June, 20 pounds of a natural organic nitrogen material (5 to 7%) (1 pound of nitrogen) per 1000 square feet.

Apply in mid to late August 40 pounds (2 1/2 pounds of nitrogen) of the same material per 1000 square feet.

or

Apply two applications per year in mid spring and mid to late August of 7 to 9 pounds (2 to 2 3/4 pounds of nitrogen) of IBDU per 1000 square feet.

Precautions

All fertilizer may burn if improperly applied. Fertilizers containing high amounts of quickly available nitrogen will burn more severely than those containing slowly available nitrogen. Natural organic nitrogen materials, IBDU, and ureaform compounds applied alone have very little

tendency to burn. However, complete fertilizers containing slowly available nitrogen may burn because of the potash content.

Always apply fertilizers when the grass leaves are completely dry, and water thoroughly immediately after application.

HEAD GREENKEEPER

for

PORTSTEWART GOLF CLUB

from mid 1975. Championship links, automatic sprinklers etc. 2nd small course in town. 8 staff. Peaceful and beautiful seaside location.

Basic 5 day week, 4 weeks holiday and overtime. Generous salary negotiable.

Send FULL details to :

The Secretary/Manager
Portstewart Golf Club
Strand Road
Portstewart
Co. Derry, N. Ireland.

NEWS

Elvin Pennants Ltd. exhibited their range of golf and other sports equipment at Motspur Park for the first time, many new items for golf and football were on show.

The 6 ft. and 8 ft. PVC flagpoles are now widely used in golf, football, and rugby, and indeed the Football Association, and Referees and Linesmens Associations have accepted the Elvin Pennants designs for equipment.

The ball washer (golf) is interesting as the greenkeepers can see the level of the water through the perspex front without leaving the tractor during their ground inspections.

The range of equipment includes:—golf green pitchforks, caddie jackets, timber and traffolite tee plaques, signs, pitch and putt equipment, golf score cards, identi-tags, bag labels, instant barriers.
