FAREWELL TO PITCHMARKS

A Berkshire company has recently launched an innovative product that they claim could mean an end to pitchmark damage for good.

The 'Pitchmark Repairer' evolved from an idea by West Berkshire Golf Club Professional, Paul Simpson, who was concerned at the damage consistently caused to greens by unrepaired pitchmarks. Aware that many players were either reluctant to repair their marks or found bending down difficult, he set out to find a solution that would be practical, robust, inexpensive and easy to use for all golfers.

The Pitchmark Repairer is a small device made from glass-filled nylon that simply fits over the end of the putter grip, enabling golfers to easily repair pitchmarks without bending. It is secured with a patented sliding collar mechanism and fits all normal grip sizes. The Pitchmark Repairer fits easily into a pocket or can be attached to the player's bag or belt.

In time for the 2009 cutting season, Etesia is launching the PRO51X - a rugged professional 51cm pedestrian rotary designed to withstand the rigours of commercial use.

With this in the forefront of their minds, Etesia has chosen an engine from Honda's professional range to power the PRO51X - the GXV160. This commercial grade air-cooled OHV unit produces ample power to deal with the toughest of grass, yet still has some in reserve. The machine is self-propelled and has variable forward speed allowing the operator to adjust the mower's travel to suit prevailing conditions.

Peter Alliss has no difficulty giving compelling reasons as to why golf is the perfect game for adults - breathtaking scenery, fresh air, camaraderie and instant therapy.
