

THE Tough Turf

Playground, park or penalty spot, wherever grass is worn away, that's where you need a little extra help. Whether you are a groundsman, park officer, landscaper or architect, there are times when turf just isn't tough enough.

Think what a good idea 'Grass Reinforcement' is. It's a synthetic fabric that's as flexible and easy to lay as a carpet, which lets grass grow through it, providing anchorage and protection for the roots. If the blade gets damaged the roots are still there, and with a little reseedling and topdressing, they can produce a sward once more.

You can use it on paths, banks and worn-out walks. You can use it on cliff faces, on riversides and on eroded roadsides. Nearer to home, it will keep your favourite football ground flat, playable (and therefore profitable) through the frosts of winter, for much less than the cost of a fully synthetic pitch.

VOTE OF CONFIDENCE

Sales of Daconil* *turf* prove the point. Since it was launched by ICI last year, greenkeepers everywhere have elected to use this turf fungicide based on chlorothalonil. Well you can't keep a good fungicide down!

Its unique mode of action means that even after years of successful use on fine turf it continues to be effective.

And because of its multi-site action and chemical composition it can be used  in sequential spray programmes with total confidence.

The list of turf diseases prevented, controlled and cured is impressive:

RED THREAD
FUSARIUM PATCH
LEAF SPOT/MELTING OUT
FUSARIUM LEAF BLIGHT
GREY SNOW MOULD
TAKE-ALL PATCH
ANTHRACNOSE
BROWN PATCH
DOLLAR SPOT

But that's not all. Daconil *turf* can be used at any time of the year and is especially useful in spring and autumn when disease incidence is most likely. It has dependable and consistent disease activity and only needs to dry on the leaf to resist heavy rains, morning dew or frequent watering. And because of its liquid formulation it is easy to dilute and apply.

Vote for Daconil *turf*!
