

BUYERS' GUIDE

Turfdry

Turfdry has been a specialist in golf course drainage since 1995 and has an excellent track record with over 50 golf courses throughout the UK, including well known clubs such as the Woburn Golf & Country Club.

The firm offers a comprehensive service including: detailed topographical surveys; drainage assessment and design; construction of ponds, other water features and drainage ditches; installation of plastic pipe drainage systems; and the unique Turfdry Drainage System using Hydroway Sportsdrain, a US designed and manufactured fin drain for which Turfdry is the sole approved UK installer.

Independent customer satisfaction surveys have shown Hydroway Sportsdrain to be an excellent alternative to conventional plastic pipe drainage schemes and it has been widely utilised to solve drainage problems on fairways, tees and clay-based greens - where it offers a cost effective long-term solution to rebuilding. The Turfdry (Greens) Drainage System involves the installation of Hydroway Sportsdrain at two metre centres, connected to a traditional plastic carrier drain which takes the drainage water to a suitable outfall (ditch, pond, pipe or soakaway). Following a successful trial on the New Course at Sunningdale GC, the system was commissioned for several other greens on the New and Old courses at Sunningdale where drainage performance has been dramatically improved without altering the traditional nature of the greens. As a result of the success of the schemes at Sunningdale and other prestigious courses the Turfdry (Greens) Drainage System has now been installed at more than 20 courses throughout the UK.

Turfdry operates throughout the UK from its base in Derbyshire. Most projects carried out by the firm are on a design and construct basis, with completed contracts in 2009 ranging in value from £5,000 to over £250,000.
