

BUYERS' GUIDE

Green innovation

Golf courses are facing challenges on three fronts - climate change, difficult economic climate, and environmental pressures. Selecting the right products that can stand up to these challenges is key. With this in mind, Lindum Turf has developed a range of high quality products to suit the particular needs of golf courses with a focus on innovation in grass technology.

CHOICE OF TEES

With the renovation season fast approaching, Lindum can supply a choice of tees grade turf to suit your course and preferences. LT4 Smooth Stalked Tees is a high quality mixture of a fine bladed cultivar of smooth stalked meadow grass with fescues, combining fine appearance with hard wear and recovery. LT5 Rye Tees is a hard wearing mix combining the repair and recovery of wear tolerant ryegrasses with a dense smooth stalked meadow grass/fescue base.

SUCCESSFULLY ESTABLISHING NEW GREENS

New greens can fail to establish successfully because of soil particle size incompatibility. Lindum has developed several ways to combat this and can supply Washed Turf or greens turf grown on a USGA spec Rootzone. Both avoid the development of a layer that inhibits root growth and water percolation, leading to more successful establishment.

GO WILD!

More and more golf courses are recognising their contribution to the environment and planting natural wildflower areas to create interest, attract wildlife and give year round pleasure. Lindum Wildflower Meadow Turf produces an instant wildflower area and is easy to establish - ideal for enhancing biodiversity on the course.

NO MORE MUDDY WALKWAYS

Stabilise high traffic areas with Lindum Lokturf - a hard wearing mix of ryegrass and smooth stalked meadow grass, growing in a fibre reinforced rootzone. Lindum Lokturf provides superior reinforcement to reduce the impact of trolleys and golf shoes in all weathers.

Contact us on 01904 448675 for technical specifications of the full Lindum Golf Turf range or visit our website www.turf.co.uk
