

FAST, EFFICIENT TURF FIBRE REMOVAL

with the

sisis VEEMO

Those who have striven to improve standards with only drag rakes, chain-harrows and other improvisations will surely welcome the SISIS Veemo, of British design and manufacture. The Veemo provides a fast, efficient means of turf fibre removal and of cutting horizontal growth, economically on large areas such as golf fairways, cricket outfields, parkland, etc., which have perhaps deteriorated over a period of years.

A single Veemo unit, containing wheel-driven, vertically cutting blades can be towed by the SISIS Auto-Trac or similar small tractors. Gangs of three or five units can be towed by bigger tractors on larger areas.

Patents applied for.
