

ALDER

Also known as *Alnus* the bark is rough and black and typically is broken into squares. The leaves (as pictured) are between 50-100mm in length, are heart shaped and broadest towards the top. They are toothed and often notched at the tips with a wedge shaped base.

The tree itself is easily recognised by its regular branching, conical shape and stalked side buds. Alder trees can grow up to 70ft in height and in winter the tree retains many cone like fruits.
