

## “There’s a new leader in mowing technology.”

...“It’s amazing how quickly even the most conservative greenkeepers recognize SABO-Roberine as the new leader in mowing technology, once they have put the machines to the test.”

The quality seems a surprise to many people in the golf course business.

This must be our fault because we never told them before that

unmatched durability and user comfort has been the SABO-Roberine formula for more than 40 years now.

Call your local dealer for a demo and find out what quality is really about.
