"You'll see when ordinary aeration just isn't good enough"

"You'll see alright. It may be surface water is still a problem. The turf could be looking thin and tired. Weeds could be on the increase.

"What you can't see so easily is the cause. Compaction. Or a build up of thatch. Probably both. Either way, the result's the same. Water doesn't soak in properly. The soil gets starved of oxygen. Rooting gets shallow. Weeds and disease get a hold. You've got a problem and just spiking holes in the ground isn't going to solve it.

"Hollow tine aeration is the answer. What the Ryan people call Core Cultivation. In fact, I reckon it should be a routine part of any turf maintenance programme, not just a problem solver.

"Why do I think Ryan hollow tine aerators are the best? They're exceptionally well made. Tough and reliable. And they've got a lot of special features, like the Greensaire's 2 inch by 2 inch core pattern. And the unique design which makes each tine go in and out absolutely vertically so that it doesn't damage the top surface like some others can.

New vigorous growth after hollow tining

"In fact, you should have a look at the whole range of Ryan turf maintenance equipment. It's the best you can buy"

The Ryan Range

Aerators

Greensaire 16in
Greensaire 24in with optional Core Processor
Ride-Aire 19in ride-on
Lawnaire 19in
Lawnaire 3ft tractor towed
