

Take it from us!
 There's a whole lot more to
 tree surgery than a chain saw
 and a head for heights

You'll find it all in our free catalogue

First things first; a properly trained and equipped team can save you £££££'s, by not having, or minimizing, horrifying casualties and claims, apart from the moral responsibility. It has recently been reported that chain saw accidents have halved in 3 years! Honey Brothers believe that their

organization has made a significant contribution. Among the 1001 items in our latest well-illustrated Catalogue there is the latest **Protective Clothing, Hand Tools, Climbing & Safety Equipment, Chain Saws, Ladders**, to name but a few. **Honey Brothers** organize regular

arboricultural Safety Training Courses on site in Guildford or with owners (if preferred) on their own land. Ask for details. In the meantime send for your copy of the well-illustrated Catalogue.

Turf diseases. There's simply no opposition.

Selecting a fungicide to prevent and cure turf diseases can be a problem. Especially with the risk of resistant strains a looming possibility.

But thank goodness for Daconil* turf, a new fungicide from ICI which contains chlorothalonil. Its unique mode of action means that it has no resistance problems – even after years of effective use on fine turf. And because of its multi-site action and chemical composition, the likelihood of resistance developing is remote.

The list of turf diseases prevented, controlled and cured is impressive

But that's not all. Daconil turf can be used at any time of the year and is especially useful in spring and autumn when disease incidence is most likely. It has dependable and consistent disease activity that holds up even during heavy rains, morning dew or frequent watering. And because of its liquid formulation it is easy to dilute and apply.

No wonder there's simply no opposition.

New Daconil turf.
