TORO SPRINKLERS GIVE YOU AND YOUR CLUB TWICE THE PERFORMANCE!

Sprinklers, the sharp end of a golf course watering system are vitally important to the economics, efficiency and long term viability of your club's investment!

If your club is thinking of installing or improving an existing water system, now is the time to consider the types of sprinklers to be used...

Consider these important points: -

1. CORROSION & DAMAGE

Unlike sprinklers containing corrosive metal working parts, Toro Sprinklers are engineered with hi-tech plastics such as 'Cyclocac'® and 'Delrin'®. This eliminates corrosion whilst making each sprinkler highly resistant to impact damage. (It also saves expensive mower blades from accidental damage!)

2. EFFECTIVE COVERAGE

Being gear driven each Toro Sprinkler provides a smooth, uninterrupted working action which enhances water distribution.

3. SELF PROTECTION

The gear drive assembly inside a Toro Sprinkler is lubricant sealed and, therefore, protected from water-borne materials such as particles of sand. This ensures the gears work smoothly and helps reduce maintenance.

4. WET SPOTS

Check Valves also eliminate the problems of 'low head drainage' and the need for gravel sumps on low lying areas.

5. INDIVIDUAL CONTROL

The valves also enable greens staff to use sprinklers individually - applying larger or smaller amounts of water on selected parts of the course...

6. EASE OF MAINTENANCE

Toro Sprinklers are designed to make servicing simple. Repairs can be carried out on the spot - no need to take the sprinkler away to a workbench!

7. IMPROVED WARRANTIES

Toro now offer increased Warranty protection for large size sprinklers - in some instances these have been given twice the length of validity - there's confidence!

8. WHO USES TORO SPRINKLERS?

St. Andrews, the All England Lawn Tennis & Croquet Club, Wimbledon and Wembley Stadium - three good examples!

Consider these points then ask your nearest Toro distributor for the facts. He will explain how £ for £ your club can enjoy twice the performance.

TORO®

Toro Irrigation Limited

Unit 7, Millstream Trading Estate, Ringwood, BH24 3SD, Hampshire. 04254-6261

Your Toro Distributors are:

Home Counties, East Anglia & South East
