Method in madness

Jim Arthur points out in his article on grass identification (July) that the creeping bents such as Penn-cross which we know in the UK as *Agrostis stolonifera* are known as *A. palustris* in the USA.

The Latin *Agrostis palustris* translates as 'Marsh bent'. In other words this species is found in the wild in marshy areas. It is therefore surprising to find a plant of the bog so often used on pure sand golf green constructions.

But perhaps there is method in this apparent madness.

Recent research in the USA has shown that the roots of Penn-cross are capable of penetrating the poisonous anaerobic conditions found in black layer. And where does black layer often develop? On pure sand rootzones of course.

So if you have a golf green with black layer, the grasses which will survive in it are annual meadow grass (because its shallow roots can survive above the black layer) and Penn-cross (because its roots are specially adapted to be able to survive anaerobic conditions and grow through it).

Robert Laycock MSc., CBiol., MBiol., MIHort. General Manager, Karsten Turf Science, Gainsborough, Lincs.

Arthurian legends

I write to say how much I have enjoyed Jim Arthur's two recent articles on mown grass identification. Having come through the 'ligule and auricle' school, with flow-chart at the ready, it is very pleasing to read such pointers on the overview of the sward and the significance of colour. In these days when play seems to be ever increasing and prolonged, it is difficult indeed to find an hour to slip out with a copy of 'Hubbard on Grasses' and a magnifying glass.

When entering the profession but a brief eight years ago it seemed to me that, when talking to those much older and wiser in the ways of greenkeeping, knowledge gained through experience was a valuable commodity and not one to be passed on. Jim Arthur has always been the excep-

tion in not only imparting his wisdom, but doing so in an enjoyable and thought-provoking manner.

I was also delighted to see our own master greenkeepers putting pen to paper in the last two editions of the magazine, in part inspired by one of Jim Arthur's earlier features on casting earthworms. To have current, topical, and sometimes contentious, issues debated can only be good for the profession and, of course, for the high standing of our magazine.

I shall look forward to reading many more Arthurian legends.

Tony Howorth, Head Greenkeeper, Willesley Park GC, Ashby-de-la-Zouch, Leics.

BIGGA in Europe (2)

Having been approached by Neil Thomas earlier this year as representative of this fine Association for the Netherlands, I hasten to react to Colin Fairley's letter (August). By telephone I have updated Colin regarding the present situation in Holland, for by reading the comments of our dear editor I got the impression that communication between Aldwark Manor and Mr White was not quite 100% concerning this subject.

I regret the fact that Neil Thomas did not go into more detail in his AGM report about the 'master plan' I put forward to him recently. This plan has been spread all over Europe, I am happy to say, accompanied by a letter from Neil with more suggestions, plus a request to study the plan and to comment upon it. About thirty people have received this mail and a third have taken the trouble to react and I have read every reply, thanks to my receiving copies.

Please allow me to take this opportunity to thank these people for taking the effort to put pen to paper. Suggestions will be put into my briefcase and brought forward at the next European Forum at Harrogate at the latest.

In Holland all BIGGA members will receive an invitation to attend our first meeting, which is planned for September. I would like to suggest to David White that a new column, called BIGGA INTERNATIONAL NEWS, be

started in his excellent magazine, in the same way as Around The Green (*consider it done, see International News in ATG this issue - editor*). Hopefully, as the first representative of a continental country, I will be allowed the privilege of 'eating the first slice of a newly-baked cake'.

Frederick ten Hage, BIGGA representative for the Netherlands, George Breiterstraat 17, 1741 J.V. SCHAGEN. Tel: 31(0)2240 96022.

Cup queries

It was with some concern that I noted the hole cups used for The Open held at Royal St George's this year. According to the R&A Rules of Golf, Section 2 of Definitions, "The hole shall be 108mm in diameter... and the outer diameter shall not exceed 108mm".

I discovered some six months

ago that the Patisson hole cup measured in fact 111mm and, after querying this with the manufacturer, reverted back to the Tacit hole cup, which is the correct size. When I discovered that Patisson hole cups had been used at The Open, I queried again with the representative as to the current dimensions and whether they had been brought back into line. I was advised that they had not. I feel that if we were to adhere to the R&A Rules, our club competitions would be invalidated with the larger hole cups. Would this also apply to other competitions, e.g. The Open?

Stefan G Antolik, Head Greenkeeper, Cooden Beach GC, Bexhill -on-Sea, East Sussex.

• A copy of this letter has also been sent by Mr Antolik to J S Scrivener, Chairman of the Rules Committee, The Royal & Ancient Golf Club of St Andrews - editor.

use the professionals for weed control!

The Right Men! The Right Stuff! The Right Advice!

For over 21 years Complete Weed Control have been doing all the right things to tackle the problem of weeds and unwanted growth.

With over 20 regional offices nationwide we can tackle your weed problem. Wherever you are. Quickly. Without fuss. Guaranteed!

Nationwide Service
