Summer Dry Patch - localised dry patch

As summer approaches thought should be given to protecting fine turf from the unsightly dry patches caused by the summer stresses of higher temperatures, lower levels of participation and increased play. Localised dry spots can be remedied through the use of proven surfactant technologies, with the most effective defence being preventative applications over curative. New products to the market in 2005 provide even greater protection than before.

TREES

FAST-GROWING TREES

Growth of 6-8 feet per year

For rapid improvement to new and developing Golf Courses

Hybrid Poplars used for specimen and group plantings to make handsome trees and perimeter windbreaks.

Hybrid Willows used for screens, hedges, wind-breaks, and dense cover on course.

Both are tolerant of poor soils and sites and require little post-planting care.

All sizes available from 12 inch slips to 8 foot well-rooted trees.

Prices including delivery to most areas from £42 per 100, plus VAT or £380 per 1000, plus VAT

Free information pack and advice without obligation

Phone John or Monica Spanton-Coates on 01404 812229 or Fax on 01404 815800
