FENDRESS®

THE TRULY NATIONAL TURF TOP DRESSING AS SUPPLIED TO
 MANY CHAMPIONSHIP COURSES FOR OVER 10 YEARS

A superior and consistent golf green top dressing prepared for the professional using the highest quality East Anglian fensoils (with very low clay and silt fractions) which are blended with lime free silica sand, shredded and screened, ready for immediate application.

Save capital outlay on expensive equipment, which can stand idle for long periods, also labour costs, but most important of all, save the difficulty of finding suitable raw materials which are essential to produce a high quality top dressing.

Bulk deliveries to all parts of the UK, including Northern Ireland in 10-25 tonne loads. Also pre-packs for easy handling. Special mixes prepared to your own specification.

Remember, there is only one true FENDRESS®. Beware of imitations.

Also available, granulated Sedge Peat (Fenpeat), screened loam, specialist yellow or white bunker sands, grit/dried sand for vertidrainage.

Please telephone T J Banks for a competitive quotation
