

BUYERS' GUIDE

Blinder Bunker goes from strength to strength

It has been an exciting year for the Sunningdale based company going from strength to strength with bunker installations and receiving great feedback from course managers across the country and Europe who have been dealing with difficult conditions and still experiencing perfect conditions in there blinder bunkers, that rake up, as if no rain has been falling.

More and more clubs are now returning for further installations of the bunker lining system that uses Environmentally approved rubber, graded to bridge with sand and mixed with a special binding agent to provide a strong flexible base able to withstand golf club strikes without damage to the liner, club or player which no other liner can boast! The liner also has incredible drainage qualities and longevity.

The launch of the new Blinder Eco path has also been exciting and demand has been driven by course manager's wanting a natural but hard-wearing solution for pathways that blends perfectly into the environment. The coated shredded rubber comes in a variety of colours that can be used alone or in a blend. The rubber is mixed with a binding agent and forms a hard wearing, wash free path resembling wood mulch, but without the negative effects.

Blinder bunker liner and Blinder Eco path are installed by Pro fusion Environmental a leading golf course contractor, with a wide variety of experience in all aspects of golf course construction.

Blinder has been designed specifically to deal with all maintenance problems experienced by the course managers / superintendent's and the inconsistency issues that frustrate golfers.

The strive for perfection and expectation on golf courses is hampered by lost hours fixing bunkers from heavy rain wash out, sand inconsistency and contamination. Meet the Solution.
