The Green Approach

All Weather Golf Greens and Tees, installed in over 3500 locations worldwide, are now available in the UK / Ireland from the Green Approach. See the 'New Products' section in the July issue.

The SofTrak Golf Green System provides an outstanding putting surface, with excellent shot holding capabilities.

The SofTee Golf Tee System incorporates a unique nylon mesh at its base, retaining the special infill much better than other synthetic turf products.

Also All Weather System for Pathways / Cartways.

WOLF Proline

WOLF Proline, a division of Wolf Garden Limited, is Europe's largest provider of specialist controlled release fertilisers. We have over 30 years experience in turf grass research and renovation systems. Our unique range of fertilisers and grass seed mixtures are used in renovation works on over 1,000 sports pitches throughout Europe each year. WOLF Proline also supplies a range of supporting lawn turf renovation equipment, including rain carts, spreaders and soil samplers.

Our team of specialist advisors look forward to welcoming you to stand F12 at SALTEx, where you can obtain detailed information and literature on our range of products and services, or make an appointment or discuss your future requirements.

Stand: F12

British & International Golf Greenkeepers Association

BIGGA was formed as a professional organisation in 1987, being an amalgamation of three similar volunteer-led national associations. It has now over 7300 members, organised into five regions and twenty-seven sections.

Its main objectives and activities are:

- Membership
- Recruitment
- Directory
- Exhibitions
- Education
- Training

Come and talk to us about any of the above on stand G01

Stand: G01

GRADEN

Turf Masters

- The Graden's unique 'Grooving' Process is widely regarded as the future of thatch management and surface aeration
- Impact up to 300% more surface area than standard Hollow Coring
- Perfect groove for overseeding
- Minimal disruption to play
- Rapidly promotes healthier root growth
- Encourages firmer, smoother putting surfaces
- Quick heal up time

Scotts UK

WEATHER-WISE

Visitors to SALTEX will be able to assess a tool that can make Integrated Turf Management actually work in practice. Most greenkeepers know the ITM theory, but making it happen is another matter. Now Scotts (stand E 01) will launch the answer – the innovative Scotts iTurf system.

iTurf is a technological triumph; a system that will measure everything that can potentially have an effect on turf growth and turf health, and then collate and present the information so that the turf manager can make the right cultural decisions.

The Scotts iTurf comprises a series of stations and sensors, linked to a computer, that constantly monitors air and soil temperature, solar radiation, humidity, wind speed, leaf wetness, soil moisture, rainfall etc right across the site.

Stand: E01

Etesia UK Ltd

Etesia's ride-on mowers and tractors offer high-output, minimum downtime and low maintenance. Optional turfcare attachments are available. For quality performance, Etesia pedestrian rotaries have a choice of engines and cutting widths. Biocut mulches clippings into fine particles to decompose naturally.

Attila ride-on and pedestrian brushcutters clear scrub and overgrown vegetation.

Free demonstration – tel. 01926 403319.
