

# Get blogging

Robert Laycock looks at how greenkeeper blogs can help communication within golf clubs

**It is often said that if golfers knew the reasons why maintenance activities were being carried out by greenkeepers on the golf course, they would be much more tolerant of their activities.**

At one golf club where I used to advise, any attempt to improve the course by aerating the greens, for example, was met by the members replacing the Chairman of Green.

Every year a new Chairman was appointed and as a result the course condition was never allowed to improve.

You can guess why I don't visit that club any more!

Greenkeepers use various ways to communicate with golfers - possibly word of mouth as they go about the course or a note posted on the club notice board.

Alternatively, there might be a paragraph in the club's newsletter or in a report from the Green committee, which may be posted on the members section of the club's website.

But is this the best way to get the message across? Information needs to be as up to date as possible.

A number of greenkeepers in the UK now have a blog to let members know what is going on at their course.

Richard Jacques of Malton & Norton Golf Club was encouraged to start blogging by seeing other successful blogs, such as his favourite from the team at Sawgrass.

In the UK, Richard also looked at blogs from this side of the Atlantic, including that produced by Bob Meikle at the Crail Golfing Society.

Another successful blog is Richard Lightfoot's at Bearwood Lakes Golf Club.

Richard Jacques's blog has a direct link from the club website homepage, so that members can easily find it.

He says, "The greenkeeper's blog gets a lot of visitors.

We started getting visitors early on and within a few months

there were many more as the blog became better known within the club and by the time we had been going for seven months we had had 5,000 hits.

"I find that if golfers know why things are being done around their course they are more supportive and tolerant.

If specific problems are being addressed to improve the course, they feel as if they are being listened to."

Even in winter, the blog has to be kept fresh.

If the course is closed or work such as bunker renovation and drainage is being carried out which many of the members don't ordinarily see, the blog emphasises the unseen work which goes on day by day around the course.

Blogs are not for everyone and, if not kept up to date, visitors will lose interest.

However it only takes minutes to download a few pictures which have been taken on the phone during the day and these are easily downloaded onto the blog.

Bob Meikle, Richard Jacques and Richard Lightfoot all use Google Blogger, but there is other software, such as WordPress.

So what are the secrets of success?

Richard says: "If you are going to blog, it is important to do it frequently so that it remains topical and worthwhile for visitors to return to.

All the greenkeeper bloggers I know have told me that if you can do it several times a week, so much the better.

It is important to keep it interesting and up to date, with lots of pictures.

"If done well, a blog is better than a paragraph in the monthly newsletter provided it is kept up to date and members can easily find it.

The blog also forms a good record - both of jobs that have been done on the course and also the effects of weather on areas of the course.

"Tell the members about it through conventional means or

sending out an email or text.

A link from the club's website homepage so that members can easily access it is also a good idea."

Does the presence of the blog improve the golf club membership's understanding of the greenkeepers' role? Or are the people who read it the usual suspects who show up to trips to the workshop to see the machinery or who attend course walks? Does it draw in the people who are still sitting around in the bar and who would benefit most from this education? Hopefully, by making the information easily accessible, the message will get through to golfers.

The greenkeepers I have spoken to think blogging is a worthwhile thing to do, so I say get signed up to WordPress or Blogger and start blogging

Are you a blogging greenkeeper? Or are you the avid reader of a fascinating blog by another greenkeeper?? If so email [steve.castle@bigga.co.uk](mailto:steve.castle@bigga.co.uk) and you could be featured in an upcoming edition of Greenkeeper International!

**ABOUT THE AUTHOR**  
Robert Laycock specialises in golf course agronomy and advises at some of the top UK courses.  
He has worked in turfgrass research and agronomy for the last 35 years and first began working as an independent professional agronomist 20 years ago. He is a Chartered Biologist, a Fellow of the Institute of Horticulture and a founder member of the Register of Independent Professional Turfgrass Agronomists.
