

# IT'S TOUGH AT THE TOP

See us  
on Stand  
P2 at  
SALTEX

Your course endures a lot of punishment. And when you're sowing or overseeding, the last thing you need is to lose seedlings to the onslaught of soil-borne disease.

That's why each and every seed in the Guardian range has been precision coated with a fungicide and polymer treatment, enabling them to emerge and establish much more reliably than ordinary seed.

There are five precisely formulated mixtures for golf in the Guardian range, packed in handy sizes from a 2kg repairs box for greens and tees, a 15kg sack to renovate a standard green, and 20kg sacks. When it's tough at the top, choose Guardian - the top performer.

**Guardian** TREATED SEED
