

BUYERS' GUIDE

Lakeland Earth Works

Lakeland first and foremost specialise in Golf Course construction, alterations and earthworks. Furthermore, our successful partnership with Fineturf, have gained considerable experience in all types of sports ground construction & regeneration work. With over 35 years experience in the specialist earthworks industry, one thing that our experience has taught us is that successful golf course construction requires a thorough knowledge and understanding of the game.

During these projects we've had the pleasure of working with many professional golfers including Lee Westwood and Darren Clark together with some fantastic Architects, Designers, Course Mangers and Greenkeepers

The creation of a golf hole, whether it be a Green, Tee, Bunker, Lake or the redevelopment of a watercourse requires the ability to work alongside nature to provide an environment capable of sustaining the local wildlife habitat, whilst retaining its natural beauty. A sensitive approach combined with careful consideration and planning makes it possible to enhance the aesthetic appearance of the area whilst maintaining the absolute minimum disruption to play.

With a fully owned fleet of specialist earthwork plant and machinery, including 360 excavators with the latest power tilt attachments, dumpers and bulldozers, all fitted with low ground pressure tracks or tyres, coupled with fully trained, vastly experienced and qualified operatives, attention to detail, and of course full health and safety compliance make Lakeland an ideal choice for your projects.
