

BUYERS' GUIDE

Drainage: an important element of any golf course

Drainage is the lifeblood of any golf course and while much of the work is ultimately unseen by the golfer without it many courses would be unplayable for much of the year.

And it will only remain so. With projections for the next 70 years warning of a 16% increase in rainfall, coupled, incidentally, with significantly higher temperatures, drainage of golf courses will become even more important.

Meiklem Drainage, which now operates out of purpose built premises in Kelty, Fife, is already busy and by all accounts will be busier still.

It has carried out drainage improvement work on five of the St Andrews Links Courses – the Old, the New, the Jubilee, the Castle and a complete drainage system on Strathtyrum as well as Kingsbarns while it has also carried out trenchless drainage at Duff House Royal in Banff and the new G4 Course, at Blackford, next door to Gleneagles.

Off the golf course, Meiklem has also carried out work at the new Queen Margaret University College in Musselburgh and HM Prisons at Saughton and Perth.

Drainage is near the top of most enlightened golf clubs list of expected expenditure and drainage companies will be well placed to keep their order books full.

Meiklem Drainage:
John Meiklem
