WHEN IT COMES TO FEEDING TURF DIDIN* MAKES THE DIFFERENCE.

THE SPRING RANGE

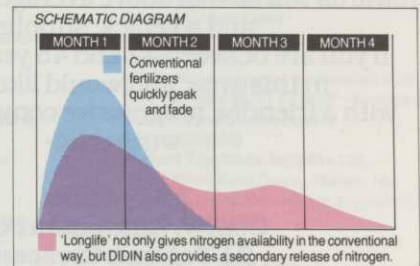

'Longlife' is an established range of fertilizers for all types of professionally managed turf. Whether it is to improve the quality of fine turf such as golf greens and bowling greens or to feed the grass of outfields and other amenity areas, the 'Longlife' range has the answer.

The spring fertilizers shown here will encourage good colour and healthy growth and all contain DIDIN, giving a unique form of

phased release nitrogen for long term feeding. They are all organic based and being mini-granules are easy and economical to apply.

THE DIFFERENCE

DIDIN is a unique ingredient to 'Longlife' fertilizers which provides phased release nitrogen for more even growth from fewer applications. By controlling the release of nitrogen over the long-

term DIDIN reduces the flush of growth experienced with conventional fertilizers.

DIDIN also reduces leaching to a minimum giving a more efficient use of the applied nitrogen.
