

Free air miles ...from Hardi

The free flow of air through the soil is an essential requirement for the development of healthy, dense turf.

Compaction of the soil restricts the passage of air, together with moisture and nutrients to the grass roots and is a major cause of plant stress.

Coremaster 12
Fully adjustable tine depth from 0-4" (100 mm). Any combination of tine pattern and depth is possible.

Coremaster 12 with its fully adjustable aeration system will break through compacted soil to a depth of up to 4" (100 mm) introducing some 8 miles of air passages to an area of just 500 square metres.

Gentle on greens, yet fast on fairways, Coremaster 12 offers a wide range of tine sizes, patterns and coring depths to accommodate varying turf situations and operating conditions.

Mounted on the rear of a compact tractor it's high speed action will allow 18 greens to be treated in just one day.

Air travel, made easy by Greencare.

Coremaster 6
Walk-behind machine options also available.
