

Every club should have a professional like this!

The Hayter FM514 is a purpose-built 5-gang mower that's equal to the challenge of any course. Since no two golf courses are the same, the FM is designed to adapt. Unique 26" floating heads follow the ground contours closely for a superb finish.

Ground holding is gentle but firm. Wide front axle, broad tyres and variable weight transfer system give traction with minimum turf or soil damage.

And behind it all is the sheer power of a Kubota 35hp engine. With 'on-demand' 4-wheel drive transmission and differential locking you have total mastery.
