

BUYERS' GUIDE

AVOID SLIP UPS

No matter what kind of golf shoes you wear, there is the potential to slip. No shoe company is willing to give 100% guarantee that you will not slip anywhere on the golf course because there is such a wide variety of terrain and conditions.

Club committee members, course managers and green-keepers must take a close look at their golf course and implement appropriate safety precautions to avoid slip and fall accidents. Golf can be a dangerous sport, considering our litigious society and the fact that insurance rates have escalated, it is not surprising more golf clubs are now protecting against liability. The solicitor or claims handling company say that if you have had an accident and it was someone else's fault, you may be able to claim compensation.

All this can be avoided of course, why find fault when you can implement a lasting solution.

Paints, conveyor belting, timber grooving, and even chicken wire are still being used but they all wear out in no time and can be hazardous in themselves. That's why Gripclad have both an affordable and practical product that solves all these problems and there are many Golf Clubs throughout the UK who have installed these can testify to this fact. The product is resistant to spiked shoes, weather, frost, corrosion, chemicals, impact and of course, slip.

It can be fixed down onto wooden railway sleepers, club entrance steps, trolley ramps, bunker steps, viewing platforms, footbridges and walkways. It can also be fixed on to concrete and metal surfaces.

Gripclad offers free advice, product specification and a product that will far outlast all previous slip prevention methods.

Unrivalled quality and unmatched value for money means that this anti-slip product can be installed and then forgotten.

A compensation claim can dwarf the cost of the solution by a factor of thousands of pounds, so why not pay a small price for peace of mind and contact Gripclad.
