John Greasley Limited

John Greasley Limited is one of Europe's leading golf course constructors. The company undertakes a wide range of projects from alterations and refurbishment of existing golf courses through to the construction of new courses.

The Company, established in 1984, has unrivalled experience in completing such works with a minimum of disruption and disturbance to the club and its members.

Its own experienced personnel of shapers, operators and finishers, are engaged in every operation from the earthworks through to the final preparatory, seeding/turfing and maintenance works.

The company owns and operates an extensive fleet of Low Ground Pressure, modern specialist machinery and equipment.

It has a broad & comprehensive understanding of all course styles and designs. Our previous experience of undertaking a range of projects throughout the UK & Europe, allows us to fulfil the demands of Architects and Clients.

Greasley is currently engaged on the West-East link main being installed around North Manchester by United Utilities and Murphy Pipelines. Having completed the enabling works to ensure 18 holes remain in play during the pipeline installation at Ashton-in-Makerfield, Bury, Ellesmere and Stand Golf Clubs, work is now focused on the final reinstatement post pipeline installation. Works include extensive drainage totalling over 13,000 Linear M, Green/tee/fairway/bunker construction with rootzone amelioration to fairways and re-turfing work in excess of 70,000m².

Many bunker refurbishment projects were carried out last winter including East Berkshire Golf Club, with the final holes due to be completed this autumn. At Longcliffe Golf Club the second phase of a three stage project was completed. More work was carried out at Farnham Park Golf Club and Panshanger Golf Complex where works are phased over a number of years. At Tylney Park new bunkers and tees were constructed together with an extensive new lake on the first hole which has greatly enhanced this opening hole.
