

Hard work, and how to avoid it.

A quality company.
A strong dealer

Most compact tractors demand that you make your body fit the way they are designed. With Ford Series 20, it is the other way around.

We shaped our new tractors to fit the requirements of their human operators. They are the only compact tractors that measure up to tough SAS standards for comfort and ease of operation.

You will find that Series 20 controls are not just "reachable" — they are all within easy, natural reach. The main shift lever and

hand throttle are up on the dash, conveniently close to the steering wheel.

The high-backed, cushioned seat adjusts low and all on an inclined track. That puts you in just the right position to reach the pedals and controls, whether you are tall, short or in-between.

The deck is large and sculptured. It gives you room to stretch, and contributes to the comfortable overall level of these tractors.

Wide expanses of tinted safety glass ensure excellent visibility. A large door provides easy access, and the snug-fitting side and rear windows can be locked in open or closed position. Standard cab equipment includes a speedometer and odometer.

The new look on a solid back, better

The convenient and secure cab provides better access to key areas

Series 20 Compact Tractors

Models 1120 1220 1520 1720 1920 and 2120

A little light reading of this booklet can actually help boost your work output, and save you from the heaviest of tasks.

It details the tough new Series 20 Compact Tractors from Ford New Holland. Six superbly-styled and engineered tractors ranging from 14.5 to 41.3 hp.

All with class-leading hydraulic capacity. Quieter, more fuel-efficient engines. And most with 4 wheel drive either as standard or optional.

You'll learn how clever ergonomic design makes them easier, more comfortable machines to operate; and how Ford New Holland back-up will keep the new Series 20 working hard for years to come.

And you'll read about the all-new deluxe cab available on the larger machines (ideal for those who like a really easy time of it).

So don't just sit there. To get the brochure and name of your nearest dealer, please write to Ford New Holland, PO Box 193, Sudbury, Suffolk, CO10 6GZ.
