VALVE BOX DIGGING

When working in and around irrigation pop-ups and valve boxes that are sat in heavy soil, when excavated we dispose of the awkward heavy soil and refill with a rootzone or sand material.

This helps to keep components dry and anytime in the future when the box or pop-up has to be exposed again, it will be easier to dig and help reduce surface disturbance and increase quicker recover time.

Amenity Grass Seed

For those that know! ^{use}

GREENS **MM** 9

- Pure Bent mix for seeding and overseeding greens
- Top rated cultivars
- Range of cultivars for all year round performance
- Very tolerant to close mowing

100% Browntop Bent
