

BUYERS' GUIDE

Pic 1: Before treatment (May 2011)

Pic 2: after treatment (December 2011)

E.R.S. Developments Ltd

E.R.S Developments Ltd is one of the country's leading wildlife management and invasive weed control specialists. We are focused on satisfying our clients bespoke needs and have I.O.S.H. (Institute of Safety and Health) and City and Guilds trained technicians. We are also recognised by the Environment Agency for our unique treatment of Japanese Knotweed.

Rabbits (*oryctolagus cuniculus*) are now considered the UK's major vertebrate pest. Recent figures suggest that the UK rabbit population has reached 47 million, and still counting. This is a very emotive subject so management has to be precise and handled with the utmost discretion. As one of the leading specialists in wildlife management we offer a bespoke service to all clients.

Japanese Knotweed is without a doubt among the biggest challenges for our industry today. It is a highly invasive weed, which can spread exceptionally fast from only a small fragment, and cause extensive damage to property and displace native species of flora. It will grow through concrete, tarmac, and almost any weakness in a foundation. In addition the plant can regenerate from rhizome fragments as small as 0.7gram and can remain dormant in the soil for over four years making a professional and scientific approach to its eradication vital if 100% success is to be guaranteed. The 'FAST' system has been developed for eradicating Japanese Knotweed. It uses a range of application techniques developed by E.R.S Developments Ltd, which significantly increases the effectiveness of a standard herbicidal treatment method, to the extent that complete eradication can be achieved within one growing season of the treatment programme. When used alongside E.R.S's tailor-made site solution, they make a formidable partnership, sometimes even allowing the development program to continue un-affected. 1:
