

Here is a unique chance for you to win one of ten newly designed Course Caps exclusively embroidered with the BIGGA logo. Simply study the three questions and insert a tick in the box that you think contains the correct answer. Entries should be sent to: The Sales and Marketing Department, BIGGA, Aldwark Manor, Aldwark, Aine, York YO6 2NF to arrive no later than 21 November 1997.

Caps off to Course Care!

The launch of the Course Cap at SALTEX '97 brings comfortable head protection to the turf maintenance sector. Following requests from greenkeepers for an approved alternative to the uncomfortable, cold and heavy builder's helmet when working, Course Care have developed the Course Cap.

The Course Cap is certified to European Safety standard prEN812. This standard covers safety items for use in areas where the head is likely to come into contact with hard surfaces. Special attention has been given to protection from flying objects such as golf balls. Testing of the Course Cap involved conditioning by water immersion, ultra-violet radiation, and in sub-zero temperatures.

Research undertaken in the development of the Course Cap showed that over 34,000 people

in the last five years went to hospital for treatment for injuries sustained on a golf course.

According to the Department of Trade and Industry, in 1995 alone 2,268 people were treated in UK hospitals for golf course injuries to the head.

Great care has been taken in the design to ensure maximum wearer comfort and all models are fully breathable.

The light weight and close fitting of the Course Cap make it easy to wear.

The cover fabrics offer a choice between cotton drill, the "Keeper" version and Ventile, the "Murray" version. Ventile is a natural cotton fabric which is fully waterproof and windproof and the "Murray" comes complete with built-in flaps to protect neck and ears from cold in the winter and exposure to sun in the summer.
