## Agile as a cat

Jacobsen Turfcut II gives you  
all the moves for quality cutting.

Get the agile machine with the moves of a cat. Get a fast-moving, clean-cutting Jacobsen Turfcut II\*.

Featuring smooth power steering, four-wheel wide-track stability, and hydrostatic traction. A touch with your right foot delivers variable speed for precise maneuverability . . . the left pedal raises or lowers implements hydraulically for easy transport.

The heart of the Turfcut II is a rugged 23-hp, 51.6 cu. in., 4-cylinder,

liquid-cooled Continental gasoline engine. And our special dual-screened radiator assures cleaner, cooler engine operation. With a warning system to alert the operator when screens need cleaning—for longer engine life.

Superior rotary-deck performance delivers a quality cut on all types of turf. And, the Turfcut's mechanical or hydraulic PTO drive,

with a wide implement selection, gives you a year 'round system.

For speed and maneuverability, pounce on the Turfcut II. It's agile as a cat.

# And now, from the innovators

Nottinghamshire County Council have been researching and developing synthetic grass systems for over fifteen years.

They recommend –

### VHAF Grass Reinforcement

For landscaping, worn out paths, banks and hundreds of other problem areas. For around £200 muddy goalmouths can be returned to continuous use. VHAF is a synthetic carpet overseeded to grow a healthy top sward of natural grass with a reinforced root system.

### Tennis Court Conversions

Convert shale or tarmac courts into high quality synthetic grass areas for as little as £7,000 including installation.

### Notts Cricket Wickets

The famous Notts 'D' system, laid DIY from £2,000

### Child Safety Play Areas

Using the Notts 'Envelope' system laid with a synthetic turf surface, we can offer a reliable, low-cost, erosion-free safety system.

### Golf Tees

The Notts 'T' provides a mud-free area, all year round from £89.

## FOR ALL SPORTS TURF IRRIGATION

You can't beat us when it comes to first class irrigation. With over 15 years experience behind us, we have installed irrigation systems all over Britain, in all the best places, and our sprinklers pop-up in Ireland, in Europe and in Africa.

But you probably know about our past. In the future we will continue to offer the best automatic irrigation installations but now we are ALSO OFFERING A NEW RANGE OF SPRINKLERS, CONTROLLERS AND OTHER SPECIALIST EQUIPMENT, ALL DESIGNED AND BUILT BY WATERMATION IN ENGLAND.

It isn't all "just grass" to us — sometimes it isn't even grass at all. We also design sprinkler systems for artificial surfaces.

So if you have a golf course, tennis court, bowling green, running track, football pitch . . . or even a whole town to be irrigated and monitored in the Middle East, we can offer you irrigation equipment which is specially designed and suitable for the needs of those areas.

Naturally, we can still supply you with all our usual range of equipment and spares and in fact we now have the most comprehensive range of irrigation equipment in the Country. THE CHOICE IS YOURS.

## SIGGA National Tournament

The association's major golfing occasion was held courtesy of the captain and council of Downfield Golf Club. The weather was excellent and a splendid entry of over 100 took part.

The course, as usual, was in great condition considering the extremely wet, cold spring. Our thanks to Willie Milton and his staff for their efforts.

The hospitality afforded us by the club and the clubhouse staff under Mr Parker was first-class and we are indebted to them for making the day a success.

Club captain Mr E. Boyd and his wife presented the prizes and drew the raffle.

Scoring, on what is generally recognised as one of the hardest courses in Scotland, was very good.

John Souter would surely have won the prize for the luckiest shot of the day - if there had been one - with his 'heid up' approach to the 9th green, which finished 15 feet from the flag.

A most pleasing aspect of the tournament was entries from as far afield as Seahouses in the north of England to Dornoch in the north of Scotland and even from the west coast of Ireland.

*Elliott Small.*

## Memory Lane Again

The discussion on the 'old days' in the June issue of *Greenkeeper* between John Campbell and Jack McMillan stirred a few memories among some older greenkeepers.

George Alexander, vice president of SIGGA, wrote 'It took me back to my early years in greenkeeping at Prestwick St Nicholas, Ayrshire, where my father was head greenkeeper. My entry into this work coincided with the introduction of the Ransomes Certes mower, which proved to be an excellent machine. It was sheer joy after the brute strength needed to push a Shanks Caledonian, which ran on brass brushes. What a boon it was to see the advent of ball bearings!

Fairways were cut with a horse-drawn triple mower then, which was eventually replaced by a Model T Ford tractor and gang-units. The tractor took some of the drudgery out of our work. We did not have a watering system, so the club decided to purchase a 500 gallon tank as we had an old water-filled quarry on the course and the idea was to use this valuable source of water for irrigation in the summer. Scottish summers being what they are, it was not until 1934 that we needed it! It was the driest period I remember and we watered the greens non-stop from April to September.

Many steep slopes and odd corners of the course had to be scythed in the summer until we finally welcomed the arrival of

two Kutruf side wheel mowers. Repairing club marks with seed and soil was a time-consuming task, for there was little grass cover on dry sandy fairways during the summer.

After the busy playing season was over, all the greens were hollow tined with Paul forks. This was extremely laborious, leg aching work. Top dressing, using material from the compost heap that was made up of alternate layers of soil and manure or seaweed, followed.

Winter could be an easier time, but often there were alterations to be done and before the days of turf cutting machines, this was back breaking work with old diamond-shaped turf spades and edging irons.

I remained at Prestwick St Nicholas until the outbreak of war. After demob from the army, I returned to the club to take my father's place as head greenkeeper when he retired. The installation of an automatic watering system and all the other advances in equipment made the job much easier, but it takes total commitment to keep on top of all the work.

I have enjoyed my career in greenkeeping and meeting many fine people in the business. Continued success to all those who are working hard to improve the status of greenkeeping.'

## North

Nearly 50 members enjoyed the hospitality of Fraserburgh GC for our first outing of 1986. The course was in top-class condition, but we could have done without the hurricanes! This kept scores fairly high and Stephen McIntosh managed a scratch 77, which won the Bowen Trophy and the Registered Apprentice Trophy.

Other main prize winners were: 1st Class-A. Grant 72, 2nd Class - D. Munro 75, 3rd Class - G. McKie 87, Vets - D. Dingwall 79, Trade - Eddie Connaughton (Wales) 80.

The flag at Fraserburgh was flying at half mast in honour of Steve Donnachie. It's hard to believe that it was at this outing last year that we presented Steve with his retirement gift. He will be missed. *I. Hamilton.*

## South Wales

The branch is staging a weekend educational seminar at the Abbey Hotel, Great Malvern, Worcestershire on November 1-2.

Although organised by South Wales, a venue 'across the border' was chosen because it was felt a more central location would attract more delegates.

The Abbey Hotel can accommodate 300 conference delegates and has bedrooms with full facilities. Situated at the foot of the Malvern Hills, the hotel is a mile from Great Malvern station and ten miles off the M5.

The seminar will follow national EIGGA conference lines with at least half the papers being presented by greenkeepers and there will be a session set aside for younger members of the profession. Full details of speakers will be announced in *Greenkeeper*.

Delegates will be required to register on Saturday morning prior to lectures and the entire package comprises one night's accommodation with full board.

The cost for EIGGA members is £57, non-members £62. Daily attendance costs £15 (EIGGA members) and £18 (non-members).

All EIGGA members and

anyone else in golf and green-keeping will be welcomed.

Further information can be obtained from me at the address on the reservation form below.

*Raymond Hunt.*

## North-West

A good turnout of members had an enjoyable evening at Watmore's Turfland recently. Chris Watmore and his staff showed the party his turf farm, gave a demonstration of machinery and provided a visit to his new farm at Chester, all of which was rounded off with discussion and refreshments back at Turfland.

Many thanks to Chris and his staff for all their hard work and for making it such an interesting and informative evening.

The autumn tournament is to be held at Mold GC on Monday September 15, sponsored by C. Howells, a Lancia agent in Wrexham. Anyone wishing to play or attend the dinner should contact Terry Adamson on 0978 83 2908.

*Guy Cannings.*

## London

On behalf of all members, I would like to wish our branch chairman Tom Low a speedy recovery from recent illness.

Tom has received an EIGGA gold diploma for 25 years service as a head greenkeeper - I'm sure he'll do another 25.

An evening Stableford was held at Finchley GC and our thanks go

to the club and indoor staff for making us so welcome. The club's new head greenkeeper Gary Mosey has joined the branch and thanks go to him and his staff for providing a golf course in excellent condition.

Prize winners were: low handicap - 1st I. McMillan 40 pts, 2nd G. Mosey 33 pts; high handicap - 1st C. Greenwood 39 pts, 2nd J. Ewing 38 pts; guest prize - J. Russell 36 pts.

We are indebted to Norman Exley and Chris Slater for helping with the cards and D. Smith of King's, D. Craig of Pattisson, A. Moffatt of Parkers and D. Murphy of Maxwell Hart for, once again, supporting us.

The summer league pairs is now well under way and thanks go to Mike Peters for organising it with the able assistance of his wife. Not only does the league raise golfing standards, it brings a lot of greenkeepers together on different courses and that must be a good thing.

Finally, on behalf of all EIGGA members, I would like to congratulate our branch administrator David Low on being elected national chairman earlier in the year.

*Derek Mason, Highgate GC.*

# A TRIP TO FLORIDA'S GOLF COAST

IT WAS at a Christmas Eve 1984 drink with the committee that the captain of my late club, Thorndon Park in Essex, asked me if I would like to visit Florida to see some of the golf courses.

The offer had been made by William Regan, a member of Thorndon Park, whose company Globe International builds houses in Britain and America. Mr Regan had brought some friends over from the States and I was fortunate to meet Tom Fasio, the designer of The PGA National. It was thought that a reciprocal visit would be of benefit to Thorndon Park and interesting to my American counterparts, who would welcome an Englishman's view of their courses.

So, it was with some anticipation that I awaited my first sight of America! I was to visit The PGA National, JDM Country Club, Jupiter Hill Golf Club, Boynton

---

**By Robert Hornegold of  
Brickendon Grange GC,  
Hertfordshire**

---

Beach Municipal, Seminole Golf Club, Frenchman's Creek Country Club and Loxatchee Golf Club.

On arrival at The PGA National, where the Ryder Cup was held in 1983, I was introduced to Colin Wright, the course administrator. Colin is English and has worked in the States for ten years. He explained that most new courses in the area are linked to real-estate projects and at The National there are some 2,300 acres of building land. Most of the housing is single-storey accommodation with large, well-landscaped gardens.

As you drive through the main entrance towards the hotel and administration area, on the right there's a large grey building that houses the headquarters of The PGA of America.

I was struck by the high standard of maintenance and design. The huge car park, which can accommodate thousands of cars,

Bob Hornegold (left) and Luke Majorki.

does not intrude or interfere with the parkland image.

Within this area, there's a tennis centre with 19 clay courts. The hotel has 200 bedrooms, banqueting halls, restaurants, swimming pools and numerous other facilities. A short distance from the hotel is one of the many practice grounds - some 500 yards in length, with large raised tees (100

Oval and kidney shaped tees are used on all four courses at The National.

yards wide by 50 yards deep) at each end.

As the weather in Florida is usually good, with temperatures of 70°-85°F in the winter and 80°-100°F in the summer, over 300 caddy cars are required to speed up play and with 800 to 900 rounds per day on the four courses, speed is essential to prevent traffic jams!

Luke Majorki, the golf course superintendent, told me that there are four courses at The National - The Haig, The Squire, and The Champion, being Tom Fasio designed, while The General, the newest course, is an Arnold Palmer design. The first course to be built was started in 1979 and the fourth course is just over a year old. Because of the climate, it is possible to sow a green and have it to putting condition within six weeks.

Luke has an assistant superintendent and other assistants who are in constant contact via a two-way radio. There is also a secretary to cover the office duties and 'man' his office in the main depot. The budget for course maintenance is in the region of 1.6 million dollars.

There are approximately 600 acres of golf course and an equal

The Everglades, from which the golf courses were carved.

amount of water to maintain. Luke has 60 staff, who are split into four groups with one chargehand and nine men for each course. There are also two large depots, each with a fully trained mechanic and assistant to service all the machinery. There is an irrigation team, a spraying team and a landscape gang, who deal with specialised tasks, but overlap and work together when needed.

Soil at The PGA National is nearly pure sand, as is most of the region. Everything has to be irrigated if it is to grow. A Toro sprinkler system is used and a great deal of time is spent checking soil moisture for accurate timing of the system.

Greens vary in construction - two of the courses had tile drains, 12in - 14in sand/peat top mix of 80:20 ratio with colloidal phosphate (a phosphatic clay added to retain moisture). Unfortunately, Luke has run into trouble using this mixture - the water retaining qualities of colloidal phosphate have caused water-logging.

I should say that Florida has a great deal of heavy rain and it is not unusual to get 15in of rain in one storm and 70in - 80in in a short period of time during the rainy season. To cope with this, there are huge pumps capable of pumping 50,000 gallons per minute into The Wetlands.

They raise the water to an elevation of some 18 feet above sea level and from there it drains into a C18 canal. Originally, the whole site was a swamp and the

complex now has large banks surrounding it.

The greens on the third course are constructed as the others, but without the colloidal phosphate and the fourth course is built to the USGA suspended water table specification. There are also two acres of putting greens.

Bermuda grass is the main species used in Florida and there are many different varieties. At The PGA National, greens were originally Tiffdwarte Bermuda. However, this is difficult to keep through the colder periods so, in recent years, this has been over-seeded with Penncross Bent to a point where the greens are now 60 per cent Penncross Bent and 40 per cent Bermuda, which has

made the greens much faster than before. Fairways and tees are 419 Bermuda grass and the rough is Bohia.

Height of cut is varied with each season. At the time of my visit, the greens were  $\frac{1}{2}$ in, approaches  $\frac{3}{16}$ in -  $\frac{1}{4}$ in, fairways  $\frac{3}{4}$ in - 1in, semi 1in -  $1\frac{1}{2}$ in and the rough 3in - 6in high.

Greens are cut daily throughout the winter with Jacobsen Walkers (hand mowers) and this was common practice at all eight clubs I visited. The only time they use a triplex is in the summer and then only at weekends. Jacobsen Triplex (Greens King) and Toro Greensmasters are used to cut the tees and approaches.

Surrounding and ornamental areas are cut with Allan Nationals, Ransomes 513s, Ransomes 350s and Jacobsen Trim Kings. Fairways are cut with Jacobsen F5s using seven or nine blade reels. These are power driven and give a very fine cut.

For competitions, Luke is now using the Ransomes three and five gang ride-on machines, which he is very pleased with. Sweepers, suckers and blowers are used to collect loose cuttings on all mown areas.

There are just too many pieces of equipment to mention, but at one depot I counted 11 Jacobsen Turf Kings and eight Ryan hollow tining machines.

Bunkering on all four courses is superb - there are over 100 bunkers on The Champion course, which are mainly raked by machine. They appear to have done away with normal tines and

Practice putting greens, with part of the complex, hotel and administration centre behind.

**Tee Markers.** An overall plan of the hole and individual bunkering around the green is given. There are also iced water containers and ball cleaners.

replaced them with fan rakes, which give a very good finish.

Numerous pests, diseases and weeds thrive at The National – spraying machines are kept in constant use. One insect that is proving a problem and causing a great deal of damage is the mole cricket. To combat this, they spray orthodyn at night so that it is absorbed by the plants and then, when eaten by the mole cricket, it affects the nervous system and makes the cricket move into the open where it is eaten by birds.

Records of spraying are held in Luke's office, as are records of all work carried out. These records must be kept meticulously and, Luke hopes to be using a computer soon, not only to store information but to work out the frequency of spraying, applications

of fertiliser, etc.

It has to be repeated – the golf courses are beautiful. Flowers such as begonia semperflorens and impatiens grow and flower for many months of the year. There are Australian pines, slash pines, fine leaved oaks, palm trees, malucas and eucalyptus, as well as the common flowering shrubs bottle brush and oleander.

At the base of trees and shrubs, they spray Roundup, a total herbicide. Once the vegetation dies, the tree or shrub base is mulched with wood bark chippings, which are dyed green if there is a competition. This dye is also used when spot spraying. As Walter Hagen had a great affection for roses, rose bushes have been planted every 100 yards along The Haig's fairways.

**Bases of the trees sprayed with Roundup.**

Just before my trip, there had been three frosts, unheard of in this part of America, which caused extensive damage to trees and shrubs. Many hundreds died and these are costing the golf courses a great deal of money to replace. Fully mature trees, such as the native cabbage palm, at between 15 to 20ft high, are being planted for an immediate effect where large trees have died.

After a most enjoyable day, I realised how useful it had been to see grooming of such a high standard. I returned home with renewed enthusiasm.

While in America, I promoted EIGGA and, hopefully, there can be further exchanges of opinion between British and American greenkeepers.

## FARMURA SPORTSTURF

Encourages establishment of grass seed, root development, tillering, and a thick sward without a flush of growth. Makes available locked up nutrients in the soil and increases soil bacteria count (Archer Report).

Uses – Reseeding, Golf Courses, Sports Pitches, Racecourses, Bowling Greens, Cricket Wickets, land reclamation, ecologically sensitive areas.

## FARMURA GREEN

Farmura with the addition of iron and a wetting agent for immediate colour.

Uses – Golf Greens, Bowling Greens, Tennis Courts, Lawns etc. Formulated for fine turf, Farmura Green is also available in a formulation for more extensive areas to special order – for example Golf Fairways, Racecourses.

## FARMURA N

Where a programme calls for low input of major nutrients these can be supplied ready mixed.

Uses – Low input management programmes, land reclamation.

For detailed information, contact your distributor or

# Taking the course to water

*Herefordshire club splashes out £30,000*

*to defy the laws of nature*

F. Bradley (hon sec), L. Griffiths (pro and course supervisor), R. Fox (captain), V. Galliers (chairman of greens) and G. Long (treasurer) at the opening ceremony. (Photo: courtesy of the *Hereford Times*.)

A DAY at Kington Golf Club is always one to remember. For the many visitors to the highest 18-hole course in England and Wales, there are spectacular views across seven counties.

But Kington golf is a serious business and Open champion Sandy Lyle was not to be distracted by panoramas stretching from the Welsh Black Mountains and Brecon Beacons to the Malvern Hills and the Shropshire Wrekin when he visited this Herefordshire borderland club and set the course record of 68 just before turning professional.

Even so, members recently had occasion to celebrate not with champagne, but thousands of gallons of water when the president of the Shropshire and Hereford Golf Union Doug Humphries turned the taps on Kington's new £30,000 watering system. This was the price that had to be paid for the course's superb situation - at its highest point, 1,300 feet up Bradnor Hill.

Quality golf has been the name of the game at Kington

since Cecil Hutchison was invited to lay out the course in 1924. But, for 60 years, the greens were dependent entirely upon rainwater.

According to 1985 club captain Tony Wright, after the severe droughts of 1983-4, it was generally felt that the perennially parched summer grass "mitigated against the future of the club" and drastic measures were called for.

But, at that height, short of moving mountains, where was the water to come from?

Water-diviners were called in and various schemes found to be impractical before Vic Galliers, determined chairman of the greens committee, persuaded the Welsh Water Board to sell the club a spring and redundant pumping station at the foot of Bradnor Hill. All that remained was finding a way to make the water flow 600 feet uphill!

The engineering contract was put out to tender and the North Staffordshire Irrigation Company began work on the project in

October. A massive amount of piping with electric wiring was laid to pump the water up to a vast 8,000 gallon holding tank half way up the course. It is then sent round two separate circuits of sprinklers.

Such a system required an equally ingenious plan to finance it. Some £20,000 was raised in interest-free loans from individuals among Kington's 400 members. The money came in £100 units, which will be repaid over the next ten years to the lenders whose names are pulled out of a hat each year. The final £10,000 was lent by the Sports Council.

The sprinklers will operate from May to September every year, dispensing an estimated 18,000 gallons of water a week in very dry conditions. "We're expecting to attract more visiting parties and casual visitors, as well as increased applications for membership.

"We would also like to see the course become a permanent fixture for county matches," Tony Wright added.

## People, Places, Products

The annual Parker tournament for greenkeepers was staged at Cuddington (Banstead) GC, Surrey and attended by representatives of 70 golf clubs.

Company chairman George Parker and his wife presented the prizes to: 1st (Parker Bowl) Stuart McMillan, Leatherhead, with 44 points; 2nd Martin Smith, Porters Park; 3rd Ian Smith, Cuddington; 4th Roger Glazier, Cuddington; 5th Derek Gould, Langley Park and 6th Neville Shade, Foxhills.

Parkers would like to thank David Scott, club secretary, for his help in organising the event and Hugh Riggins, head greenkeeper, and his staff for a course in top condition.

**The British Turf Irrigation Association has produced an A5 booklet entitled *Your Guide To The British Turf Irrigation Association* to help clients understand fully golf course irrigation systems offered by BTIA members and the arrangements for installation.**

The booklet also encourages customers to consult with the association's independent secretary to help remove any cause of dissatisfaction.

The guide will be distributed by association members with tenders and similar documents. It is also available free on request, with a list of BTIA members, from The Secretary, BTIA, 3 Ferrands Park Way, Harden, Bingley, West Yorkshire, BD16 1HZ.

Tufturf tee mats by Carpetation were introduced in August 1985 and after ten months sales had topped 500, with customers in the UK, as well as France, Holland and Switzerland.

PGA pro and leading teacher John Stirling recommended Tufturf tee mats for the National Sports Centre, Lilleshall and at the Mere Golf and Country Club, Cheshire, 48sq m of practice driving tee, consisting of a concrete base covered with 4 x 2m x 1m tee

Stuart McMillan with Mr and Mrs George Parker.

mats and 40sq m of Tufturf Multisport Surface Material, have been built.

It is possible to build entire tees

with Tufturf, offering obvious labour savings and reductions in installation costs.

A building of modern design for the STRI establishment.

Many distinguished guests witnessed the opening of the new main offices and laboratories of the Sports Turf Research Institute by John Smith, chairman of the Sports Council. The STRI has occupied parts of the Mansion House within the St Ives Estate at Bingley since its inception in 1929. A decision, taken some time ago by the district council, to rehouse the institute resulted in the purpose-designed building within the former walled garden of the estate. STRI research staff will continue to occupy the separate coach house block, as well as the soil physics laboratory, which plays an important role in the drainage and construction consultancy service.

Richard Fry.

A new marketing and PR consultancy, specialising in the sports, recreation and leisure industries, has been formed by Richard Fry. Marketing Link Associates can be contacted at 24 Badgers Court, Langdon Hills, Basildon, Essex SS16 6AU. Tel: 0268 413798.

The new address of the British Agrochemicals Association is 4 Lincoln Court, Lincoln Road, Peterborough PE1 2RP. Tel: 0733 49225.

Trident of Compstall is now known as Trident. The company is located at Poplar Site, Knutsford Road, Lymm, Cheshire WA13 0TD. Tel: 092575 6070.

Richard Lawrence, managing director of Trident, commenting on the move said: "This move to larger premises will enable Trident to continue offering customers a most efficient service as the demand for our products continues to grow."

SISIS Hydromain tractor units now incorporate higher rated engines. The Mk II Hydromain Fourteen has been restyled and the foot controls, fuel tank, brakes and stabilisers improved. Power steering is available. Two engine options are available - a twin-cylinder air-cooled petrol engine of 18hp SAE rating (13.4kw) or a twin-cylinder water-cooled diesel engine of 13.8hp SAE rating (10.35kw).

The Hydromain Twenty replaces the earlier Seventeen and is also available in two options - a twin-cylinder air-cooled petrol engine of 20hp SAE rating (14.92kw) or a three-cylinder water-cooled diesel engine 19.8hp SAE rating (14.8kw).

These new engines provide increased power and the diesel

## New Ground Driven Fertiliser Spreader

The new mini-spreader from Wessex Farm Machinery.

Wessex Farm Machinery has introduced a new trailed fertiliser distributor suitable for professional or domestic use.

The new mini-spreader has a spinning disc distributor plate, with four deflector blades, protected by a special anti-corrosive finish. The spinning disc is ground driven through heavy-duty bevel gears immersed in an oil bath. The wide-profile pneumatic tyres have a turf-tread pattern to minimise compaction on fine turf areas.

The conical hopper holds some 150lb, depending on the type of fertiliser, and has a corrosion resistant paint finish. The hopper

is mounted on a sturdy tubular frame, with the drawbar adjustable according to the position of the tow hitch on the tractor.

The Wessex mini-spreader is suitable for use with most garden tractors and specially suits diesel engine ride-on mowers, such as the Kubota G3HST.

The mini-spreader can be used for granular and powdered fertilisers, grass seed and salt. Spread widths range from 6ft 7in to 26ft, depending on ground speed, with application rates from 52-410 grammes per square metre for granular fertiliser.

The Wessex mini-spreader costs £265 (plus VAT).

units give the additional advantage of operational economy.

Prices of the machines have been held.

The SISIS Hydromain Fourteen Mk 11 fitted with a deep slitter.

## Select A Spreader

The new Parkers' range of fertiliser spreaders comprises four models - the Standard, Professional, Super Professional and Master. All feature ten position controllers to adjust spreading rates, vibrating gate and steel frames finished in baked and epoxy enamel, stainless steel rotary agitators and spread widths of between 5-8ft.

The Standard has a zinc plated steel hopper, 16/49 gears and

gearbox and standard duty 8in x 1.75in plastic wheels. Capacity is around 40lb.

The Professional incorporates a stainless steel hopper with high polish, brushed finish, 16/49 gears and gearbox and heavy duty 8in x 2.25in plastic wheels. Capacity is similar to the Standard.

Parkers' 40lb capacity Super Professional spreader, again, has a high polish, brushed finish stainless steel hopper, 16/49 gears and gearbox, but 8.75in x 2.8in pneumatic tyres.

Top-of-the-range, the 90lb capacity Master, features 10in wheels with nylon bearings and smooth tread tyres. Hoppers are made from low polish, smooth finish stainless steel, protected with a bump bar/hand hold. Handles are double bolted and double braced and the axle, spinner shaft, rotary agitator, on/off control cable and all nuts and bolts are stainless steel.

Full details from T. Parker & Sons (Turf Management), Worcester Park, Surrey KT4 7NF. Tel: 01-337 7791.

The Master, Super Professional, Professional and Standard - all from Parkers.

## Agar Goes Jumbo Sized

Agar Equipment has added a semi-trailed sweeper-collector with a jumbo-sized box to its range.

It is available in three widths, 4ft, 5ft and 6ft in capacities of 1.30cu m, 1.60cu m and 1.87cu m (approximately) and can be supplied as a complete sweeper-collector unit, or the box and trailer only can be provided for

fitting to existing sweepers.

Agar claims that, by positioning the front wheels on a centre line of the brush, accurate height adjustment is possible from 0 to 3in, enabling the sweeper to follow ground contours closely. And by fitting fully castoring wheels to the rear, Agar says the jumbo is more easily reversed and overall manoeuvrability improved.

The sweeper will collect leaves, grass and rubbish (where practicable) from lawns, fairways,

formal grass areas and paths. Driven by a double vee belt from the pto driven gearbox, it is three-point linkage mounted and suitable for use with any tractor having pto.

The collection box can be emptied without the operator leaving the tractor seat. A canvas dust cover is standard.

Further information from Agar Equipment, Unit H 7/9, Blackpole Trading Estate, Worcester, Worcestershire WR3 8SG.

# COMPETITION GREENS

Finding greens which look good and play well is what every member expects, competition day or not. And fertilizers are vital to success. Now, with the new range of Fine Turf Fertilizers from ICI, grass nutrition is simpler and less time consuming.

Some of the products incorporate DIDIN\* a new idea in long-term feeding – some have magnesium and seaweed extract – all of them are formulated as organic-based mini-granules.

We've included the new long-lasting nitrogen stabilizer called DIDIN into 'Spring and Summer Feed' and 'Weed and Feed'. Initial colour response is good without excessive stimulation of leaf growth. But, more importantly, DIDIN

steadily provides nitrogen for up to three months after initial application – long after ordinary fertilizers have stopped working.

Another new idea is 'Nitro-Iron' which contains no phosphates. The 7:0:1 formula is boosted with 3% Iron to provide good green up and efficient moss control.

For winter hardiness there is 'Autumn and Winter Feed'. In this formula the major plant foods are supplemented by both magnesium and iron.

To ensure fertilizer applications meet your requirements, we offer a free soil analysis service for all purchasers of ICI Fine Turf Fertilizers.

All developed especially for fine turf – and busy Greenkeepers.
