## FULLY-POWERED TRIPLE

Each fully-powered cutting unit can be raised to the travelling position comfortably from the seat.

Where the terrain is undulating the articulated mowing units closely follow the contours.

A low centre of gravity and good traction ensures that the outfit clings to the slopes.

- ★ It provides high speed mowing for long continuous periods over a wide variety of conditions.
- ★ All three rugged cutting units are fully power driven and articulated to ensure they hug the ground over surface undulations.
- ★ Multi Speed-change, instantly operated whilst in motion and incorporating a rapid-transport speed and reverse as well as a choice of mowing speeds; provides exceptional versatility.
- ★ All units raised into the transporting position by the operator from the seat.
- ★ The ultra-light steering, exceptional manoeuvrability and general ease of operation make for minimum operator fatigue and maximum efficiency.
- ★ Backed by the unique Nation-Wide Atco Service Organisation.

Demonstrations can be arranged promptly upon receipt of request to Atco

# CANNOCK GRASS SEEDS

## AND PRE-SEEDING FERTILISERS FOR AUTUMN SOWING

Little Aston G.C.

*The home of some of the many famous golf tournaments—where turf perfection is provided entirely by Cannock Products including Cannock Seeds, Fertilisers and Fusarium Specific.*

Overseas, as at home, professional greenkeepers, groundsmen and gardeners rely on Cannock Seeds and Fertilisers to create and maintain immaculate, healthy turf. In Cannock Mixtures, the finest strains available are thoroughly tested for purity and germination before being blended.

Individual strains can also be supplied on request, or mixtures made to your own prescription.

The relatively small extra cost of incorporating a suitable fertiliser in the seed bed will be amply repaid, for example:—

**Winter Feed** provides the perfect balance for winter dressing, and is an ideal pre-seeding fertiliser for late summer and autumn sowing. Winter-Feed is rich in organic phosphate and sulphate of potash, ensuring healthy root development during the winter months. Being of low-nitrogen content top growth is not forced.

**G.K.2** is a particularly inexpensive compound (ideal for large areas) with a high phosphate content for healthy root development. Ideal as a top dressing for established turf areas but also excellent for pre-seeding.

**Big savings on large quantities.** Please send for the 14th edition of "Green Keeping" containing full details of all Cannock laboratory-tested fertilisers and grass seeds, and price list.

THE CANNOCK AGRICULTURAL COMPANY LIMITED, CANNOCK, STAFFS.

Fertiliser Manufacturers and Lawn Seed Specialists since 1861.

# TEE SHOTS

**by the Editor**

Ipswich Golf Club (Purdis Heath) opened its new 9-hole relief course on 15th June. With five par-3's and four par-4's giving a total length of 1,950 yards this layout will ease the congestion on the attractive 18-hole course.

\* \* \* \*

Bowring Park Municipal Golf Course, Liverpool, may be sliced in half by the new South Lancashire motorway. Nearby Huyton & Prescot will also lose a large section of their course for the same reason. Both hope to acquire more land adjoining to make up for what they lose.

\* \* \* \*

The re-formed Beeches Golf Club in Norfolk has carved 9-holes out of neglected gorse and grass on Beccles Common, bought equipment and reached 50 members in just 18 months. All the work, clubhouse redecoration, cutting, fund raising has been done by the members themselves. It is less than 10 years since the club came defunct. Now it hopes to have 18-holes within a year or two.

\* \* \* \*

Sandwell Park Golf Club in Birmingham is undeterred by the construction of the Midland Links motorway alongside the 1st hole with an interchange system just outside the redstone arch at their entrance. They have replaced the short 10th with a new par-3 at No. 16 and now propose to spend £10,000 on clubhouse improvements; the first phase of a bigger scheme to replace the building which has been in use since 1890's.

# Keeping Upkeep Down

*With grateful acknowledgments to the U.S.G.A. Golf Journal (April 1968 issue)*

This is an era of rising costs and do-it-yourself projects. Among the rising costs are those relating to golf course maintenance. This same golf course maintenance has been singularly missing from the list of do-it-yourself projects.

It shouldn't be. Here is an opportunity for the golfer to help keep down the cost of playing the game. If each player were to help in even a small way to lighten the burden on the golf course superintendent's crew, the crew would then be able to use its time more profitably on other projects.

The cost of course maintenance is rising dramatically. Five years ago the normal maintenance budget for clubs in the Metropolitan New York area was about \$65,000 to \$70,000. Today the same clubs are spending from \$85,000 to \$90,000 for the same purpose.

Much of the increase is in higher prices for materials. However, a considerable part is the increased cost of labor. It is in the labor area that the player can help reduce or at least slow the rate of escalation of his club's budget.

Just how can the player help? What, specifically, can he do?

The Golf Journal asked staff agronomists of the U.S.G.A. green Section for their views on this subject. Following are their replies:—

**MARVIN H. FERGUSON**, Mid-Continent Director—The Pinecrest Country Club of Longview, Texas, instituted a plan several years ago whereby members might help with golf course upkeep.

The membership was divided into 18 groups; each group was assigned the responsibility for one hole. They were asked to pick up the bottles, cans, and scrap paper on "their hole" when they played it, to repair ball marks on the green, to see that the bunkers had deep footprints raked, and, if time permitted, to pick up a few weeds out of the green.

The system led to a consciousness of

upkeep, and each player began to police his fellow-golfers. We understand that the system has worked quite well. It's the old story of many hands making a difficult task easy.

**ALEXANDER M. RADKO**, North-eastern Director—Leave the course in better condition than he found it after a round of golf—how? By practising the three R's of player etiquette—

Rake traps.

Replace divots.

Repair ball marks.

Then go one step farther: take care of your own and then *one more*. Soon there will be no more one mores to take care of, and this will free the regular crew for many man-hours for other grooming and maintenance duties.

Labor being what it is today, the golf course superintendent also needs all the member help he can get. Your course can only be better for it if everyone does what is expected of him. The player normally takes great pains to do all these things when he is a guest at another club. Why should he neglect his own club?

Once the course looks immaculate, you'll find that every member will not only strive to keep it that way but he will take pride in doing so. There is a close analogy between good grooming and player etiquette which reflects in your golf course. Every player should carry a scratch handicap in player etiquette. Living by the three R's is the first step in that direction.

**HOLMAN M. GRIFFIN**, North-eastern Agronomist—Golfers help the course most by simply being considerate. A considerate golfer will never damage the course or any equipment in a fit of temper, nor will he litter the course and mar its appearance for the golfers who follow him. Consideration costs nothing, yet saves a great deal of time and maintenance money.

A considerate golfer obeys the signs on the course and club rules as well as

the Rules of Golf. He makes upkeep of the course more economical by not creating costly problems which must be corrected, and by not doing those things which are quite senseless in a civilised society. In this way a golfer can help without expending any effort at all.

Of course, pride of membership or consideration for his fellow-golfer and the course become uncontrollable, a golfer may wish to fix his own ball mark as well as one or two others, pick up a candy wrapper in his way rather than move it to one side, or some other such small act which will not only aid the economy of course maintenance but will also show that he cares about his status in the human race.

**JAMES L. HOLMES**, Mid-western Agronomist—This subject should be constantly considered by golfers, because player carelessness is a major problem.

The most important practice from the economic standpoint is raking bunkers after use. The cost of maintaining bunkers represents a surprising percentage of the grounds budget. The more neglectful the players, the more time required by the work force to keep traps in trim.

When there are cart paths, they should be used. Do not insist on driving with one wheel off the path or missing the path entirely if you do not feel like using it. Do not follow in tandem. Avoid areas where it is obvious that

continued cart use is destroying turf. Do not insist on using carts when the Chairman of Green Committee or the Superintendent has said it is unwise or has made efforts to close the course to cart use. Carts are damaging to turf even when used properly.

RIVERSIDE 5415

it is made the grass on the spot will die, and will interfere with putting for some time to come. Repair of ball marks is grossly neglected by players. If the player does not repair his ball marks, they must be repaired by the work force. This can require more time than mowing the green.

Do not be a "litter bug". The player should not only refrain from littering but also police the course while playing. This is especially if the player is using a cart; pieces of paper, bottles, small branches and twigs can be thrown on a cart and carried until a litter basket is found. One would expect members of a club to take sufficient pride in their grounds so that policing by them would be a regular practice.

Do not insist on playing when the course has been closed. This is especially true in spring when frost may still be in the ground but the upper one or two inches of putting surface have thawed. Play at this time can seriously damage greens and require extensive repairs.

In summary, things which can affect the economy of upkeep from the players' standpoint center around personal integrity, personal cleanliness and simple conscientiousness regarding the beauty and the condition of the course.

**WILLIAM H. BENGLEYFIELD**, Western Director—There is hardly a golf course that does not print a "Please Replace Divots" line on the score card. I doubt if 50 per cent of golfers heed the admonition. If properly done, divot replacing would not only improve the course but also save maintenance dollars.

An even greater money-saver would be for each golfer to repair every ball mark he causes on greens. If he doesn't do it, a paid workman must, and he can spend up to 10 hours a week at the task. In reality, this amounts to 20 hours a week because he is losing an equal amount of time in NOT accomplishing another job he might be doing.

Then there are all the other admoni-

tions for golfer co-operation:—

1. Do not walk off with tee towels.
2. Avoid scuffing greens with shoe spikes, putters, flagsticks.
3. Always rake bunkers after use.
4. Every litter bit hurts.
5. Keep all carts (hand carts and electric carts) away from greens, avoid wet or worn areas, and keep on cart paths wherever provided.
6. Refrain from standing on tee benches and irrigation hoses, and from beating on tee markers. Spike shoes take a terrific toll.
7. If a sprinkler must be turned off in order to make a shot, be sure to turn it on again when you leave the area.

Great expense is involved when maintenance workers must stand by waiting for the golfer to make his shot. If the players want to save maintenance costs, they should not insist on shutting down a putting green mower every time they approach or hole out on a green. The same holds for fairway and tee mowing. Non-productive time is expensive and it is really costing the club "double time".

Perhaps the two best ways to save money in golf course maintenance operations are:—

1. Employ a course superintendent who is a good organizer and knowledgeable in his field.
2. Among all players, develop a pride in the golf course and its fine condition. Each player should be considerate of his course, and have a willingness to correct others showing any less degree of appreciation.

## FOR HIRE

AVAILABLE FOR HIRE, WITH or without operator, Ryan turf cutters, Ryan Ren-O-Thin rotorakes, Ryan Greensaire aerators, Sisis heavy-duty spikers, Howard rotavators, excavating and drainage machinery. Coswells, Agricultural and Sportsground Contractors, Croston Road, Farington, Leyland, Lancs. Telephone: Leyland 21243.

## SPORTS TURF RESEARCH INSTITUTE

Two Courses of Instruction were held at the Institute as is usual during the spring, the dates of these being 1st to 5th April and 22nd to 26th April. Each course was attended by a total of 27 students.

Further courses will be held at Bingley during the autumn commencing 14th, 21st and 28th October respectively and these too are fully booked.

## RANSOMES MOW WORLD'S BIGGEST TURF NURSERIES

Warren's Turf of Illinois, the world's largest turf nurseries with 5,000 acres under cultivation, have bought Ransomes nine-unit gang mowers to keep it in trim. A Mark X gang unit was tried out at their turf headquarters and was found to be perfect for maintaining their turf in prime condition.

... and

Further proof that "Ransomes mows the world" is the news that Ransomes Multimowers have been sold to mow airfields in the Malagasy Republic (formerly the island of Madagascar).

## PRESIDENT'S TEAM VERSUS MIDLAND GREENKEEPERS

This annual event on 20th June at Handsworth Golf Club attracted as big a crowd as ever and a sunny evening with wind made golfing conditions interesting and pleasant. Our President was in fine form making the pairing, welcoming his guests, watching the play, and presiding at the supper afterwards.

The Captain of the Handsworth Club, Mr J. Johnson, our Chairman, Charles Moore, Mr Leslie Foster and Mr George Hart all expressed their own gratitude and that of those they represented for the pleasure this event gave them.

Vic Smith had the course in excellent order and the new steward, Mr Thistleton, made sure that the meal lived up to the Handsworth standard. One has been in plenty of hotels where one would have liked food and service like this.

The result? Well we cannot claim a notable victory—in fact we lost. But perhaps that was all part of our tribute to the President and his team.

<i>President's Team</i>	<i>Midland Greenkeepers</i>

# TORO<sup>Regd.</sup> by Flymo

## Highest work rate-

**Whatever your mowing problem, we have the machine for the job. Here are three from the comprehensive range—machines built by professionals for professionals.**

***NEW* heavy duty  
FLYMO 19" Professional—  
floats on a cushion of air.**

Does a big cutting job with little effort. Cuts long grass or short—wet or dry—on slopes, level ground, or in the most awkward corners.

The Flymo Professional has powerful new 4 h.p. engine with double-pulley action for easy start.

New, stronger ABS (Cycolac) hood.

New anti-dust barriers to the electrics and the engine.

New nylon-filled fibreglass impeller.

**TORO 21" Greensmaster —  
for the perfect finish**

Specially designed for golf or bowling greens, tennis courts—and all places where absolute perfection of finish is needed. 147 cuts per yard. Unique floating action isolates the cutting unit from the traction and catcher sections, eliminating gouging and digging. Perfect grass collection—even in the wettest conditions. Powered by a 3 hp, 4-stroke Tecumseh engine.

**Send today for full details of the Flymo range to:**
